Global Awakening Michael Schacker, 2012-12-14 Shows how we must make deep changes to complete our paradigm shift from the old mechanistic worldview to the new organic worldview Reveals the distinct stages of paradigm shifts through the ages including the 18th century Enlightenment and the critical stage of our current shift Explains how the new organic worldview began with Goethe and Kant Offers solutions for each of us to be able to realize and make the deep changes needed for global regeneration In *Global Awakening* Michael Schacker shows that hidden within our global crises is a positive future for the planet Sharing his 30 years of intensive research into the history of change as well as the evolution of consciousness and regenerative science Schacker explains how our current shift from the old mechanistic worldview to a new organic worldview based on biological models follows the same pattern as other paradigm shifts across history including the 18th century Enlightenment and the American Revolution He reveals the creative geniuses who have contributed to the birth of the organic worldview beginning with Goethe Kant and Hahnemann Exposing the scientific and social forces that drive paradigm shifts he details the stages every paradigm shift progresses through the early Enlightenment the conservative backlash the intensive phase and the transformational phase leading to the Organic Shift Explaining that we are currently in the throes of the paradigm flip the critical last phase of our paradigm shift Schacker shows how the mechanistic worldview is crumbling around us and nothing but a complete transformation in the way we think will keep us from the path of total self destruction Providing a map to overcome the allure of the simplistic mechanical model that has spawned countless unsustainable practices and problems from global warming to intense economic disparities the author offers concrete solutions showing how each of us can use our talents skills and time to make the deep changes needed for global regeneration

The Parting of the Ways Stephen Spence, 2004 This book seeks to inject into the general discussion of the Parting of the Ways of Judaism and Christianity the social realities of the separation of a particular Christian community and

a particular Jewish community By drawing upon the literary and the historical data available concerning the church in Rome Spence seeks to discover when and how Christians came to see themselves as an identifiably distinct community His findings will surprise those who see the Parting of the Ways as a slow process He argues that although the parting was early it was not without its complications Drawing upon the work of Rodney Stark a sociologist of religion Spence suggests that within the church in Rome there was a struggle between those who saw the church as a Jewish sect and those who saw the church as a Roman cult a struggle already underway when the Apostle Paul wrote Romans This struggle however was not an even one because it was the cultists those for whom the church's primary social location was the pagans of Rome who held the positions of power over the numerically smaller sectarians who sought to maintain the church's primary identity as a Jewish sect acceptable within the synagogues of Rome Beyond Doubt Isabella Kasselstrand, Phil Zuckerman, Ryan T. Cragun, 2023-05-09

Demonstrates definitively that the secularization thesis is correct and religion is losing its grip on societies worldwide In the decades since its introduction secularization theory has been subjected to doubt and criticism from a number of leading scholars who have variously claimed that it is wrong flawed or incomplete In Beyond Doubt Isabella Kasselstrand Phil Zuckerman and Ryan T Cragun mount a strong defense for the theory providing compelling evidence that religion is indeed declining globally as a result of modernization Though defenses of secularization theory have been mounted in the past we now have many years worth of empirical data to illuminate trends and can trace changes not just at a given point in time but over a trajectory Drawing on extensive survey data from nations around the world the book demonstrates that in spite of its many detractors there is robust empirical support for secularization theory It also engages with the most prominent criticisms levied against the theory showing that data that are said to refute the narrative of religious decline are easily explainable and in keeping with the broader tendency toward secularization Beyond simply defending secularization theory the authors endeavor to formalize it offering clear definitions of relevant terms and creating propositions that can be repeatedly and accurately tested Beyond Doubt offers the strongest argument to date for the existence of a global secularization trend and will be a vital resource for students and scholars alike who study religion and secularism

wide ranging appraisal of chaplaincy in an era of religious complexity and emergent spiritualities this pioneering book is a major contribution to a relatively underdeveloped field and sets out how the phenomenon of chaplaincy can be better understood and its practice more robust and informed

