The Economist Desk Companion Penny Butler,1992 **The Economist Desk Companion** Economist Publications Staff,1992-01 **The Economist Desk Companion** The Economist,1992-09-15 Defines terms and symbols of measurement for a variety of fields from accounting and agriculture to textiles and transportation [The Economist Desk Companion](#) Economist Publications Staff,1994 [Know it All, Find it Fast](#) Robert John Duckett,Bob Duckett,Peter Walker,Christinea Donnelly,2008 There is a queue the phone is ringing the photocopier has jammed and your enquirer is waiting for a response You are stressed and you can feel the panic rising Where do you go to find the information you need to answer the question promptly and accurately Answering queries from users is one of the most important services undertaken by library and information staff Yet it is also one of the most difficult least understood subjects There are still very few materials available to help frontline staff often paraprofessional develop their reader enquiry skills This award winning sourcebook is an essential guide to where to look to find the answers quickly It is designed as a first point of reference for library and information practitioners to be depended upon if they are unfamiliar with the subject of an enquiry or wish to find out more It is arranged in an easily searchable fully cross referenced A Z list of around 150 of the subject areas most frequently handled at enquiry desks Each subject entry lists the most important information sources and where to locate them including printed and electronic sources relevant websites and useful contacts for referral purposes The authors use their extensive experience in reference work to offer useful tips warn of potential pitfalls and spotlight typical queries and how to tackle them This new edition has been brought right up to date with all sources checked for currency and many new ones added The searchability is enhanced by a comprehensive index to make those essential sources even easier to find saving you valuable minutes Readership Offering quick and easy pointers to a multitude of information sources this is an invaluable reference deskbook for all library and information staff in need of a speedy answer in reference libraries subject departments and other information units **Materials Handbook** François Cardarelli,2018-07-09 The unique and practical Materials Handbook third edition provides quick and easy access to the physical and chemical properties of very many classes of materials Its coverage has been expanded to include whole new families of materials such as minor metals ferroalloys nuclear materials food natural oils fats resins and waxes Many of the existing families notably the metals gases liquids minerals rocks soils polymers and fuels are broadened and refined with new material and up to date information Several of the larger tables of data are expanded and new ones added Particular emphasis is placed on the properties of common industrial materials in each class After a chapter introducing some general properties of materials each of twenty four classes of materials receives attention in its own chapter The health and safety issues connected with the use and handling of industrial materials are included Detailed appendices provide additional information on subjects as diverse as crystallography spectroscopy thermochemical data analytical chemistry corrosion resistance and economic data for industrial and hazardous materials

Specific further reading sections and a general bibliography round out this comprehensive guide. The index and tabular format of the book makes light work of extracting what the reader needs to know from the wealth of factual information within these covers. Dr François Cardarelli has spent many years compiling and editing materials data. His professional expertise and experience combine to make this handbook an indispensable reference tool for scientists and engineers working in numerous fields ranging from chemical to nuclear engineering. Particular emphasis is placed on the properties of common industrial materials in each class. After a chapter introducing some general properties of materials, materials are classified as follows: ferrous metals and their alloys, ferroalloys, common nonferrous metals, less common metals, minor metals, semiconductors and superconductors, magnetic materials, insulators and dielectrics, miscellaneous electrical materials, ceramics, refractories and glasses, polymers and elastomers, minerals, ores and gemstones, rocks and meteorites, soils and fertilizers, construction materials, timbers and woods, fuels, propellants and explosives, composite materials, gases, liquids, food, oils, resin and waxes, nuclear materials, food materials.

Encyclopaedia of Scientific Units, Weights and Measures

François Cardarelli, 2012-12-06. Mankind has a fascination with measurement. Down the centuries we have produced a plethora of incompatible and duplicatory systems for measuring everything from the width of an Egyptian pyramid to the concentration of radioactivity near a nuclear reactor and the value of the fine structure constant. With the introduction first of the metric system and of its successor the Système International d'Unités (SI), the scientific community has established a standard method of measurement based on only seven core units. The *Encyclopaedia of Scientific Units, Weights and Measures* converts the huge variety of units from all over the world in every period of recorded history into units of the SI. Featuring an A-Z of conversion tables for over 10 000 units of measurements, tables of the fundamental constants of nature with their units, listings of professional societies and national standardization bodies for easy reference, an extensive bibliography detailing further reading on the multifarious aspects of measurement and its units. This huge work is simply a must have for any reference library frequented by scientists of any discipline or by those with historical interests in units of measurement such as archaeologists.
