## Abstract

Positive psychology is one of the fastest-growing sub-disciplines of psychology and established itself as a genuinely transdisciplinary science. It has broadened our understanding of the elements of wellbeing and the factors that undermine it. However, despite its growth and contribution, positive psychology is not without its challenges. Since its formal inception in 2000, many scholars have questioned the unique contribution of the paradigm as well as the validity of the theories, methods, interventions, and philosophy underpinning the discipline. However, within these criticisms and critiques lies unique opportunities to channel the future growth and development of the discipline. A clear and consolidated view of positive psychology's grand challenges is required to help chart a course for future directions. Therefore, this paper explores the grand challenges confronting positive psychology and highlights the opportunities and possibilities that they pose.

**Teaching the Entrepreneurial Mindset Across the University** Lisa Bosman, Stephanie Fernhaber, 2021-10-07 It stretches no point to suggest that creativity innovation and risk taking will decide our future societal prosperity We cannot spread those values too widely so having taught engineering faculty in their first book these authors now aim to boost the spirit across all disciplines What a great success for all of us if they succeed Mitchell E Daniels Jr president of Purdue University and former governor of Indiana Despite the relevancy of the entrepreneurial mindset for all career paths only a small percentage of the higher education student population takes part in entrepreneurially minded learning opportunities This gap can be attributed to several factors From a program perspective many degrees are already at credit capacity which allows limited room in the existing curriculum to add new courses From a student perspective entrepreneurship education is thus positioned as optional and requires extra time and in some cases tuition to do so Finally from an educator perspective the majority of faculty members across the university have not been trained in entrepreneurship and may not know where to start **Teaching the Entrepreneurial Mindset Across the University** An Integrative Approach overcomes these challenges by providing higher education faculty with a toolkit including tips and strategies to integrate the entrepreneurial mindset into existing courses regardless of discipline The book is broken into three core parts Motivation The importance of the entrepreneurial mindset for all students is established Design The Entrepreneurial Mindset Teaching Blueprint is introduced as a tool for integrating entrepreneurially minded curricular learning experiences within existing courses Application Example entrepreneurially minded curriculum from across the university are provided By integrating the entrepreneurial mindset across the curriculum students from all disciplinary backgrounds will be better prepared to enter the workforce solve complex social issues and leverage entrepreneurial thinking in their everyday lives This book is meant for educators who want to make an impact and truly prepare graduates for the real world

**Teaching Educational Psychology** Phyllis C. Blumenfeld, Linda Anderson, 1996 The articles included in this special issue are invited contributions that extend the work of the APA Division 15 Ad Hoc Committee on the Teaching of Educational Psychology The committee was established to consider implications of current reforms relative to educational psychology courses for prospective teachers It was charged to begin a dialogue about the contribution of educational psychology to teacher education and how educational psychology might best be taught to prospective teachers This issue's aim is to spark a lively interchange about the place of educational psychology in teacher education programs and the roles of educational psychologists as teacher educators with respect to three sets of issues identified by the contributors the nature of the field and the relationship of its theories to practice defining content and agreeing upon goals for teaching educational psychology to prospective teachers and principles of pedagogy for teaching prospective teachers about ideas from the field In so doing the editors hope to contribute to pedagogical content knowledge held by educational psychologists In addition they hope this issue will stimulate inquiry into what and how they teach and

how they can contribute substantially to prospective teachers knowledge and skills
