Sextus Propertius Francis Cairns, 2006-08-31 A study of Propertius four books of elegies investigating their sources and motives

*Fountains and Water Culture in Byzantium* Brooke Shilling, Paul Stephenson, 2016-10-13 This collection explores the ancient fountains of Byzantium Constantinople and Istanbul reviving the senses of past water cultures

*Water Technology in the Middle Ages* Roberta J. Magnusson, 2003-04-01 Focusing attention on gravity fed water flow systems in medieval cities and monasteries

*Water Technology in the Middle Ages Cities Monasteries and Waterworks* after the Roman Empire challenges the view that hydraulic engineering died with the Romans and remained moribund until the Renaissance

Roberta Magnusson explores the systems technologies how they worked what uses the water served and also the social rifts that created struggles over access to this basic necessity

Mindful of theoretical questions about what hastens technological change and how society and technology mutually influence one another the author supplies a thoughtful and instructive study

Archeological historical and literary evidence vividly depicts those who designed constructed and used medieval water systems and demonstrates a shift from a public administrative to a private innovative framework one that argues for the importance of local initiatives

The following chapters attempt to chart a course between the Scylla and Charybdis of technological and social determinism

While writing them I have tried to strike a balance between the technical and human aspects of medieval hydraulic systems and to remember that beneath the welter of documents and diffusion patterns configurations and components ordinances and expenditures lie the perceptions the choices and often the plain hard work of individual men and women from the Preface

**The Plain of Phaistos** Harriet Blitzer, Despoina Hadzi-Vallianou, L. Vance Watrous, 2005-02-01

The Plain of Phaistos presents the results on an interdisciplinary regional field project 1984 1987 carried out on the island Of Crete

The authors and contributors publish geological archaeological environmental botanical historical and ethnographic studies that establish the regional identity of the Western Mesara

Using a combination of empirical processual and post processual theoretical approaches the volume investigates a central problem how and why did the Bronze Age and Classical states arise at Phaistos

The Invention of the Inspired Text John C. Poirier, 2021-01-28

John C Poirier examines the theopneustic nature of the Scripture as a response to the view that inspiration lies at the heart of most contemporary Christian theology

In contrast to the traditional rendering of the Greek word theopneustos as God inspired in 2 Tim 3 16 Poirier argues that a close look at first and second century uses of theopneustos reveals that the traditional inspirationist understanding of the term did not arise until the time of Origen in the early third century CE and that in every pre Origen use of theopneustos the word instead means life giving

Poirier thus conducts a detailed investigation of theopneustos as it appears in the fifth Sibylline Oracle the Testament of Abraham Vettius Valens Pseudo Plutarch Placita Philosophorum and Pseudo Phocylides all of whom understand the word to

mean life giving He also studies the use of the cognate term theopneustos in Numenius the Corpus Hermeticum on an inscription at the Great Sphinx of Giza and on an inscription at a nymphaeum at Laodicea on the Lycus Poirier argues that a rendering of life giving also fits better within the context of 2 Tim 3 16 and that this meaning survived late enough to figure in a fifth century work by Nonnus of Panopolis He further traces the pre Origen use of theopneustos among the Church Fathers Poirier concludes by addressing the implication of rethinking the traditional understanding of Scripture stressing that the lack of God inspired scripture ultimately does not affect the truth status of the gospel as preached by the apostles
