with 9 invited contributions were thoroughly refereed for inclusion in this volume. The book is divided in topical sections on programming methodology, artificial intelligence, natural language processing, machine learning, dataflow and concurrency models, parallel programming, supercompilation, partial evaluation, object oriented programming, semantics and abstract interpretation, programming and graphical interfaces, and logic programming.

Mathematical Foundations of Computer Science 1996 Wojciech Penczek, Andrzej Szalas, 1996-08-07. This book constitutes the refereed proceedings of the 21st International Symposium on Mathematical Foundations of Computer Science MFCS 96 held in Crakow, Poland, in September 1996. The volume presents 35 revised full papers selected from a total of 95 submissions together with 8 invited papers and 2 abstracts of invited talks. The papers included cover issues from the whole area of theoretical computer science with a certain emphasis on mathematical and logical foundations. The 10 invited presentations are of particular value.

Foundations of Software Technology and Theoretical Computer Science M. Joseph, R. Shyamasundar, 1984-11. Foundations of Software Technology and Theoretical Computer Science S. Ramesh, 1997-11-28. This book constitutes the refereed proceedings of the 17th International Conference on Foundations of Software Technology and Theoretical Computer Science FSTTCS 97. The 18 revised full papers presented were selected from a total of 68 submissions. Also included are five invited papers by Ed Clarke, Deepak Kapur, Madhu Sudan, Vijaya Ramachandran, and Moshe Vardi. Among the topics addressed are concurrency, Petri nets, graph computations, program verification, model checking, recursion theory, rewriting, and error correcting codes.

FST TCS 2001: Foundations of Software Technology and Theoretical Computer Science Ramesh Hariharan, Madhavan Mukund, V. Vinay, 2003-06-30. This volume contains the proceedings of the 21st international conference on the Foundations of Software Technology and Theoretical Computer Science FSTTCS 2001 organized under the auspices of the Indian Association for Research in Computing Science IARCS. This year's conference attracted 73 submissions from 20 countries. Each submission was reviewed by at least three independent referees. In a departure from previous conferences, the final selection of the papers making up the program was done through an electronic discussion spanning two weeks without a physical meeting of the Program Committee (PC). Since the PC of FSTTCS is distributed across the globe, it is very difficult to have a meeting whose time and venue is convenient for a substantial fraction of the PC. Given this, it was felt that an electronic discussion would enable all members to participate on a more equal footing in the final selection. All reviews, scores, and comments were posted on a secure website with a mechanism for making updates and automatically sending notifications by email to relevant members of the PC. All PC members participated actively in the discussion. The general feedback on the arrangement was very positive, so we hope to continue this in future years. We have invited speakers this year: Eric Allender, Sanjeev Arora, David Harel, Colin Stirling, and Uri Zwick. We thank them for having readily accepted our invitation to talk at the conference and for providing abstracts and even full papers for the proceedings.

Mathematical Foundations of Computer Science 2006 Rastislav Královic, Pawel Urzyczyn, 2006-08-11. This book constitutes the refereed proceedings of the

