Economic Challenges In Higher Education:

Economic Challenges in Higher Education Charles T. Clotfelter, Ronald G. Ehrenberg, Malcolm Getz, John J. Siegfried, 2008-04-15 The last two decades have been a turbulent period for American higher education with profound demographic shifts gyrating salaries and marked changes in the economy While enrollments rose about 50% in that period sharp increases in tuition and fees at colleges and universities provoke accusations of inefficiency even outright institutional greed and irresponsibility As the 1990s progress surpluses in the academic labor supply may give way to shortages in many fields but will there be enough new Ph D s to go around Drawing on the authors experience as economists and educators this book offers an accessible analysis of three crucial economic issues the growth and composition of undergraduate enrollments the supply of faculty in the academic labor market and the cost of operating colleges and universities The study provides valuable insights for administrators and scholars of education

American Higher Education in the Twenty-first Century Philip G. Altbach, Robert O. Berdahl, Robert Oliver Berdahl, Patricia J. Gumport, 2005 This new edition explores current issues of central importance to the academy leadership accountability access finance technology academic freedom the canon governance and race Chapters also deal with key constituencies students and faculty in the context of a changing academic environment

Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration Wang, Viktor, 2020-04-03 Higher education institutions are more so than other organizations deeply complex and they present a unique challenge to their leaders and administrators The unique complexities of higher education call for governance founded on thoughtful consideration of leadership practices theory and styles that reflect the values of the institution and its mission Embedded in a rapidly changing society the future of higher education leadership and administration is necessarily dynamic and demands a strong ethical core to guide research knowledge production and organizational behavior The Handbook of Research on Ethical Challenges in Higher Education Leadership and Administration is a cutting edge research publication that examines leadership ethics that higher education institutions must employ to be proactive visionary and ethically sound The publication covers the importance of leadership ethics in higher education as well as the foundation for developing frameworks in which to ground the presence of leadership ethics in higher education Featuring a wide range of topics such as distance education free speech and leadership this book is ideal for librarians academicians administrators researchers education professionals policymakers and students

The Indispensable University Eugene P. Trani, Robert D. Holsworth, 2010-02-16 The Indispensable University describes the innovative

transformation of institutions of higher education HEIs across the world in response to the emerging realities of the twenty first century global knowledge based economy as well as describes how HEIs are defining many of today s economic realities on a regional level HEIs continue to drive economic development through their traditional roles of purchaser employer real estate developer workforce developer and community developer But these roles now must be executed more strategically and collaboratively Also the twenty first century economy offers universities unique opportunities to generate the intellectual and financial capital that drives emerging knowledge based industries Case studies are drawn from urban America rural America Europe the Middle East and emerging countries Some of the topics covered include the following the role of university presidents as change leaders the relationship between higher education institutions and the political leadership of cities states and nations successful models of partnerships between higher education and the private sector and future challenges and opportunities facing the modern university

Economic Challenges for Higher Education in Central and Eastern Europe ,2015-01 **The Economic Institutions of Higher Education** J. Patrick Raines,Charles G. Leathers,2003-01-01

Working within the context of the evolutionary institutional transformation of higher education the authors trace the development of an economic model by which the behavioral tendencies of modern universities can be evaluated That model is expanded to provide insights to the following questions Why do universities compete and how do they develop and implement their competitive strategies How do universities make critical institutional decisions about operational missions academic policies and internal resource allocation Do universities efficiently and effectively pursue the special social functions assigned to them Patrick Raines and Charles Leathers present an integrated coherent theory to explain the behavior of universities and provide a realistic economic model that predicts how universities allocate their scarce educational resources This alternative view is contrasted with the mainstream explanations of university behavior based on the maximization of student welfare or faculty influences The authors extend the existing literature on the operation of universities by presenting a history of the evolution of the modern entrepreneurial universities as well as an explanation of academic capitalism This absorbing volume will appeal to anyone interested in the history of economic thought or the history of education Scholars of Veblen Smith and Malthus will be fascinated by their individual and comparative theories of the purpose and failures of higher education

