Economic Policy For The Arts:

Economic Policy for the Arts William Scott Hendon, James L. Shanahan, Alice J. MacDonald, 1980 Based on the proceedings of an international conference held in Edinburgh Scotland Aug 8 10 1979 **The State and the Arts** John William O'Hagan, 1998 This text examines in detail the evolution and rationale for state involvement with the so called high arts in both Europe and the United States The Economics of Art Museums Martin Feldstein, 2009-05-15 The National Bureau of Economic Research organized a project to explore the economic issues facing the major art museums of the United States For this purpose NBER defined economics broadly to include not only the financial situation of the museums but also the management and growth of museum collections the museums relationship with the public and the role of the government in supporting art museums This volume brings together nontechnical essays on these issues by economists associated with the NBER and personal statements by leaders of America's major national art museums and related foundations It can be read not only by economists but also by museum officials and trustees Museum directors generally come to their responsibilities with a background in art history and curatorial work but without experience in thinking about the management and public policy aspects of museum administration Trustees who serve on museum boards generally have a background in business or law but have not previously tried to apply their experience to the unusual economic problems of museums The background papers the panelists remarks and the summary of the discussion will help them to approach their responsibilities with a better understanding of the problems and possibilities of the museum **Handbook of the Economics of Art and Culture** Victor A. Ginsburgh, David Throsby, 2006-09-13 Over the last 30 or 40 years a substantial literature has grown up in which the tools of economic theory and analysis have been applied to problems in the arts and culture Economists who have surveyed the field generally locate the origins of contemporary cultural economics as being in 1966 the year of publication of the first major work in modern times dedicated specifically to the economics of the arts It was a book by Baumol and Bowen which showed that economic analysis could illuminate the supply of and demand for artistic services the contribution of the arts sector to the economy and the role of public policy Following the appearance of the Baumol and Bowen work interest in the economics of the arts grew steadily embracing areas such as demand for the arts the economic functions of artists the role of the nonprofit sector and other areas Cultural economics also expanded to include the cultural or entertainment industries the media movies the publishing industry popular music as well as heritage and museum management property right questions in particular copyright and the role of new communication technologies such as the internet The field is therefore located at the crossroads of several disciplines economics and management but also art history art philosophy sociology and law The Handbook is placed firmly in economics but it also builds bridges across these various disciplines and will thus be of interest to researchers in all these different fields as well as to those who are engaged in cultural policy issues and the role of culture in the development of our societies Presents an overview of the history of art

foreign policy gains More specifically it examines the means by which a government can enhance its efforts at economic persuasion by inducing domestic business trade and investing in the target nation The author demonstrates the domestic conditions under which the state can use commercial economic incentives to achieve foreign policy goals especially where these incentives are meant to induce cooperative behavior from another state Using the process of German Polish reconciliation in the 1970s and 1980s as a case study The Art of Economic Persuasion argues that complex institutional links between the German government and the German business community enabled the government to encourage commercial relations with Poland which supported the government s policies With singular access to archives of business associations in Germany as well as numerous interviews with German and Polish officials the author carefully retraces German foreign policy towards Poland in the 1970s and 1980s The Art of Economic Persuasion is a theoretical addition to the literature on international political economy and international relations It will be of interest to specialists in international relations foreign policy and international political economy as well as economists political scientists and historians of Germany Poland the United States and Cold War relations Patricia Davis is Assistant Professor of Government and International Studies University of Notre Dame
