Countering the Proliferation of Weapons of Mass Destruction Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic

phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West's massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region's geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO's political and military posture Thanos P Doxos presents an assessment of the Alliance's options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers The Motivated Mind Arie Kruglanski, 2018-02-02 In the World Library of Psychologists series international experts themselves present career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings and their major practical theoretical contributions In this volume Arie Kruglanski reflects on the development throughout his distinguished career of his wide ranging research covering radicalisation human judgement and belief formation group and intergroup processes and motivated cognition This collection offers an invaluable insight into the key works behind the formation of Kruglanski's seminal theory of lay epistemics as well as his important input into a diverse range of fields of social psychology A specially written introduction gives an intimate overview of this career and contextualises the selection in relation to changes in the field during this time With continuing relevance today and of vast historical importance this collection is essential reading for anyone with an interest in goals belief formation group processes and social psychology in general *Making Threats* Betsy Hartmann, Banu Subramaniam, Charles Zerner, 2005 Today we live in times of proliferating fears The daily updates on the ongoing war on terror amplify fear and anxiety as if they were necessary and important aspects of our reality Concerns about the environment increasingly take center stage as stories and images abound about deadly viruses alien species invasions scarcity of oil water food safety of GMOs biological weapons and fears of overpopulation *Making Threats Biofears and Environmental Anxieties* addresses how such environmental and biological fears are used to manufacture threats to individual national and global security Contributors from environmental studies political science international security biology sociology and anthropology discuss what they share in common the view that fears should be critically examined to avoid unnecessary alarm and scapegoating of people and nations as the enemy Other In these highly original and thought provoking essays *Making Threats* focuses on five themes security scarcity purity circulation and terror No other book has systematically examined the proliferation of fear in the context of current world events and

from such a multidisciplinary perspective It consolidates in one place cutting edge research and reflection on how the contemporary landscape of fear shapes and is shaped by environmental and biological discourses By uncovering the linguistic tools that make fear resonate in the public consciousness by identifying the interests that create or are sustained by fears in short by giving fears histories Making Threats Biofears and Environmental Anxieties engages with some of the most potent and disturbing political and cultural aspects of the contemporary scene Researching Cybercrimes Anita Lavorgna, Thomas J. Holt, 2021-07-29 This edited book promotes and facilitates cybercrime research by providing a cutting edge collection of perspectives on the critical usage of online data across platforms as well as the implementation of both traditional and innovative analysis methods The accessibility variety and wealth of data available online presents substantial opportunities for researchers from different disciplines to study cybercrimes and more generally human behavior in cyberspace The unique and dynamic characteristics of cyberspace often demand cross disciplinary and cross national research endeavors but disciplinary cultural and legal differences can hinder the ability of researchers to collaborate This work also provides a review of the ethics associated with the use of online data sources across the globe The authors are drawn from multiple disciplines and nations providing unique insights into the value and challenges evident in online data use for cybercrime scholarship It is a key text for researchers at the upper undergraduate level and above **The Political Economy of the China-Pakistan Economic Corridor** Bai Gao, Zhihong Zhen, 2023-04-23 This book explores the political economy of China Pakistan economic corridor a major pilot project for China s One Belt One Road initiatives Pakistan will provide China with not only a pathway access to the Indian Ocean Middle East and Africa but also vital connections to the Trans Asia railway network that links Southeast Asia South Asia and West Asia This book analyzes how domestic factors in Pakistan will affect China s 46 billion investments It will be of interest to scholars policymakers and journalists

Lone Wolf Terror and the Rise of Leaderless Resistance George Michael, 2012-09-15 On July 22 2011 Anders Behring Breivik detonated a car bomb in downtown Oslo Norway He didn t stop there traveling several hours from the city to ambush a youth camp while the rest of Norway was distracted by his earlier attack That s where the facts end But what motivated him Did he have help staging the attacks The evidence suggests a startling truth that this was the work of one man pursuing a mission he was convinced was just If Breivik did indeed act alone he wouldn t be the first Timothy McVeigh bombed a federal building in Oklahoma City based essentially on his own motivations Eric Robert Rudolph embarked on a campaign of terror over several years including the Centennial Park bombing at the 1996 Olympics Ted Kaczynski was revealed to be the

Unabomber that same year And these are only the most notable examples As George Michael demonstrates in *Lone Wolf Terror and the Rise of Leaderless Resistance* they are not isolated cases Rather they represent the new way warfare will be conducted in the twenty first century *Lone Wolf Terror* investigates the motivations of numerous political and ideological elements such as right wing individuals ecoextremists foreign jihadists and even quasi governmental entities In all these cases those carrying out destructive acts operate as lone wolves and small cells with little or no connection to formal organizations Ultimately Michael suggests that leaderless resistance has become the most common tactical approach of political terrorists in the West and elsewhere
