**The Writings of Norman Maclean** Timothy P. Schilling, 2024-08-20 With a foreword by John N Maclean son of Norman Maclean The Writings of Norman Maclean Seeking Truth amid Tragedy provides the first critical reassessment of this celebrated author s work in more than a decade In his study Timothy P Schilling focuses on Maclean s attempt in A River Runs through It and Other Stories and Young Men and Fire to come to grips with the tragic side of human existence From the 1938 death of his brother Paul to the 1949 deaths of thirteen firefighters in Montana s Mann Gulch wildfire Maclean is driven by a desire to discover ultimate meaning the truth in the face of haunting tragedy Through careful analysis of all of Maclean s published works Schilling highlights the audaciousness of Maclean s quest to wrest free an answer from the universe Ever open to scientific literary philosophical and theological ways of viewing reality Maclean found ambiguity paradoxically to be an essential tool for probing the truth Beyond exploring Maclean s use of this tool Schilling breaks new ground by considering Maclean s invocation of the Transcendentals in A River Runs through It noting the sly homage Maclean pays to Izaak Walton examining Maclean s often neglected Other Stories assessing Robert Redford s film adaptation of A River Runs through It and providing the most thorough exploration of Young Men and Fire yet available With this book Schilling offers a current and complete analysis of Maclean one of the most iconic figures in Western American literature

**A Great Day to Fight Fire** Mark Matthews, 2013-07-10 Mann Gulch Montana 1949 Sixteen men ventured into hell to fight a raging wildfire only three came out alive Searing the fire into the nation s consciousness Norman Maclean chronicled the Mann Gulch tragedy in his award winning book Young Men and Fire Still the silence of the victims families robbed Maclean s account of an essential personal dimension Shifting the focus from the fire to the men who fought it Mark Matthews now provides that perspective Not until 1999 the fiftieth anniversary of the fire did people begin to talk openly about Mann Gulch Matthews has garnered those thoughts to reveal how devastating the fire was

to the firefighters family members coworkers and friends In retelling the story of Mann Gulch he draws on the testimony of the three survivors including never before published insights from the last living member of the team and interviews with former smoke jumpers of that era The result is a moment by moment heart stopping re creation of events The Mann Gulch tragedy provoked the Forest Service to develop safety equipment and training programs but fighting wildfires is still a perilous job Matthews stirring account renews our respect for one of nature s primal forces A heartbreakingly human story it still haunts a firefighting community and keeps today s firefighters forever on guard      **Beginnings of Range**

**South of Eden** Earl Murray, 2015-10-20 With the Twentieth Century just underway the establishment of the Forest Service has brought change and upheaval to the intermountain West Cattle barons who once allowed their herds to graze unchecked across the open range are now chafing at the introduction of forest saving restrictions With power and fortunes at stake secret meetings and strategy sessions are the order of the day Three people in particular are wrestling with the changes in the land Ellis Burke a cowboy turned natural resource specialist is sent to Routt National Forest to oversee these changes He faces massive resistance from the livestock companies and a possible threat to his life Cassie Waddell is the determined daughter of a cattle baron determined to see her father suffer for what he s done to her family She enlists

