Ecosystem Function In Heterogeneous Landscapes:

Ecosystem Function in Heterogeneous Landscapes, 2005-12-15 This groundbreaking work connects the knowledge of system function developed in ecosystem ecology with landscape ecology's knowledge of spatial structure. The book elucidates the challenges faced by ecosystem scientists working in spatially heterogeneous systems, relevant conceptual approaches used in other disciplines, and in different ecosystem types, and the importance of spatial heterogeneity in conservation resource management.

Ecosystem Function in Heterogeneous Landscapes Gary M. Lovett, Clive Jones, Monica G. Turner, Kathleen C. Weathers, 2008-11-01 This groundbreaking work connects the knowledge of system function developed in ecosystem ecology with landscape ecology's knowledge of spatial structure. The book elucidates the challenges faced by ecosystem scientists working in spatially heterogeneous systems, relevant conceptual approaches used in other disciplines, and in different ecosystem types, and the importance of spatial heterogeneity in conservation resource management.

Landscape Ecology in Theory and Practice Monica G. Turner, Robert H. Gardner, 2015-10-29 This work provides an in-depth analysis of the origins of landscape ecology and its close alignment with the understanding of scale, the causes of landscape pattern, and the interactions of spatial pattern with a variety of ecological processes. The text covers the quantitative approaches that are applied widely in landscape studies, with emphasis on their appropriate use and interpretation. The field of landscape ecology has grown rapidly during this period; its concepts and methods have matured, and the published literature has increased exponentially. Landscape research has enhanced understanding of the causes and consequences of spatial heterogeneity and how these vary with scale, and they have influenced the management of natural and human-dominated landscapes. Landscape ecology is now considered mainstream, and the approaches are widely used in many branches of ecology and are applied not only in terrestrial settings but also in aquatic and marine systems. In response to these rapid developments, an updated edition of *Landscape Ecology in Theory and Practice* provides a synthetic overview of landscape ecology, including its development, the methods and techniques that are employed, the major questions addressed, and the insights that have been gained.

Satellite Remote Sensing and the Management of Natural Resources Nathalie Pettorelli, 2019-05-16 The ability to anticipate the impacts of global environmental changes on natural resources is fundamental to designing appropriate and optimised adaptation and mitigation strategies However this requires the scientific community to have access to reliable large scale information on spatio temporal changes in the distribution of abiotic conditions and on the distribution structure composition and functioning of ecosystems Satellite remote sensing can provide access to some of this fundamental data by offering repeatable standardised and verifiable information that is directly relevant to the monitoring and management of our natural capital This book demonstrates how ecological knowledge and satellite based information can be effectively combined to address a wide array of current natural resource management needs By focusing on concrete applied examples in both the marine and terrestrial realms it will help pave the way for developing enhanced levels of collaboration between the ecological and remote sensing communities as well as shaping their future research directions Satellite Remote Sensing and the Management of Natural Resources is primarily aimed at ecologists and remote sensing specialists as well as policy makers and practitioners in the fields of conservation biology biodiversity monitoring and natural resource management
