Intonational Grammar in Ibero-Romance Meghan E. Armstrong,Nicholas Henriksen,Maria del Mar

Essays on Language in Societal Transformation Tunde Opeibi,Josef Schmied,Tope Omoniyi,Kofo Adediji,2015-01-30 This paper generally lends support to the arguments advanced by Awonusi 1989 1990 2004 and others in favour of an endonormative as opposed to an exonormative standard for

English pronunciation in Nigeria They include the fact that the existing exonormative standard British Received Pronunciation RP has undergone and is still undergoing changes in its homeland and is not homogeneous The heightened social mobility of today's world perhaps works against the demarcation and homogenization of language varieties and this is all the more true of the varieties or lects that have been proposed for Nigerian English when these are related more or less explicitly to educational attainment Major attention is given in the paper to a schema of basilect mesolect and acrolect presented by Ugorji 2010 with a focus on his account of vowels and his presentation of a mechanism derived from optimality theory for evaluating vowels in contention The basilect and the mesolect are found to be so close to each other that they might be combined There would then be just two varieties In contrast the acrolect is close to British RP albeit with many variants due to the conflict of two standardising forces i.e. British RP and the basilect mesolect The vowel system of an officially adopted endonormative standard Nigerian RP would mainly be the same as that of British RP but the optimality mechanism could be employed to give preference to some of the Nigerian variants for inclusion in it

The Oxford Handbook of Ellipsis Jeroen van Craenenbroeck, Tanja Temmerman, 2018-12-13. This Handbook is the first volume to provide a comprehensive, in-depth and balanced discussion of ellipsis phenomena whereby the meaning of an utterance is richer than would be expected based solely on its linguistic form. Natural language abounds in these apparently incomplete expressions such as *I laughed but Ed didn't* in which the final portion of the sentence, the verb *laugh*, remains unpronounced but is still understood. The range of phenomena involved raises general and fundamental questions about the workings of grammar but also constitutes a treasure trove of fine-grained points of inter- and intralinguistic variation. The volume is divided into four parts. In the first, authors examine the role that ellipsis plays and how it is analysed in different theoretical frameworks and linguistic subdisciplines such as HPSG, construction grammar, inquisitive semantics, and computational linguistics. Chapters in the second part highlight the usefulness of ellipsis as a diagnostic tool for other linguistic phenomena, including movement and islands and codeswitching. While part III focuses instead on the types of elliptical constructions found in natural language such as sluicing, gapping, and null complement anaphora. Finally, the last part of the book contains case studies that investigate elliptical phenomena in a wide variety of languages including Dutch, Japanese, Persian, and

Finnish Sign Language **Irish Literature in Italy in the Era of the World Wars** Antonio Bibbò, 2021-12-14 This book addresses both the dissemination and increased understanding of the specificity of Irish literature in Italy during the first half of the twentieth century This period was a crucial time of nation building for both countries Antonio Bibb illustrates the various images of Ireland that circulated in Italy focusing on political and cultural discourses and examines the laborious formation of an Irish literary canon in Italy The center of this analysis relies on books and articles on Irish politics culture and literature produced in Italy including pamphlets anthologies literary histories and propaganda translations of texts by Irish writers and archival material produced by writers publishers and cultural and political institutions Bibb argues that the construction of different and often conflicting ideas of Ireland in Italy as well as the wavering understanding of the distinctiveness of Irish culture substantially affected the Italian responses to Irish writers and their presence within the Italian publishing field This book contributes to the discussion on transnational aspects of canon formation reception studies and Italian cultural studies **Variations on Uzbek Identity** Peter Finke, 2014-02-01 Throughout its history the concept of Uzbekness or more generally of a Turkic speaking sedentary population has continuously attracted members of other groups to join as being Uzbek promises opportunities to enlarge ones social network Accession is comparatively easy as Uzbekness is grounded in a cultural model of territoriality rather than genealogy as the basis for social attachments It acknowledges regional variation and the possibility of membership by voluntary decision Therefore the boundaries of being Uzbek vary almost by definition incorporating elements of local languages cultural patterns and social organization This book combines an historical analysis with thorough ethnographic field research looking at differences in the conceptualization of group boundaries and the social practices they entail It does so by analysing decision making processes by Uzbeks on the individual as well as cognitive level and the political configurations that surround them *World Englishes in the Arab Gulf States* Kay Gallagher, 2025-04-29 Kay Gallagher gathers insightful research from across the lower Arabian gulf to uncover the richness and diversity of World Englishes within the contemporary Arab Gulf states Her volume presents novel research from this emerging nexus of rapid economic social and linguistic development The countries of the lower Arabian Gulf Bahrain Kuwait Oman Qatar Saudi Arabia and the United Arab Emirates have to varying degrees harnessed English as an internal working language and as a means to communicate globally Gulf countries that have not featured much in the WE literature to date are highlighted in this volume including Bahrain and Kuwait and the use of English in the emerging colossus of Saudi Arabia is examined Novel insights from more prominent locations are presented here for the first time including the use of English to counter negative Islamic stereotypes during the FIFA World Cup 2022 in Qatar and its role in ensuring safety in a multilingual high risk industry in the UAE New research into the challenges encountered in English medium higher education in Oman and Kuwait is reported also The linguistic features of Gulf English are explored and the interplay and tensions between Arabic and English and other languages are addressed The Englishes of expatriate populations in the Gulf

are examined including the English identity of majority and minority resident transnational groups The issue of whether a distinctive variety of Gulf English has emerged in this multilingual melting pot characterized by transience and flux is debatable and the establishment of Gulf English as an endonormative new variety remains elusive This book will appeal to those with an interest in World Englishes in general as well as those who are interested in the roles and varieties of English in use in this globally unique and rapidly evolving context The six states of the Lower Gulf Bahrain Kuwait Oman Qatar Saudi Arabia and the United Arab Emirates UAE form an economic and political alliance known as the Gulf Cooperation Council GCC The region's oil rich economies have attracted millions of migrant workers both blue collar and white collar from East and West Transnational workers have brought linguistic diversity along with multiple varieties of English to this traditionally Arabic speaking region amplifying an increased internal demand for English such that English is shifting in the Gulf from a foreign language to a lingua franca
