Decision Theory with a Human Face Richard Bradley,2017-10-26 When making decisions people naturally face uncertainty about the potential consequences of their actions due in part to limits in their capacity to represent evaluate or deliberate Nonetheless they aim to make the best decisions possible In Decision Theory with a Human Face Richard Bradley develops new theories of agency and rational decision making offering guidance on how real agents who are aware of their bounds should represent the uncertainty they face how they should revise their

opinions as a result of experience and how they should make decisions when lacking full awareness of or precise opinions on relevant contingencies He engages with the strengths and flaws of Bayesian reasoning and presents clear and comprehensive explorations of key issues in decision theory from belief and desire to semantics and learning His book draws on philosophy economics decision science and psychology and will appeal to readers in all of these disciplines *Bayesian Theory* José M. Bernardo, Adrian F. M.