31st International Symposium on Mathematical Foundations of Computer Science MFCS 2006 The book presents 62 revised full papers together with the full papers or abstracts of 7 invited talks All current aspects in theoretical computer science and its mathematical foundations are addressed from algorithms and data structures to complexity automata semantics logic formal specifications models of computation concurrency theory computational geometry and more **Mathematical Foundations of Computer Science 2004** Jirí Fiala,Václav Koubek,Jan Kratochvíl,2004-08-09 This volume contains the papers presented at the 29th Symposium on Mathematical Foundations of Computer Science MFCS 2004 held in Prague Czech Republic August 22-27 2004 The conference was organized by the Institute for Theoretical Computer Science ITI and the Department of Theoretical Computer Science and Mathematical Logic KTIML of the Faculty of Mathematics and Physics of Charles University in Prague It was supported in part by the European Association for Theoretical Computer Science EATCS and the European Research Consortium for Informatics and Mathematics ERCIM Traditionally the MFCS symposia encourage high quality research in all branches of theoretical computer science Ranging in scope from automata formal languages data structures algorithms and computational geometry to complexity theory models of computation and applications including computational biology cryptography security and artificial intelligence the conference offers a unique opportunity to researchers from diverse areas to meet and present their results to a general audience The scientific program of this year's MFCS took place in the lecture halls of the recently reconstructed building of the Faculty of Mathematics and Physics in the historical center of Prague with the famous Prague Castle and other celebrated historical monuments in sight The view from the windows was a challenging competition for the speakers in the fight for the attention of the audience But we did not fear the result Due to the unusually tough competition for this year's MFCS the admitted presentations certainly attracted considerable interest The conference program and the proceedings consisted of 60 contributed papers selected by the Program Committee from a total of 167 submissions *Foundations of Software Technology and Theoretical Computer Science* P.S. Thiagarajan,1994-11-23 This volume presents the proceedings of the 14th International Conference on the Foundations of Software Technology and Theoretical Computer Science FSTTCS 14 held in Madras India in December 1994 Besides the five invited papers by well known researchers it includes 31 full refereed research papers selected out of a total of 140 submissions The papers contribute to the whole area of theoretical computer science with an emphasis on algorithms and complexity Other topics covered are program semantics program verification formal logic computational geometry concurrency unification and discrete mathematics *FSTTCS 2006: Foundations of Software Technology and Theoretical Computer Science* S. Arun-Kumar,Naveen Garg,2006-11-30 This book constitutes the refereed proceedings of the 26th International Conference on the Foundations of Software Technology and Theoretical Computer Science FSTTCS 2006 held in Kolkata India in December 2006 It contains 38 papers that cover a broad variety of current topics from the theory of computing ranging from formal methods discrete mathematics complexity theory and automata theory to theoretical

computer science in general **Computer Science Reconsidered** Karl M. Fant, 2007-06-30 The Invocation Model of Process Expression argues that mathematics does not provide the most appropriate conceptual foundations for computer science but rather that these foundations are a primary source of unnecessary complexity and confusion It supports that there is a more appropriate conceptual model that unifies forms of expression considered quite disparate and simplifies issues considered complex and intractable This book presents that this model of process expression is alternative theory of computer science that is both valid and practical Mathematical Foundations of Computer Science 1978 Józef Winkowski, J. Winkowski, 1978-08 **FST TCS 2002: Foundations of Software Technology and Theoretical Computer Science** Manindra Agrawal, Anil Seth, 2003-07-01 This volume consists of the proceedings of the 22nd International Conference on the Foundations of Software Technology and Theoretical Computer Science FSTTCS 2002 organized under the auspices of the Indian Association for Research in Computing Science IARCS The conference was held at the Indian Institute of Technology Kanpur during December 12-14, 2002 The conference attracted 108 submissions of which two were withdrawn Of these a total of 26 papers were selected for presentation in the conference As in the last year the PC meeting was held electronically stretching over nearly three weeks in August 2002 and was a great success In addition to the contributed papers we had invited speakers this year Hendrik Lenstra Jr Harry Mairson Dale Miller Chih Hao Luke Ong and Margus Veales We thank them for accepting our invitation and for providing abstracts or even full papers for the proceedings Two workshops were organized in conjunction with the conference both in Kanpur A workshop on Parameterized Complexity was held during December 10-11 organized by Mike Fellows and Venkatesh Raman The second workshop actually consisted of three miniworkshops on Coding Theory by Madhu Sudan on Finite Field Algorithms by Hendrik Lenstra Jr and on Sieve Theory by R Balasubramanian We wish to thank all the reviewers and PC members who contributed greatly to making the conference a success We also wish to thank the team at Springer Verlag for their help in preparing the proceedings
