Hamid Al-Bayati Ph.D.,2017-09-21

Why is the problem of terrorism and the emergence of more extreme and more brutal terrorist groups one that cannot be solved even after decades of trying The world has up to now failed to stop Al Qaeda terrorist attacks and also failed to stop the emergence of more extreme and more brutal terrorist groups than Al Qaeda such as ISIS ISIL as well as newer lone wolf terrorists Current strategies of counterterrorism have many shortcomings that allow terrorists to continue their operations A New Counterterrorism Strategy Why the World Failed to Stop Al Qaeda and ISIS ISIL and How to Defeat Terrorists identifies the shortcomings of present approaches and presents a comprehensive and sustainable strategy to combat terrorism Ambassador T Hamid Al Bayati an Iraqi politician offers a unique insider s perspective about the war on terrorism As a leader of the opposition against the terrorist regime of Saddam Hussein he was arrested and tortured until he fled Iraq From the UK he continued involvement in unfolding political events until returning to Iraq and assuming high political appointments These special insights are interwoven with accounts of detailed interactions and policies that provide the background for his explanation of the failures of counterterrorism strategies to date and lessons learned from those mistakes Al Bayati spotlights the problems of terrorist cells lone wolves and foreign fighters developing in all parts of the world where members work from safe havens to plan attacks acquire weapons and gain fighting experience His proposed strategy further emphasizes issues neglected in current counterterrorism strategies such as undermining the ideology of terrorists interrupting their use of the Internet to promote evil understanding the motivations and psychology of terrorists deterring youth from joining ISIS creating effective media campaigns against terrorism and shutting off the flow of funding that currently buoys the financial resources of terrorist organizations *Unfolding the Future of the Long War* Christopher G. Pernin,2008 The United States is currently engaged in a military effort that has been characterized as the long war The long war has been described by some as an epic struggle against adversaries bent on forming a unified Islamic world to supplant western dominance while others describe it more narrowly as an extension of the war on terror But while policymakers military leaders and scholars have offered numerous definitions of the long war no consensus has been reached about this term or its implications for the

United States To understand the impacts that this long war will have on the U S Army and on U S forces in general it is necessary to understand more precisely what the long war is and how it might unfold over the coming years To address this need this study explores the concept of the long war and identifies potential ways in which it might unfold as well as the implications for the Army and the U S military more generally This report uses the generation of either trajectories or alternative paths in which the long war might unfold to explore the implications for the U S military The discussion focuses on the potential threats the U S faces in each trajectory and considers the confluence of three major problems raised by the war those related to the ideologies espoused by key adversaries in the conflict those related to the use of terrorism and those related to governance i e its absence or presence its quality and the predisposition of specific governing bodies to the United States and its interests The goal of this report is not to determine which of these areas is the key problem Instead we take the stance that in order to ensure that this long war follows a favorable course the United States will need to make a concerted effort across all three domains Numerous broad conclusions and recommendations are given for addressing issues surrounding the long war provided by publisher **Understanding Terrorism** Gus Martin,2020-07-17 Understanding Terrorism Challenges Perspectives and Issues offers a comprehensive interdisciplinary exploration of domestic and international terrorism that helps students develop the knowledge and skills needed to critically assess the underlying causes of modern terrorist violence The Seventh Edition includes new or expanded discussions of critical topics in terrorism such as the evolution of right wing extremism in Western countries as well as analysis of recent events and updated terrorist tactics weapons and methods Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

