

Urban Economics: Economics Meets Geography

Urban economics is defined as the intersection of geography and economics.

- Geography: studies location and the spatial distribution of activity
- Economics: explores choices made within limited resources
- Urban economics:
 - explores profit-max and utility-max location choices
 - explores causes and consequences of urban problems
 - studies the efficiency and distributional effects of local government policies.

Ledebur,1972 **The Oxford Handbook of Urban Economics and Planning** Nancy Brooks,Kieran Donaghy,Gerrit-Jan Knaap,2012-01-12 This volume embodies a problem driven and theoretically informed approach to bridging frontier research in urban economics and urban regional planning The authors focus on the interface between these two subdisciplines that have historically had an uneasy relationship Although economists were among the early contributors to the literature on urban planning many economists have been dismissive of a discipline whose leading scholars frequently favor regulations over market institutions equity over efficiency and normative prescriptions over positive analysis Planners meanwhile even as they draw upon economic principles often view the work of economists as abstract not sensitive to institutional contexts and communicated in a formal language spoken by few with decision making authority Not surprisingly papers in the leading economic journals rarely cite clearly pertinent papers in planning journals and vice versa Despite the historical divergence in perspectives and methods urban economics and urban planning share an intense interest in many topic areas the nature of cities the prosperity of urban economies the efficient provision of urban services efficient systems of transportation and the proper allocation of land between urban and environmental uses In bridging this gap the book highlights the best scholarship in planning and economics that address the most pressing urban problems of our day and stimulates further dialog between scholars in urban planning and urban economics Issues in Urban Economics Harvey S. Hartwick,2015-04-17 This textbook offers a rigorous calculus based presentation of the complexities of urban economics which is suitable for students who are new to the subject It focuses on structural details and explains the elements that make cities such highly productive entities and also explores explores the mechanisms of labour productivity enhancement that are unique to cities Written with a focus on location theory key topics include How cities are arranged Housing prices Urban transportation Why some cities grow rapidly whilst others decline How wages adjust to local costs of living How suburbs function in relationship to the urban core Public finance This book will be essential reading for Urban Economics courses at both undergraduate and postgraduate level **Economics of Urban Problems** Arthur F. Schreiber,Paul K. Gatons,1971 Urban Problems in Western Europe

Paul C. Cheshire, Dennis G. Hay, 2017-10-12 This major study first published in 1989 examines Western Europe's urban problems in unprecedented breadth and depth. It is a synthesis of research which had three main aims: to establish an informed view of the state of urban Europe in the most systematic and consistent way possible; to investigate and document and analyse the various causes of urban problems; and to analyse general trends and similarities as well as discovering what was local and particular. This book should prove invaluable to students, researchers and professionals concerned with urban affairs, whether they be geographers, planners, economists or policy makers. Economics and Urban Problems Richard Netzer, 1970 *Economic Principles and Urban Problems* Robert L. Bish, Robert J. Kirk, 2000 *Urban Problems (Routledge Revivals)* Michael Pacione, 2014-06-03 Urban problems and their resolution represent one of the major challenges for planners and decision makers in the modern world. This book, first published in 1990, makes a major contribution to the field, presenting an international and interdisciplinary approach to the challenges presented by the urban environment. The coverage is comprehensive, ranging from the economic and political dimensions of the capitalist system to the issues of poverty and deprivation and questions about housing equity. This is an essential reference guide to social, economic and environmental problems in urban areas, which is of great value to students of planning, urban studies, geography and sociology. *The New Urban Economics* H.W. Richardson, 2013-04-15 This book was first published in 1977. Urban economics is a relatively young field of economics, hardly existing except perhaps in real estate and land economics curricula before the 1960s. Within the last few years, especially after 1971, there has been a growth of interest in urban economic theory strong enough even to attract the attention of general economic theorists. These new theoretical writings have been named the New Urban Economics (NUE) for short. The aim of this monograph is to survey and assess NUE, to evaluate its contribution to urban economics, to offer a few extensions, and to say something about the future direction of the subfield. Reconstructing Urban Economics Franklin Obeng-Odoom, 2016-08-15 Neoclassical economics, the intellectual bedrock of modern capitalism, faces growing criticisms as many of its key assumptions and policy prescriptions are systematically challenged. Yet there remains one field of economics where these limitations continue virtually unchallenged: the study of cities and regions in built environment economics. In this book, Franklin Obeng-Odoom draws on institutional, Georgist and Marxist economics to clearly but comprehensively show what the key issues are today in thinking about urban economics. In doing so, he demonstrates the widespread tensions and contradictions in the status quo, showing how to reconstruct urban economics in order to create a more just society and environment.
