**Dictionary of Modern American Philosophers** John R. Shook, 2005-01-01 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings and suggestions for further reading. While all the major post Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers. In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought. *HISTORY AND PHILOSOPHY OF SCIENCE AND TECHNOLOGY -Volume I* Pablo Lorenzano, Hans-Jörg Rheinberger, Eduardo Ortiz and Carlos Delfino Galles, 2010-09-27 History and Philosophy of Science and Technology is a component of Encyclopedia of Physical Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias. Hodges, 2014-02-04 In this critical study of the thought of Augusto Cesar Sandino and his followers, Donald C. Hodges has discovered a coherent ideological thread and political program which he succeeds in tracing to Mexican and Spanish sources. Sandino's strong religious inclination in combination with his anarchosyndicalist political ideology established him as a religious seer and moral reformer as well as a political thinker and is the prototype of the curious blend of Marxism and Christianity of the late twentieth century Nicaraguan government, the Frente Sandinista de Liberación Nacional. **The New**

**Philosophical Foundations of Economic Reality** Javier Aranzadi, 2024-10-07 The dominant paradigm of the economy is based on homo economicus and its positivist mechanistic and utilitarian approach This leads to a form of technical liberalism advocating a market without society in which individuals are reduced to property rights and data subject to commercial transaction This book argues for a reconceptualisation of the philosophical foundations of economic reality in the 21st century Drawing on the continental tradition the book shows that adopting and combining anthropological ethical and metaphysical approaches can provide the basis for a better integration of markets so that they work with rather than against individual and social needs To correctly interpret the market as an institution and the firm as a social organisation the book explores concepts from the philosophy of action to show that it is people who literally create economic reality by providing for their needs through their creativity The book also explores the ethics that structure human behaviour providing a comparison between utilitarian ethics hedonistic ethics and first person ethics or virtues This discussion provides a philosophical foundation for human action grounded in metaphysics The metaphysical approach helps to overcome the modernist reductionism of the human to a life of individual purpose and instead look towards a larger goal the common good This book marks a significant addition to the literature on the philosophy of economics ethics and markets institutions and economic theory more broadly **Supplement to Cumulative Index to Publications of the Committee on**
