Fusion Reactor Physics Principles Technology:

Fusion Reactor Physics Terry Kammash,1977

Elements Nuclear Engineering Sara Mitter,Jacques P.

Ligou,2016-04-15 First Published in 1986 This work should be considered as a simple introduction to nuclear engineering It covers and somewhat enlarges upon a set of courses that the author s currently give at the Ecole Polytechnique Federale of Lausanne Switzerland

High-Temperature Gas-Cooled Reactor for Process Heat Applications Kurt Kugeler,Zuoyi

Zhang,2025-03-28 This book highlights the process of heat applications driven by modular high temperature gas cooled reactors HTGRs which have inherent safety characteristics and high outlet temperature The book systematically covers related principles guidelines and discussion about circuits components and the coupling with HTGR recommendations of safety measures and economic and environmental requirements with examples and experience from long term practice The combination of the HTGR technology and process heat applications not only is important for promoting the use of HTGR but also provides an option of significant potential for the replacement of conventional fossil fuels With over a thousand illustrations the book is of outstanding reference value for researchers and professionals to develop a thorough understanding

Materials in Nuclear Energy Applications C.K. Gupta,2018-05-04

The text combines an account of scientific and engineering principles with a description of materials and processes of importance in nuclear research and industry The coverage includes fuel materials control and shielding materials and so on in fact for most of the important parts of a reactor

Liquid Metal Magnetohydrodynamics J.J. Lielpeteris,R.J.

Moreau,2012-12-06 Liquid metal MHD is within the scope of two series of international conferences One is the International Congress on MHD Power Generation held every four years which includes technical and economical aspects as well as scientific questions The other is the Beer Sheva Seminar on MHD Flows and Turbulence held every three years in Israel In addition to these well established meetings an IUTAM Symposium was previously organized in Cambridge UK in 1982 on Metallurgical Applications of MHD by the late Arthur Shercliff It was focussed on a very specific subject developing rapidly from the middle of the 1970 s The magnetic field was generally AC including frequencies high enough for the skin depth to be much smaller than the typical length scale of the liquid pool And the development of new technologies or the improvement of existing ones was the main justification of most of the researches presented and discussed Only two participants from Eastern countries attended this Symposium By the middle of the 1980 s we felt that on this very same topic ideas had reached much more maturity than in 1982 We also realized that a line of research on MHD flows related to fusion reactors tokamaks was developing significantly with particular emphasis on flows at large interaction parameter