former Pinkerton detective Stark Preston to help her wrest the family company from his grasp And Preston has his own agenda he s determined for reasons that seem a bit too personal to see Burke fail in his mission to save Colorado s native grasslands *Driven Wild* Paul S. Sutter,2009-11-23 In its infancy the movement to protect wilderness areas in the United States was motivated less by perceived threats from industrial and agricultural activities than by concern over the impacts of automobile owners seeking recreational opportunities in wild areas Countless commercial and government purveyors vigorously promoted the mystique of travel to breathtakingly scenic places and roads and highways were built to facilitate such travel By the early 1930s New Deal public works programs brought these trends to a startling crescendo The dilemma faced by stewards of the nation s public lands was how to protect the wild qualities of those places while accommodating and often encouraging automobile based tourism By 1935 the founders of the Wilderness Society had become convinced of the impossibility of doing both In *Driven Wild* Paul Sutter traces the intellectual and cultural roots of the modern wilderness movement from about 1910 through the 1930s with tightly drawn portraits of four Wilderness Society founders Aldo Leopold Robert Sterling Yard Benton MacKaye and Bob Marshall Each man brought a different background and perspective to the advocacy for wilderness preservation yet each was spurred by a fear of what growing numbers of automobiles aggressive road building and the meteoric increase in Americans turning to nature for their leisure would do to the country s wild places As Sutter discovered the founders of the Wilderness Society were driven wild pushed by a rapidly changing country to construct a new preservationist ideal Sutter demonstrates that the birth of the movement to protect wilderness areas reflected a growing belief among an important group of conservationists that the modern forces of capitalism industrialism urbanism and mass consumer culture were gradually eroding not just the ecology of North America but crucial American values as well For them wilderness stood for something deeply sacred that was in danger of being lost so that the movement to protect it was about saving not just wild nature but ourselves as well

**Year of the Fires** Stephen J. Pyne,2001 1910 was America s millennial year of fire That summer American nature and American society collided with tectonic force as western wildfires scorched millions of acres darkened skies in New England and deposited soot on the ice of Greenland Farms mining camps and rail towns cracked and burned A survivor said that the towering flames raged with the sound of a thousand trains rushing over a thousand steel trestles As one ranger put it the mountains roared Stephen Pyne

explains how wildland fires happen and how they are fought how forests are created then re created in cycles of burning and what happens to a landscape when roads railways mining camps logging and national parks appear The action distills into a two day crisis the Big Blowup of August 20 21 when the fires tripled in size and focuses in particular on the heroics of Ranger Ed Pulaski who held his panicked crew at gunpoint in a mine tunnel while the firestorm raged outside Pyne brings that year to life through the experiences and words of the rangers soldiers politicians bureaucrats scientists and civilians who faced the fires fought the flames and were forever scarred by them It was the first and greatest test of the five year old Forest Service Yet even as seventy eight fire fighters perished a national debate raged about policy and especially about the relative merits of firefighting versus fire lighting BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

**The Bitterroot and Mr. Brandborg** Frederick H Swanson, 2012-05-22 Meticulously written The Bitterroot and Mr Brandborg tells the story of Guy M Brandborg and his impact on the practices of the U S Forest Service It articulates Brandborg s Progressive era idealism and is based on extensive archival research in collections throughout the Rockies and the Northwest including the Brandborg family papers

**Drawing Lines in the Forest** Kevin R. Marsh, 2009-11-23 Drawing boundaries around wilderness areas often serves a double purpose protection of the land within the boundary and release of the land outside the boundary to resource extraction and other development In Drawing Lines in the Forest Kevin R Marsh discusses the roles played by various groups the Forest Service the timber industry recreationists and environmentalists in arriving at these boundaries He shows that pragmatic rather than ideological goals were often paramount with all sides benefiting After World War II representatives of both logging and recreation use sought to draw boundaries that would serve to guarantee access to specific areas of public lands The logging industry wanted to secure a guaranteed supply of timber as an era of stewardship of the nation s public forests gave way to an emphasis on rapid extraction of timber resources This spawned a grassroots preservationist movement that ultimately challenged the managerial power of the Forest Service The Wilderness Act of 1964 provided an opportunity for groups on all sides to participate openly and effectively in the political process of defining wilderness boundaries The often contentious debates over the creation of wilderness areas in the Cascade Mountains in Oregon and Washington represent the most significant stages in the national history of wilderness conservation since World War II Three Sisters North Cascades and Glacier Peak Mount Jefferson Alpine Lakes French Pete and the state wide wilderness acts of 1984

[Smoke Jumping on the Western Fire Line](#) Mark Matthews, 2006 The story of the World War II conscientious objectors who volunteered for Civilian Public Service as U S Forest Service smoke jumpers is told in this history that reveals a little known dimension of American pacifism