Higher Education: Handbook of Theory and Research J.C. Smart,2012-12-06 To recapitulate Greeks differ from Independents and from the academy s value priorities but for the most part these differences derive from antecedent characteristics Moreover there are some grounds for speculating that these antecedent differences reflect fundamental temperamental differences extraversion and gregariousness mediated by social interaction as opposed to interaction through ideas Only to a limited degree does the Greek system appear to adversely affect the acquisition and assimilation of the academy s value priorities i e students as a whole Greek and Independent alike appear to become more independent liberal socially concerned and culturally sophisticated by graduation However the Greek system s effect on the

behavior of Greeks is more troubling an effect largely mediated by the use and abuse of alcohol and the relative absence of direct institutional supervision Assuming the retention of the Greek system then the promotion of the academy's agenda appears dependent on an understanding and accommodation of the personal characteristics of Greeks using appropriate pedagogical methods to advance the academy's educational objectives and both educational and administrative regulatory efforts to control the use and abuse of alcohol With or without the Greek system the advancement of the academy's agenda involves these considerations since the characteristics of students as a whole encompass the characteristics emphasized among Greeks

Economics of Higher Education Robert K. Toutkoushian, Michael B. Paulsen, 2016-03-18 This book examines the many ways in which economic concepts theories and models can be used to examine issues in higher education The topics explored in the book include how students make college going decisions the payoffs to students and society from going to college markets for higher education services demand and supply in markets for higher education why and how state and federal governments intervene in higher education markets college and university revenues and expenditures how institutions use net pricing strategies and non price product differentiation strategies to pursue their goals and to compete in higher education markets as well as issues related to faculty labor markets The book is written for both economists and non economists who study higher education issues and provides readers with background information and thorough explanations and illustrations of key economic concepts In addition to reviewing the contributions economists have made to the study of higher education it also examines recent research in each of the major topical areas The book is policy focused and each chapter analyses how contemporary higher education policies affect the behaviour of students faculty and or institutions of higher education Toutkoushian and Paulsen attempted a daunting task to write a book on the economics of higher education for non economists that is also useful to economists A book that could be used for reference and as a textbook for higher education classes in economics finance and policy They accomplish this tough balancing act with stunning success in a large volume that will serve as the go to place for anyone interested in the history and current thinking on the economics of higher education William E Becker Jr Professor Emeritus of Economics Indiana University

Higher Education in Romania: Overcoming Challenges and Embracing Opportunities Adrian Curaj, Jamil Salmi, Cezar Mihai Hâj, 2022-03-12 This open access book includes a series of relevant policy research articles elaborated in the framework of the Quality in higher education internationalisation and databases to enhance the Romanian education system project implemented by the Executive Agency for Higher Education Research Development and Innovation Funding UEFISCDI together with the Ministry of Education The project aims to develop and implement systemic measures at tertiary education level leading to an increased quality of the overall higher education system and universities better prepared for labour market requirements and international standards The book focuses on areas of interest for Romanian higher education such as systemic measures to improve access participation and completion for vulnerable students better promotion of the Romanian higher education to

attract students as well as instruments for a more efficient use of data at higher education level Each article includes evidence based policy proposals that could support new strategic initiatives in higher education including new legislation Additionally the collection of articles tells a comprehensive story about the audacity of a higher education system which went through significant challenges to align itself with both European and international trends as well as respond to national imperatives Over the last three decades since the fall of the Iron Curtain Romanian higher education has undergone significant transformations aiming to align itself to the latest developments and trends at European and international level The National Law on Education no 1 2011 has set the stage for a full implementation of the Bologna Process action lines taking into account that Romania was already a part of the largest European intergovernmental process currently the European Higher Education Area EHEA as a founding member However since the adoption of this normative framework the law suffered numerous amendments making it challenging to observe and achieve coherence in its implementation Furthermore Romania is also currently redesigning the strategy for the allocation of European structural funds 2021 2027 based on two strategic documents the new Education and Employment Operational Programme and the National Recovery and Resilience Plan which highlight the reform and investment priorities at a national level At the same time 2021 is a good time to analyze the level of implementation for the objectives and measures included in the National Strategy for Tertiary Education 2015 2020 the Europe 2020 Strategy and the Bologna Process action lines in the 2010 2020 timeframe Therefore the present moment may be an important time to assess the impact of strategic documents and actions in the last decade and possibly to draft a new National Education Law better adapted to current realities starting from the recent initiative by the President of Romania the Educated Romania strategic vision which was also politically assumed by the Romanian Government

