## **Ecology For Environmental Professionals:**

**Ecology for Environmental Professionals** Dorothy J. Howell, 1994 If as has been asserted everything in nature is connected to everything else it is a lesson yet to be reflected among environmental professions especially those serving law and policy Nowhere is the lack of integration more apparent than in the incorporation of sound ecological principles Yet comprehension of these principles is a prerequisite to establishing effective environmental programs whether local or global Ecology and environmental sciences range from cosmology to determining toxic effects in a biological system In short ecology is served by and is itself a manifestation of all the natural sciences Ecology is further manifested in the social sciences directly and indirectly In this book ecology and environmental sciences are presented to environmental professionals in terms relevant to all their endeavors Today s ecologies emerge from the venerable scientific endeavor Upon placing ecology in the hierarchy of natural sciences this volume centers on the wealth of dimensions in which ecology is expressed Extending beyond the three spatial dimensions and that of time ecology enters those of holistic and reductionist vantages the last reflected in abiotic and biotic detail Dimensions serving environmental professions include the experimental those arising from interrelationships with adaptation and evolution and that of human ecology Finally there is the intellectual dimension Ecology as one thread in the contemporary cultural tapestry into which environmental policy and law are being woven Scrupulously avoiding superimposition of political stance this unique volume serves anyone lacking scientific preparation who would take a stance professional or personal