Global Insurgency and the Future of Armed Conflict Aaron Karp,Regina Karp,Terry Terriff,2010-04-05 This volume covers a timely debate in contemporary security studies can armed forces adjust to the rising challenge of insurgency and terrorism the greatest transformation in warfare since the birth of the international system Containing essays by leading international security scholars and military professionals it explores the Fourth Generation Warfare thesis and its implications for security planning in the twenty first century No longer confined to the fringes of armed conflict guerrilla warfare and terrorism increasingly dominate world wide military planning For the first time since the Vietnam War ended the problems of insurgency have leapt to the top of the international security agenda and virtually all countries are struggling to protect themselves against terrorist threats Coalition forces in Afghanistan and Iraq are bogged down by an insurgency and are being forced to rely on old warfare tactics rather than modern technologies to destroy their adversaries These theorists argue that irregular warfare insurgencies and terrorism has evolved over time and become progressively more sophisticated and difficult to defeat as it is not centred on high technology and state of the art weaponry *Global Insurgency and the Future of Armed Conflict* will be of interest to students of international security strategic studies and terrorism studies

Enhancing Cooperation in Defence Against Terrorism Kenan Tokgöz, 2012 This book contains articles arising from the presentations by eleven experts from five countries delivered at the NATO Centre of Excellence Defence against Terrorism COEDA advanced training course ATC entitled Enhancing Cooperation in Defence against Terrorism held in Astana Kazakhstan in September 2010 The aim of this ATC was to stimulate discussion and facilitate interoperability between these five countries and NATO in the fight against terrorism pIOS Press is an international science technical and medical publisher of high quality books for academics scientists and professionals in all fields pSome of the **Hubris, Self-Interest, and America's Failed War in Afghanistan** Thomas P. Cavanna, 2015-07-22 This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan's warlords which compromised the country's stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America's logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition's inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan's inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter's duration scale and cost America's leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough 55 *Trends* Proteus, 2014-07-29 This book can be viewed as a response to a call sounded by Dr Thomas Mahnken at the Forces Transformation Chairs Meeting in February 2007 Dr Mahnken Deputy Assistant Secretary of Defense for Policy Planning pointed out that the United States responds to shocks most successfully when it has already recognized and responded to the trends from which they emerge It is less successful when those trends have gone unidentified or when no effective response to them has been mounted One case where the

trends were not recognized in time was the terrorist attacks of September 11 2001 It thus becomes necessary Dr Mahnken concluded to develop a means of identifying trends and responding to them before acute challenges emerge Forecasting International FI heartily agreed FI is one of the world s premier futurist organizations It specializes in the analysis of trends To our knowledge we were the first such organization to apply trend analysis to the problem of terrorism We did so with considerable success FI began its work on terrorism in 1994 when it managed the 4th Annual Defense Worldwide Combating Terrorism Conference for the Pentagon Its conference report Terror 2000 The Future Face of Terror accurately predicted the rise of Muslim extremism as a source of terror the terrorists growing taste for mass bloodletting the use of coordinated attacks on distant targets and even an assault on the Pentagon using a hijacked airplane omitted at the request of the State Department Since then FI has often studied terrorist issues for both government and private industry In the current report FI examines the future of international terrorism In this effort it has been assisted by more than fifty of the world s premier authorities in the fields of antiterrorism intelligence security and policing This expert panel included members of the intelligence community specialists from the U S government and military security consultants think tank staffers forecasters university professors and local police officials Most came from the United States but Australia Canada Ireland New Zealand Russia and Switzerland also were represented Several participants chose to remain anonymous owing to their sensitive positions in government and the military One contributor is a private citizen of whom we know nothing save that he responded to a magazine article we had published and provided some interesting thoughts This typifies our approach in this work We have tried to be inclusive rather than exclusive FI s own views and those of certain experts dominate the report but some have been included often in the appendices specifically because they diverge from the mainstream and might provide useful insights or novel ideas that would not arise from more conventional sources We have tried to omit nothing that should at least be considered Many of the ideas presented here deserve to be seen at the highest levels of government Key findings from our panel of experts include International terrorism will grow as veterans of the Iraq War return to their native lands train sympathizers in the tactics of terror and spread out across the world Among the Western lands Britain and France owing to their large Muslim populations and the United States will be at the greatest risk of attack in that order Further attacks on the scale of 9 11 are to be expected in all three countries over the range of five to ten years
