Proceedings of the 12th Biennial Southern Silvicultural Research Conference Kristina F. Connor,2004 *NC News* ,2000 **Experimental Forests and Ranges of the USDA Forest Service** ,2004 **General Technical Report SRS** ,2004 *Oak Seed Dispersal* Michael A. Steele,2021-01-05 The definitive examination of oak forest evolutionary ecology Seed dispersal is a critical stage in the life cycle of most flowering plants The process can have far reaching effects on a species biology especially numerous aspects of its ecology and evolution This is particularly the case for the oaks in which the dispersal of the acorn is tied to numerous tree characteristics as well as the behavior and ecology of the animals that feed on and move these seeds to their final destination Forest structure composition and genetics often follow directly from the dispersal process while also influencing it in turn In *Oak Seed Dispersal* Michael A Steele draws on three decades of field research across the globe e g the United States Mexico Central America Europe and China to describe the interactions between oaks and their seed consumers Rodents birds and insects he writes collectively influence the survival movement and germination of acorns as well as the establishment of seedlings often indicating a coevolutionary bond between oaks and their seed consumers This bond can only be understood by unraveling the complex interactions that occur in the context of factors such as partial seed consumption due to acorn chemistry scatterhoarding predation of the seed consumers by other organisms and the limiting effects of masting on insect rodent and jay damage Offering new insights on how animal mediated

dispersal drives ecological and evolutionary processes in forest ecosystems Oak Seed Dispersal also includes an overview of threatened oak forests across the globe and explains how a lack of acorn dispersal contributes to many important conservation challenges Highly illustrated the book includes photographs of key dispersal organisms and tactics as well as a foreword by Stephen B Vander Wall a leading authority on food hoarding and animal mediated seed dispersal and beautiful artwork by Tad C Theimer also an accomplished ecologist *General Technical Report NRS-P* ,2006 **Allegheny National Forest (N.F.), Proposed Land and Resource Management Plan** ,2007 Hoosier National Forest (N.F.), German Ridge Restoration Project ,2005