Global Issues in Higher Education Pamela B. Richards, 2007 In most developed countries a high proportion of the population up to 50 percent now enter higher education at some time in their lives Higher education is therefore very important to national economies both as a significant industry in its own right and as a source of trained and educated personnel for the rest of the economy It follows that there are enormous stakes involved for a particular country even though the payoff of serious reforms may take decades and thus be counterproductive to the political forces responsible for designing and implementing such reforms since their horizons tend to be very short This new book tackles important issues in this dynamic field

Higher Education in the Asia-Pacific Simon Marginson, Sarjit Kaur, Erlenawati Sawir, 2011-08-21 This survey provides unprecedented scope and detail of analysis on higher education in the Asia Pacific region In this era of global integration convergence and comparison the balance of power in worldwide higher education is shifting In less than two decades the Asia Pacific region has come to possess the largest and fastest growing higher education sector on Earth The countries of East and Southeast Asia and the Western Pacific together enrol 50 million tertiary students compared to 14 million in 1991 and will soon conduct a third of all research and development In China Hong Kong Taiwan Korea and

Singapore world class universities are emerging at breakneck pace fostered by modernizing governments that see knowledge and skills as key to a future shaped equally by East and West and supported by families deeply committed to education But not all Asia Pacific countries are on this path not all reforms are effective and there are marked differences between nations in levels of resources educational participation research state controls and academic freedom Higher Education in the Asia Pacific Strategic responses to globalization provides an authoritative survey of tertiary education in this diverse and dynamic region Its 23 chapters written by authors from a dozen different countries focus successively on the Asia Pacific as a whole the strategies of individual universities and national policies and strategies in response to the global challenge *Higher Education Challenges in South-East Asia* Kahl, Christian, 2020-10-23 Over the last decade many local students have preferred to study overseas This has caused governments to announce the creation of programs and developments in the higher education sector to upgrade South East Asia to a leading education hub Moreover many governments declared that they would work on the insurance of learning to increase the quality of the degrees and the teaching itself This has led many to question the results of these declarations Higher Education Challenges in South East Asia provides an overview of what has been happening over the last ten years in higher education in South East Asia It also works to solve the challenges in modern education such as the impacts of digitalization globalization and Generation Y and Z learning styles Covering topics that include globalization educational technologies and comparative teaching this book impacts academic institutions policymakers government officials university and college administrators and leaders academicians researchers and students

Meeting Economic and Social Challenges Western Interstate Commission for Higher Education, 1992 The project has been an examination of the broad relationship between higher education and the economy and the ways in which higher education in the WICHE states must change in order to be more responsive to the needs of the region in the 1990s and beyond Public Policy Challenges Facing Higher Education in the American West L. Goodchild, R. Jonsen, P. Limerick, D. Longanecker, 2014-04-16 Public Policy Challenges Facing Higher Education in the American West is the first regional public policy study of American higher education Presidents of the Western State Commission for Higher Education and the National Center for Higher Education Management Systems alongside nationally recognized policy analysts and current western campus presidents provosts and administrators tackle seven key public policy issues facing postsecondary education in the American West student access federal research funding state governance state financing state appropriations and their relationship to institutional tuition distance education and technology and the role of community colleges These analysts researchers and administrators offer a clear and complete analysis of the facts of each policy situation the public policy options and their connections to state and university relationships Fifteen western states including Alaska California and Hawaii comprise the expansive region under discussion With its companion volume Higher Education in the American West Regional History and State Contexts this book is essential reading for higher education policymakers scholars and anyone