Virtual Futures Joan Broadhurst Dixon, Eric Cassidy, 2005-07-20

Virtual Futures explores the ideas that the future lies in its ability to articulate the consequences of an increasingly synthetic and virtual world New technologies like cyberspace the internet and Chaos theory are often discussed in the context of technology and its potential to liberate or in terms of technophobia This collection examines both these ideas while also charting a new and controversial route through contemporary discourses on technology a path that discusses the material evolution and the erotic relation between humans and machines Virtual Futures brings together diverse fields such as cyberfeminism materialist philosophy postmodern fiction computing culture and performance art with essays by Sadie Plant Stelarc and Manuel de Landa to name a few The collection heralds the death of humanism and the ride of posthuman pragmatism The contested zone of debate throughout these essays is the notion of the posthuman or the possibility of the cyborg as the free human Viewed by some writers as a threat to human life and humanism itself others in the collection describe the posthuman as a critical perspective that anticipates the next step in evolution the integration or synthesis of humans and machines organic life and technology This view of technology and information is heavily influenced by Anglo American literature especially cyberpunk Pynchon and Ballard as well as the materialist philosophies of Freud Deleuze and Haraway Virtual Futures provides analyses by both established theorists and the most innovative new voices working in conjunction between the arts and contemporary technology

A Sociology of Spirituality Dr Kieran Flanagan, Revd Dr Peter C Jupp, 2013-05-28

The emergence of spirituality in contemporary culture in holistic forms suggests that organised religions have failed This thesis is explored and disputed in this book in ways that mark important critical divisions This is the first collection of essays

to assess the significance of spirituality in the sociology of religion The authors explore the relationship of spirituality to the visual individualism gender identity politics education and cultural capital The relationship between secularisation and spirituality is examined and consideration is given to the significance of Simmel in relation to a sociology of spirituality Problems of defining spirituality are debated with reference to its expression in the UK the USA France and Holland This timely original and well structured volume provides undergraduates postgraduates and researchers with a scholarly appraisal of a phenomenon that can only increase in sociological significance *Thomas Kuhn's Revolution* James A. Marcum, 2005-10-02 The influence of Thomas Kuhn 1922 1996 on the history and philosophy of science has been truly enormous In 1962 Kuhn's famous work *The Structure of Scientific Revolutions* helped to inaugurate a revolution the historiographic revolution in the latter half of the twentieth century providing a new understanding of science in which paradigm shifts scientific revolutions are punctuated with periods of stasis normal science Kuhn's revolution not only had a huge impact on the history and philosophy of science but on other disciplines as well including sociology education economics theology and even science policy James A Marcum's book focuses on the following questions What exactly was Kuhn's historiographic revolution How did it come about Why did it have the impact it did What if any will its future impact be for both academia and society At the heart of the answers to these questions is the person of Kuhn himself i.e. his personality his pedagogical style his institutional and social commitments and the intellectual and social context in which he practiced his trade Drawing on the rich archival sources at MIT and engaging fully with current scholarship on Kuhn Marcum's is the first book to show in detail how Kuhn's influence transcended the boundaries of the history and philosophy of science community to reach many others sociologists economists theologians political scientists educators and even policy makers and politicians *Handbook of Religion and Social Institutions* Helen Rose Ebaugh, 2007-10-23 *Handbook for Religion and Social Institutions* is written for sociologists who study a variety of sub disciplines and are interested in recent studies and theoretical approaches that relate religious variables to their particular area of interest The handbook focuses on several major themes Social Institutions such as Politics Economics Education Health and Social Welfare Family and the Life Cycle Inequality Social Control Culture Religion as a Social Institution and in a Global Perspective This handbook will be of interest to social scientists including sociologists anthropologists political scientists and other researchers whose study brings them in contact with the study of religion and its impact on social institutions *Standards Matter* Katherine Scheidler, 2017-05-01 While critics rail against Common Core State Standards for national school learning guides few know exactly what these Standards are and fewer can assess if these Standards are a positive step for education Standards are simply the high level literacy skills and understandings that have been traditionally taught but only in some schools and for some students Standards focus on careful close reading and critical analysis help students develop ideas well in writing boost research understandings create skills to discern and write valid argument spark creative writing and release ability to learn

on one's own for continued success in life and to help bring a brighter future to all students Do these Standards dumb down learning Do they stifle teachers creativity and independence Are they a low ceiling straitjacket for teachers Are bubble tests poor tests Are Standards unfair for urban and traditionally underperforming students In this brief volume the author spells out each Reading and Writing Standard to show that the Common Core State Standards simply guide high level achievement for all students invite teacher innovation and creativity and make school a more exciting place of learning The national tests include extensive writing and evaluate the understanding of ideas These Standards and tests ask students to investigate and learn to make their own decisions as we all should based on evidence The evidence provided here sheds light on excellent guides to help each child succeed Common Core State Standards are an opportunity to develop a common national base of high quality learning We must seize this chance to raise the bar in American education *Religion in Sociological*

