**Who Will Care for Us?** Ronald Angel, Jacqueline L. Angel, 1999-06 An important contribution to the ongoing national dialogue concerning the need for planning for an increasingly aged population and its impact on our social political medical economic institutions Wisconsin Bookwatch Based on their assessments of the levels of need for the long term care among African American Latino and non Latino white older persons the authors offer viable and attractive possible alternatives to institutionalization in the long term care of the elderly Nurse Practitioner A major contribution Should be a part of every course on social gerontology long term care the demography of aging or formal informal support networks of the elderly Robert Joseph Taylor Institute for Social Research University of Michigan America is getting older By the year 2010 almost one in five Americans will be 65 years of age or older The combined forces of low fertility and longer life spans among all racial and ethnic groups have resulted in a disproportionate increase in the number of individuals over 65 and an even faster increase in the proportion of those individuals over eighty five As a result the nation faces an unprecedented challenge in addressing the economic medical and long term care needs of this older population at the same time that it assures the welfare of the young The growth of the cost of the long term care of the elderly is one of the major forces behind recent increases in Medicaid expenditures and any reformed health care financing system will have to find ways of providing

high quality long term care to older Americans at a reasonable cost In a racially and culturally diverse nation like the United States official policy regarding the care of the elderly simply cannot be based on the assumption that the elderly are a culturally and socially monolithic population The cultural social and economic situations of the elderly simply differ too greatly and the family s role in their care is affected by important cultural and social factors In *Who Will Care for Us* Ronald J and Jacqueline L Angel argue that policies based on the assumption of a homogenous population will fail to take advantage of the opportunities that ethnic and cultural diversity offer for the long term care of the elderly The authors examine the great racial and ethnic diversity among the elderly in the contemporary U S in terms of living arrangements economic well being and reliance on formal and family based sources of support Based on their assessments of the levels of need for long term care among black Hispanic and non Hispanic white older persons they offer viable and attractive possible alternatives to institutionalization in the long term care of the elderly      **Aging, Social Inequality, and Public Policy** Fred C.

Pampel,1998-02-25 Author Fred C Pompel treats age as a component of social inequality which gives rise to the three major themes of the text diversity in the experience of individuals differences in public policy and variations across nations Comparison of the United States with other nations is a central component of the book providing a greater understanding of the larger forces that shape old age      **Medicare and Medicaid at 50** Alan B. Cohen,David C. Colby,Keith A. Wailoo,Julian E. Zelizer,2015-06-01 For fifty years Medicare and Medicaid have stood at the center of a contentious debate surrounding American government citizenship and health care entitlement In *Medicare and Medicaid at 50* leading scholars in politics government economics health policy and history offer a comprehensive assessment of the evolution of these programs and their impact on society from their origins in the Great Society era to the current battles over the Affordable Care Act Obamacare These highly accessible essays examine Medicare and Medicaid from their origins as programs for the elderly and poor to their later role as a safety net for the middle class Along the way they have served as touchstones for heated debates about economics social welfare and the role of government *Medicare and Medicaid at 50* addresses key questions for understanding the past and future of health policy in America including What were the origins for these initiatives and how were they transformed over time What marks have Medicare and Medicaid left on society In what ways have these programs produced innovation even in eras of retrenchment How did Medicaid once regarded as a poor person s program expand its benefits and coverage over the decades to become the platform for the ACA s future expansion The volume s contributors go on to examine the powerful role of courts in these transformations along with the shifting roles of Congress public opinion and state governors in the programs ongoing evolution From Lyndon Johnson to Barack Obama on the left and from Ronald Reagan to George W Bush on the right American political leaders have tied their political fortunes to the fate of America s entitlement programs *Medicare and Medicaid at 50* helps explain why and how those ongoing debates are likely to shape the future of the Affordable Care Act      Freedom's Children Helen Wilkinson,Geoff Mulgan,1995      **International Handbook**

Williamson Ph D Boston College Ageing and Pension Reform Around the World Giuliano Bonoli, Toshimitsu Shinkawa, 2006-01-01 This is an admirable example of a multi-authored comparative book. The two editors set the scene very carefully in the opening chapter and the subsequent chapters follow the framework set out and use the concepts explored there. In this never simple policy area, national systems are explained as clearly as possible by each author. Michael Hill, *Journal of Social Policy*. This is an enlightening introduction to the global dimensions and complexity of pension reform. Recommended. J. F. O'Connell. Choice. Population ageing and the resulting pressures on existing pension systems constitutes one of the most important challenges modern societies will have to face over the coming decades. Although governments have responded to such pressures by adopting a plethora of pension reforms, the adaptation process is far from over. This book comprehensively documents developments in pension policy in eleven advanced industrial countries in Western Europe, East Asia and North America. In order to explore what population ageing means for the sustainability of pension systems, the authors present a detailed review of pension policy making over the past two decades and provide up-to-date analysis of current pension legislation. They examine the factors that can facilitate or impede the adaptation of pension systems and the features that shape and determine reforms. They also highlight the fact that although the path of reform taken by each country is somewhat different, the processes at work are often very similar. Ageing populations throughout the world are extremely reluctant to see their pension systems dismantled and are therefore prepared to mobilise in their defence. This process of mobilisation interacts with demographic pressures and institutional constraints to help determine the future direction of pension policy. The breadth of geographic coverage provides an almost global picture of the impact of ageing on pension reform at least in terms of high-income countries. Academics and students with an interest in economics, social policy, sociology and political science will find this a worthwhile and rewarding volume. It will also be of value to policymakers interested in how the problem of unsustainable pension systems can be resolved. **The Sometime Connection** Elaine B. Sharp, 1999-09-02 Explores the role that public opinion plays in the development of social policy in the United States. **Policies for an Aging Society** Stuart H. Altman, David Shactman, 2002-07-26 Zeldes, Columbia University. Robert B. Hudson, Boston University. *Journal of Health Politics, Policy and Law*. **Macroeconomic Policies of Developed Democracies** Robert J. Franzese, Jr., 2002-02-11 This book synthesizes and extends modern political economic theory to explain the postwar evolution of macroeconomic policy in developed democracies. Chapters 2-4 study transfers, debt and monetary wage policy making and outcomes, stressing that participation enhances transfer policy responsiveness to inequality and vice versa; that policy making vetoes actors; that fiscal policy adjustments induce greater long-run debt responses to all other political economic stimuli; and that monetary policy's nominal and real effects depend respectively on the broader political economic interest structure and on wage-price bargainers' sectorial composition and

coordination Broadly the book argues that these developments have exacerbated the distributional conflicts inherent in the policies to which postwar governments had committed while undermining their more universally desired efficiency fostering roles Battles that once raged primarily over policies conducted within postwar commitment frameworks now rage over the putative reforms of the frameworks that will set the institutional rules within which democratic struggle over macroeconomic policy and free market competition will continue
