Fundamentals of Educational Psychology Oscar Berry Douglas, B. F. Holland, 1938 The subject of educational psychology embraces such diverse materials that the problem of selection unification and clarification is a most difficult one We shall set forth some of the guiding principles followed in dealing with this threefold problem The material has been selected from a large number of representative books and journals Much of it is of experimental origin In selecting particular items two questions have dominated the thinking of the authors First is this material of interest or value to an educator Second does this material contribute to the development of a scientific attitude or to a basic understanding of the nature of the pupil Because textbooks usually concentrate attention on the types of material needed by educators the authors have freely consulted those which deal most adequately with each separate topic In various instances however material has been selected from articles appearing in journals The works most frequently inspected for material are those shown in bibliographies placed at the ends of the chapters The concept of educational psychology as science has been one of the unifying principles Part I deals primarily with this concept In it an effort has been made to suggest the relation of educational psychology to other sciences and to set forth the basic principles of scientific study and investigation The aim is to acquaint the student with the point of view of the educational psychologist particularly in regard to his subject matter and methods of collecting material In the parts that follow Part I the point of view is made apparent by constant reference to the reaction hypothesis and by the inclusion of and reference to scientific material The final section on measurement is likewise intended to contribute to this point of view Thus an effort has been made to employ the scientific concept of educational psychology as a unifying principle A second and equally important unifying principle is a fourfold view and description of the pupil the educational the physiological the genetic and the social The educational view is emphasized by constant reference to the teacher's problem and to the pupil as an adjusting organism The physiological point of view is maintained by attempting to describe the physiology of behavior not only in the chapter devoted to that topic but also in succeeding chapters dealing with somewhat distantly related topics Indeed it is the intention to keep the student constantly aware of the pupil as a

physiological organism An effort has been made to maintain the genetic point of view by description and reference to the growth development and maturation of both structures and functions The social point of view is indicated at first by a description of the social aspects of environment and later by frequent reference to social factors in adjustment and learning In brief the authors have attempted to give a psychological account of the whole pupil Pr face PsycINFO Database Record c 2015 APA all rights reserved **Fundamentals of Educational Psychology** Ira Morris Gast,Harley Clay Skinner,1929

Essentials of Educational Psychology Jeanne E. Ormrod,2009 The first book of its kind Essentials of Educational Psychology focuses squarely on the core concepts principles and underlying assumptions of the field of educational psychology the big ideas of ed psych Because of this focus and the book s exceptionally direct and clear presentation Essentials is a 10 chapter book that can truly be covered and understood in a term It is a book that enables and empowers students to understand the value and essential importance of educational psychology to becoming a qualified and quality teacher What instructors and students who have used Essentials say about the text I have had many students each term tell me that this is the most readable and practical textbook they have ever read Essentials is something that Ormrod wrote after considering her students needs This comes out in the writing style but in a way that also maintains the rigor of the content and uses the most recent understandings in the fieldMark J SzymanskiPacific University This text creates an integrated and engaging narrative that adeptly weaves theories and concepts of learning motivation and development into classroom teaching Not only is the text a pleasure to read but it is also a pleasure to teach using this text This format is sensitive to the length of semesters and frees instructors from rushing from one chapter to the next or covering multiple chapters in a single week As such instructors have greater flexibility to explore the topics with students Cecil RobinsonThe University of Alabama Other texts present information that is often bogged down with dry descriptions of research and abstract concepts Ormrod has an outstanding ability to make content accessible to and interesting for undergraduate students Also examples and suggestions are clearly related to chapter content and helpful for tying content to actual classroom practice We recommend that students keep this textbook because it will be a useful reference for them when they actually begin teaching Rhoda CummingsUniversity of Nevada Reno I have found no other textbook author who prepares adolescent behavior and development child behavior and development or beginning educational psychology texts as clearly as Ormrod William M GrayUniversity of Toledo **Essentials of Educational Psychology** Charles Edward Skinner,1959 *ESSENTIALS OF EDUCATIONAL PSYCHOLOGY* S. K. MANGAL,2007-01-05 A harmonious blend of the theoretical and practical aspects of educational psychology this student friendly text provides a base for the understanding of the subject The book discusses the various aspects of growth and development specifically during childhood and adolescence and accords due importance to the cognitive aspect of human behaviour with elaborate text on intelligence creativity thinking reasoning and problem solving Besides maintaining a logical progression of topics the author has interspersed the text with examples and illustrations to

provide an in depth analysis of the subject matter The book is ideally suited for the B Ed and B A Education courses but can also be a valuable reference for teachers teacher trainees and practising counsellors at various levels of school education

KEY FEATURES Cogent and coherent style of writing Assignment problems and sample tests at the end of various chapters Wide range of examples and over 50 illustrations to support and explain the topics discussed Fundamentals of Education Boyd Henry Bode,1921 *Essentials of Educational Psychology* Jeanne E. Ormrod,2008-04-01 Brief educational psychology text appropriate for all courses in introductory educational psychology Focused on the core concepts and principles of educational psychology and full of classroom applications and strategies for planning and carrying out instruction Engages readers as they embark on the journey of exploring the field of educational psychology and applying the principles and theories to instructional practice Key features include opening case studies See For Yourself features excerpts from Video Cases classroom artifacts Developmental Trends tables Classroom Strategies features and Cultural Considerations features
