Soils and Human Health Eric C. Brevik, Lynn C. Burgess, 2012-12-12 Despite the connections between soils and human health there has not been a great amount of attention

focused on this area when compared to many other fields of scientific and medical study. *Soils and Human Health* brings together authors from diverse fields with an interest in soils and human health including soil science, geology, geography, biology, and anthropology to investigate this issue from a number of perspectives. The book includes a soil science primer chapter for readers from other fields and discusses the ways the soil science community can contribute to improving our understanding of soils and human health. Features: Discusses ways the soil science community can contribute to the improvement of soil health. Approaches human health from a soils focused perspective covering the influence of soil conservation and contact with soil on human health. Illustrates topics via case studies including arsenic in groundwater in Bangladesh, the use of Agent Orange in Vietnam, heavy metal contamination in Shipham, United Kingdom, and Omaha, Nebraska, USA, and electronic waste recycling in China. In a scientific world where the trend has often been ever increasing specialization and increasingly difficult communication between fields and subfields, the interdisciplinary nature of soils and human health studies presents a significant challenge going forward. Fields with an interest in soils and human health need to have increased cross disciplinary communication and cooperation. This book is a step in the direction of accessibility and innovation, elucidating the state of knowledge in the meeting of soil and health sciences and identifying places where more work is needed.

The Apple Grower Michael Phillips, 2005-10. For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly by applying the intuitive knowledge of our great grandparents with the fruits of modern scientific research and innovation. Since *The Apple Grower* first appeared in 1998, orchardist Michael Phillips has continued his research with apples which have been called organic's final frontier. In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers as well as its limitations. Creating a diverse healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms. How to make a small apple business viable by focusing on heritage and regional varieties, value added products, and the community orchard model. The author's personal voice and clear eyed advice have already made *The Apple Grower* a classic among small scale growers and home orchardists. In fact, anyone serious about succeeding with apples needs to have this updated edition on their bookshelf.

In Defense of Food Michael Pollan, 2008-01-01. 1 New York Times Bestseller from the author of *This is Your Mind on Plants*, *How to Change Your Mind*, *The Omnivore's Dilemma*, and *Food Rules*. Food: There's plenty of it around and we all love to eat it. So why should anyone need to defend it? Because in the so-called Western diet, food has been replaced by nutrients and common sense by confusion. Most of what we're consuming today is longer the product of nature but of food science. The result is what Michael Pollan calls the American Paradox: The more we worry about nutrition, the less healthy we see to become. With *In Defense of Food*, Pollan proposes a new and very old answer to the question of what we should eat that comes down to seven simple but

liberating words Eat food Not too much Mostly plants Pollan s bracing and eloquent manifesto shows us how we can start making thoughtful food choices that will enrich our lives enlarge our sense of what it means to be healthy and bring pleasure back to eating
