Economics And Home Production Theory And Measurement:

Economics and Home Production Euston Quah,1993 Deals with recent developments in economic theory pertaining to the study of household production and valuation The text examines the major theoretical and methodological issues involved in measuring and valuing household production such as definition quantification and valuation International Economic Integration: Theory and measurement Miroslav Jovanovic,1998 *Social Policy in Post-Industrial Singapore* Kwen Fee Lian,Chee-Kiong Tong,2008-03-31 Notwithstanding the lean years that followed 1986 and 1997 sustained economic growth since the late 1970s has propelled Singapore into the post industrial age and reproduced the demographic and social structure of advanced western societies The rapid shift to a knowledge intensive economy requiring highly skilled services has resulted in a two speed society consisting of a highly competitive but rewarding sector and a marginalized population that is increasingly at risk Being avowedly anti welfarist the state for ideological reasons has resisted pressures to introduce a comprehensive welfare regime for its risk population preferring to privilege its productive citizenry Is Singapore a counterfactual to the convergence thesis by preferring to put in place a social policy driven by the belief of its leaders that the more successful a society is the more it is able to care for those who fall behind **The New Palgrave Dictionary of Economics** ,2016-05-18 The award winning The New Palgrave Dictionary of Economics 2nd edition is now available as a dynamic online resource Consisting of over 1 900 articles written by leading figures in the field including Nobel prize winners this is the definitive scholarly reference work for a new generation of economists Regularly updated This product is a subscription based product Inflation Theory in Economics Max Gillman,2009-03-23 These essays bring together a progression in monetary theory The major theme that runs through all of the chapters is that in order to do monetary economics well in general equilibrium it helps to have a good money demand underlying the theory A proper underlying money demand sets up arguably the best foundation from which to make extensions of monetary economics from the basic model At the same time that money demand is modelled this also endogenizes the velocity of money This has been a challenge in the literature that these essays solve and then use to extend basic neoclassical growth and business cycle theory Solving this problem in a way that is a natural direct and micro founded extension of the standard monetary theory is the first major contribution of the collection The second major contribution is the extension of the neoclassical monetary models using this solution to reinvigorate classic issues of monetary economics and take them to the frontier **The Household** Robert C. Ellickson,2010-08-02 Some people dwell alone many in family based households and an adventuresome few in communes The Household is the first book to systematically lay bare the internal dynamics of these and other home arrangements Legal underpinnings social considerations and economic constraints all influence how household participants select their homemates and govern their interactions around the hearth Robert Ellickson applies transaction cost economics sociological theory and legal analysis to explore issues such as the sharing of household output the control of domestic misconduct and

the ownership of dwelling units Drawing on a broad range of historical and statistical sources Ellickson contrasts family based households with the more complex arrangements in medieval English castles Israeli kibbutzim and contemporary cohousing communities He shows that most individuals when structuring their home relationships pursue a strategy of consorting with intimates This he asserts facilitates informal coordination and tends ultimately to enhance the quality of domestic interactions He challenges utopian critics who seek to enlarge the scale of the household and legal advocates who urge household members to rely more on written contracts and lawsuits Ellickson argues that these commentators fail to appreciate the great advantages in the home setting of informally associating with a handful of trusted intimates The Household is a must read for sociologists economists lawyers and anyone interested in the fundamentals of domestic life

Routledge International Encyclopedia of Women Cheris Kramarae, Dale Spender, 2004-04-16 For a full list of entries and contributors sample entries and more visit the Routledge International Encyclopedia of Women website Featuring comprehensive global coverage of women s issues and concerns from violence and sexuality to feminist theory the Routledge International Encyclopedia of Women brings the field into the new millennium In over 900 signed A Z entries from US and Europe Asia the Americas Oceania and the Middle East the women who pioneered the field from its inception collaborate with the new scholars who are shaping the future of women s studies to create the new standard work for anyone who needs information on women related subjects Macroeconomic Measurement Versus Macroeconomic Theory Merijn Knibbe, 2019-12-06 Ideally scientific theory and scientific measurement should develop in tandem but in recent years this has not been the case in economics There used to be a time when leading economists or their students established or led statistical offices and took care that the measurements were consistent with the theory and vice versa Not anymore Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer They do use the same words such as consumption investments or unemployment but the meanings can often be different This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual historical and in some cases ideological origins It also explores the possible policy implications In doing so the book draws on two separate strands of literature which are seldom used in unison macro statistical manuals and theoretical macro papers By doing so the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should in the end be based upon individual people and households and their social and cultural embedding instead of a representative consumer or Robinson Crusoe figure This work is essential reading for students economists statisticians and professionals Journal of Economic Literature ,1999 *Public Economics and the Household* Patricia Apps, Ray Rees, 2009-03-05 Economic models in much of the public economics literature have been slow to reflect the significant changes towards double income households throughout the developed world This graduate level text develops a more sophisticated approach to household economics one that allows for multiple income earners and

shared decision making This approach is used to present a fundamentally new view of consumption It then applies this to an analysis of tax systems combining theoretical analysis of optimal taxation and tax reform with careful empirical study of the characteristics of income tax systems in four different countries Australia Germany the UK and the USA The book is particularly concerned with analysing both theoretically and empirically the impact of taxation on female labour supply and identifying its effects on work incentives and fairness of income distribution All this adds up to a fascinating new approach to the economics of household for researchers in both public and private sectors
