observations of Oliver Sacks and Malcolm Gladwell Yet impressionism's persistence has also been a problem a matter of inauthenticity superficiality and complicity in what is merely impressionistic about culture today Jesse Matz considers these two legacies the positive and the negative to explain impressionism's true contemporary significance As Lasting Impressions moves through contemporary literature painting and popular culture Matz explains how the perceptual role cultural effects and social implications of impressionism continue to generate meaning and foster new forms of creativity understanding and public engagement Cooley's Cyclopaedia of Practical Receipts Cooley,1892 **Spons' Dictionary of Engineering,**

Kleinwächter,Sarah Lowengard,Friedrich Steinle,2023-10-04 This book describes the international effort to give order to colours and thus facilitate communication about it two topics deemed essential to a modernising world that were also recognizably complex Expert essays will enhance readers understanding of the struggle to coordinate nature with art at a time when approaches to both were undergoing rapid change Ordering Colours shows how such seemingly trivial concerns as identifying the basic colours and disseminating appropriate colour diagrams had to meet philosophical scientific and professional needs across Europe Contributors detail the many schemes for colour systematization and their real world applications questions of concern to both academic and manufacturing focused investigators throughout the long 18th century They bring together original research and new thinking about landmark early modern studies to address important developments as well as neglected historical contributions of European arts sciences and economies This collection is an important addition to the libraries of all who are interested in public culture and manufacturing developments in the early modern period and is aimed at historians of art technology philosophy and physics

Interpreting Nature I. G. Simmons,2013-01-11 Human society has constructed many varied notions of the environment Scientific information about the environment is often seen as the only worthwhile knowledge This ignores the complexities created by interaction between people and the environment Idealist thinking argues that everything we know is based on a construct of our minds and that all is possible Can both be correct and true Interpreting Nature explores the position of humanity in the environment from the principle that the models we construct are imperfect and can only be provisional Having examined the way in which the natural sciences have interrogated nature the types of data produced and what they mean to us this looks at the environment within philosophy and ethics the social sciences and the arts and analyses their role in the formation of environmental cognition Blank Splendour David Collings,2024-07-31 Certain moments in British Romantic poetry and art depict a state from which the attributes of existence time and space subject and object language and visuality have fallen away leaving a domain prior to the world and to thought the condition of mere existence As Blank

Splendour demonstrates poems by Wordsworth Coleridge Keats and Clare as well as paintings by Turner evoke a condition that transpires in a time without time a life without life David Collings argues that these works invite us to move beyond the subtle remnants of ontology that linger in current versions of posthuman thought such as affect theory and speculative realism by opening up a domain of affect without affect a world without objects Anticipating the philosophers Emmanuel Levinas and Maurice Blanchot these works bring into view the mode of a deconstruction that emerged before the linguistic turn one that meditates on the blank condition underlying modernity Ultimately Blank Splendour reveals how these works speak to our own moment when thought forced to contemplate its own extinction enters a new form of mere existence
