Fundamentals Of Phytomorphology:

Fundamentals of Phytomorphology A. D. J. Meeuse, 1966 On a scientific method and morphology The old morphology and the new Definitions semantics and heuristics Phytomorphological schools and morphological traditions Intricacies of the other disciplines The beginning Lines and levels Axial and lateral organs Phylogeny of the reproductive region The outstanding controversy floral theories Pseudo phyllospory Phylogeny of the megasporangium Phylogeny of the microsporangium and the stamen Problems of the polyaxial floral region A phylogenetic approach to the morphology of seeds and fruits Gymnosperms and primitive angiosperms *Fundamentals of Phytomorphology* A. D. Meeuse, 1966-01-01

Fundamentals of Phytomorphology Meeuse, 1966-05 **Fundamentals of Phytomorphology** Robert C. King, 1966 *Foundations of Systematics and Biogeography* David M. Williams, Malte C. Ebach, 2007-11-19 Anyone interested in comparative biology or the history of science will find this myth busting work genuinely fascinating It draws attention to the seminal studies and important advances that have shaped systematic and biogeographic thinking It traces concepts in homology and classification from the 19th century to the present through the provision of a unique anthology of scientific writings from Goethe Agassiz Owen Naef Zangerl and Nelson among others [Axioms and Principles of Plant Construction](#) R. Sattler, 2012-12-06 This volume presents the proceedings of a symposium which I organised for the Developmental Section of the XIIIth International Botanical Congress at Sydney Australia on August 26 1981 The paper by Professor T Sachs which was received too late for inclusion into the symposium at Sydney was added to these proceedings because of its direct relevancy and importance The aim of the symposium was to state in an explicit and comprehensive fashion the most basic axioms and principles of plant morphology and morphogenesis An awareness of these axioms and principles is of paramount importance since they form the foundations as well as the goal of structural developmental botany Both teaching and research are predicated on them The Introduction by the editor briefly examines the meaning of the concepts axiom principle and plant construction The comprehensive paper by Dr G Cusset a unique historical overview explicates 37 principles of 5 major conceptual systems and many subsystems The extensive analysis includes a genealogy of ideas and ways of thinking of major authors ranging from philosophers and naturalists of antiquity to recent investigators of plant form and structure The bibliography of Dr Cusset's paper comprises ca 700 references The contribution by Professor H Mohr focusses on modern principles of morphogenesis and provides a penetrating analysis of scientific explanation in developmental biology The universal principles laws described in this paper apply to all living systems whereas the more specific principles are limited to plants or only higher plants Professor T *Phytomorphology*, 1986 *Principles of Dispersal in Higher Plants* L. van der Pijl, 2013-03-09 The work offered here is a companion volume to the work by K FAEGRI and L VAN DER PIJL Principles of pollination ecology which deals with the preceding phase of reproduction in plants In the present work too the emphasis is on principles and ecology It is neither an enumeration of mechanisms nor a compilation of cases RIDLEY S monumental work

The dispersal of plants throughout the world already comprises 700 large pages of small print and research has proceeded since then Though this work is more than just a compilation and contains much insight and thoughts on principles in addition to reviews its completeness hinders its use as a textbook As a reference work it is unsurpassed and the writer made frequent use of it The writer paid special attention to functional backgrounds for the use of taxonomists working with characters and to biosystematics at the macro level He is indebted to Dr P MULLER SCHNEIDER Chur Switzerland for the permission to translate parts of his Verbreitungsbiologie der Bliiten pflanzen of which permission a modest use has been made Thanks are also due to the Director of the Rijksherbarium at Leyden and to its librarian for the use of the library Mr F J NATAN was so kind as to make a number of photographs at the author s wishes

Foundations of Paleoecology S. Kathleen Lyons, Anna K. Behrensmeyer, Peter J. Wagner, 2019-12-13 Approximately 99% of all life that has ever existed is extinct Fortunately these long dead species have left traces of their lives and interactions with other species in the rock record that paleoecologists use to understand how species and ecosystems have changed over time This record of past life allows us to study the dynamic nature of the Earth and gives context to current and future ecological challenges This book brings together forty four classic papers published between 1924 and 1999 that trace the origins and development of paleoecology The articles cross taxonomic groups habitat types geographic areas and time and have made substantial contributions to our knowledge of the evolution of life Encompassing the full breadth of paleoecology the book is divided into six parts community and ecosystem dynamics community reconstruction diversity dynamics paleoenvironmental reconstruction species interaction and taphonomy Each paper is also introduced by a contemporary expert who gives context and explains its importance to ongoing paleoecological research A comprehensive introduction to the field *Foundations of Paleoecology* will be an essential reference for new students and established paleoecologists alike

Morphology of Flowers and Inflorescences Focko Weberling, 1992-09-03

[Indian Pandanaceae - an overview](#) Altafhusain Nadaf, Rahul Zanan, 2013-02-17 Indian screw pine family Pandanaceae represents three genera in which genus Pandanus and Benstonea are distributed in two hotspots in India the Western Ghats and the Northeast Himalayan region For the first time Indian Pandanaceae has been assessed for its taxonomic status and phylogenetic relationship The extensive survey by the authors led to the discovery of three new Pandanus species two from the Western Ghats and one from the Northeast Himalaya The present taxonomic revision confirmed total number of Pandanus species to 14 that are distributed in the Southern India 9 species and Northeast Himalayan region 5 species Genus Benstonea is represented by two species one from Southern India and another species common to both regions A detailed species identification key is given along with conservation status of each species following IUCN Red List Categories and Criteria 2001 The study revealed that out of 16 Pandanus and Benstonea species six species are under threatened categories In recent years a chloroplast DNA based molecular phylogenetic approach has been followed to understand the evolutionary relationship

among the plant species The interrelationship among the 14 Pandanus species at infrageneric level has been worked out using this approach which has led to the rearrangement of some species to the subgenera proposed by Stone 1974 Moreover the close relationship between Pandanus and Benstonea has been confirmed and the interrelationship of Indian Pandanus genus in global context is given This book also describes the economic importance of each Pandanus species Chemistry in Botanical Classification: Medicine and Natural Sciences Gerd Bendz,2013-10-14 Medicine and Natural Sciences Chemistry in Botanical Classification contains the proceedings of the Twenty Fifth Nobel Symposium held in Sodergarn Sweden on August 20 25 1973 The papers explore the chemical approach to plant classification and cover topics ranging from chemosystematics and applications of special classes of compounds to insects and plant chemotaxonomy Biosynthetic pathways in chemical phylogeny and some aspects of organic geochemistry are also discussed This book is comprised of 32 chapters divided into five sections The first chapter provides an overview of the chemical approach to botanical classification with special reference to the higher taxa of Magnoliophyta The reader is then introduced to chemosystematics and the construction of phylogenetic schemes as well as the use of a chemical character for the classification of living organisms The following chapters focus on The chemistry of disjunct taxa homology of biosynthetic routes and applications of special classes of compounds such as flavonoids The systematic distribution of ellagitannins in relation to the phylogeny and classification of the angiosperms is also considered The final chapter describes phytochemical and biological procedures for screening of plant materials This monograph will be of value to botanists plant taxonomists and chemists **Fundamentals of Phytomorphology [by] A.D.J.
