begun to rebuild the advanced space technology program in the agency with plans laid out in 14 draft technology roadmaps. It has been years since NASA has had a vigorous broad based program in advanced space technology development and its technology base has been largely depleted. However success in executing future NASA space missions will depend on advanced technology developments that should already be underway. Reaching out to involve the external technical community, the National Research Council (NRC) considered the 14 draft technology roadmaps prepared by OCT and ranked the top technical challenges and highest priority technologies that NASA should emphasize in the next 5 years. This report provides specific guidance and recommendations on how the effectiveness of the technology development program managed by OCT can be enhanced in the face of scarce resources. *Aeronautics and Space Report of the President* United States. This Element presents a unified computational fluid dynamics framework from rarefied to continuum regimes. The framework is based on the direct modelling of flow physics in a discretized space. The mesh size and time step are used as modelling scales in the construction of discretized governing equations. With the variation of cell Knudsen number, continuous modelling equations in different regimes have been obtained and the Boltzmann and Navier Stokes equations become two limiting equations in the kinetic and hydrodynamic scales. The unified algorithms include the discrete velocity method (DVM) based unified gas kinetic scheme (UGKS), the particle-based unified gas kinetic particle method (UGKP) and the wave and particle based unified gas kinetic wave particle method (UGKWP). The UGKWP is a multi scale method with the particle for non equilibrium transport and wave for equilibrium evolution. The particle dynamics in the rarefied regime and the hydrodynamic flow solver in the continuum regime have been unified according to the cell's Knudsen number. **Western Aerospace**, 1959. **Western Aviation, Missiles, and Space**, 1963. **Nuclear Technologies for Space Exploration**, 1992.
