The Law and Ethics of Medicine John Keown, 2012-04-26 The Law and Ethics of Medicine Essays on the Inviolability of Human Life explains the principle of the inviolability of human life and its continuing relevance to English law governing aspects of medical practice at the beginning and end of life The book shows that the principle though widely recognized as an historic and foundational principle of the common law has been misunderstood in the legal academy at the Bar and on the Bench Part I of the book identifies the confusion and clarifies the principle distinguishing it from vitalism on the one hand and a qualitative evaluation of human life on the other Part II addresses legal aspects of the beginning of life including the history of the law against abortion and its

relevance to the ongoing abortion debate in the US the law relating to the morning after pill and the legal status of the human embryo in vitro Part III addresses legal aspects of the end of life including the euthanasia debate the withdrawal of tube feeding from patients in a persistent vegetative state and the duty to provide palliative treatment This unique collection of essays offers a much needed clarification of a cardinal legal and ethical principle and should be of interest to lawyers bioethicists and healthcare professionals whether they subscribe to the principle or not in all common law jurisdictions and beyond

Medical Benefit and the Human Lottery Duff R. Waring,2008-01-18 Bioethicists moral philosophers and social policy analysts have long debated about how we should decide who shall be saved with scarce lifesaving resources when not all can be saved It is often claimed that it is fairer to save younger persons and that age is an ethically relevant consideration in such tragic decisions Medical benefit should be maximized and final selection should aim to minimize the contaminating influence of chance These claims are challenged by Duff R Waring in *Medical Benefit and the Human Lottery* one of the few books that attempts a sustained defence of random patient selection

This book combines ethics and political philosophy in its novel and strict egalitarian approach to patient selection for transplantable organs. Waring addresses the question of whether we should choose between lives on the basis of fair chances or best outcomes. He argues that final selection criteria should be based on fair chances that equalize opportunity as opposed to best outcomes. His defence of hardy egalitarianism aims to show that random selection by lottery can affirm both a common humanity and the equal value of lives. The notion of patient selection by lottery has not fared well in bioethics and has been regarded by some as a moral affront. Waring argues that a human selection lottery may be neither as crude nor as ethically anomalous as some have supposed. Indeed it can reflect a familiar conception of equality as a political and moral ideal. This conception abstracts from many undeniable differences between patients and claims that scarce resources should be allocated on the principled assumption that each of their lives is equally worth saving. The book is also notable for its critiques of some recent utilitarian notions of medical benefit which can have an age biased impact on elderly patients. Waring then argues against the leading contemporary age based approaches to patient selection. He explores the way random selection by lottery can affirm his egalitarian ethos in cases where eligible transplant candidates have each passed a threshold level of prospective medical benefit that has been set by democratic deliberation. Taming chance with a human lottery is defended as the most lucid means of ensuring equal opportunity. In so doing Waring argues that we give the principle of equal concern and respect a radical expression above a noncomparative threshold of medical benefit each candidate can have an equal claim to life.