Perspective Keith A. Roberts, David Yamane, 2020-07-15 Religion in Sociological Perspective introduces students to the systems of meaning structure and belonging that make up the complex social phenomena we know as religion Authors Keith A Roberts and David Yamane use an active learning approach to illustrate the central theories and methods of research in the sociology of religion and show students how to apply these analytical tools to new groups they encounter **"The Place is Too Small for Us"** R. P. Gordon, 1995 The title of this volume is of course taken from 2 Kgs 6:1 where the prophetic group about Elisha point out that their accommodation is too cramped It seemed an apt comment on the capacity of any proposed volume to house and adequate representation of the work that has recently been done on Israelite prophecy To this I now have to add the all too ironic confession that the so called pre classical prophets including Elisha and his colleagues could not be accommodated in the present volume Let no one complain about being misled by the subtitle when the title is so honest there are thirty six items of varying length and they divide almost equally between journal articles and excerpts from volumes some of these of composite authorship Naturally they represent one individual's selection from within his personal reading and this itself accounts for only a fraction of the vast scholarly output on the prophets whether since 1875 or since 1975 It will be apparent at several places in the volume that I take with great seriousness the study of Near Eastern non Israelite prophecy as background to the Israelite phenomenon so that the first short section The Near Eastern Background was unavoidable Editor's preface American Higher Education Transformed, 1940--2005 Wilson Smith, Thomas

New Threats to the Academy **Apostolicity Then and Now** John J. Burkhard, 2015-05-15 Apostolicity Then and Now explores apostolicity from its origin to today Apostolicity is a fundamental mark of the church referring to Jesus faith given to carried on and taught unaltered by a continuous line of apostles This book primarily focuses on how apostolicity pertains to the church as a whole and views apostolic succession in light of how apostolicity is applicable to the church Scriptural historical theological and ecumenical contexts provide a thorough study that includes worldviews and their impact on apostolicity Chapters are Who Were the Apostles Why the Early Churches Understood Themselves as Apostolic Apostolicity in History Apostolicity and the Theologians Apostolicity and the Classical and Modern Worldviews Apostolicity in a Postmodern World Apostolicity in Ecumenical Dialogue and Apostolicity in an Ecumenical Church God-creature-revelation Jerry D. Korsmeyer, 1995 Educated Western Christians seek to understand the scientific basis of evolution as well as to justify why a God worth worshiping can be responsible yet not indictable for evil The author creates an innovative theological framework that addresses these concerns and provides part of a structure for fundamental theology which is based on the neoclassical metaphysics of Charles Hartshorne and the speculative cosmology of Alfred North Whitehead His model of the divine has three basic principles God is love God is the creator and this creativity is an integral part of divine essence From this model he develops a fundamental theology which focuses on the nature of divinity the interaction between human and the divine and divine revelation He attributes much of his own concept of revelation to Whitehead's model in which revelation is indicative of a successful communion between human and divine This revelation is achieved through symbolic mediation and it is as much inter personal reconciliation as it is a universal resonance of the creative essence between heaven and earth This framework shows initial agreement with Christian traditions it is highly coherent universal in scope and most importantly it has rich potential for future Christian understanding New Paradigms for Bible Study Robert M. Fowler, Edith Blumhofer, Fernando F. Segovia, 2004-06-03 Provides an overview of various models of reading the Bible in the Third Millennium **Rational Choice Theory and Religion** Lawrence A. Young, 2016-04-29 Rational Choice Theory and Religion considers one of the major developments in the social scientific paradigms that promises to foster a greater theoretical unity among the disciplines of sociology political science economics and psychology Applying the theory of rational choice the theory that each individual will make her choice to maximize gain and minimize cost to the study of religion Lawrence Young has brought together a group of internationally renowned scholars to examine this important development within the field of religion for the first time **Religion, Spirituality and Healthcare** Peter Roche de Coppens, 2007-05-16 The present work constitutes the most important work written by Dr Roche de Coppens during his long career as an author In it he has brought together his deepest and longest lasting interests religion spirituality and healthcare in a new theoretical perspective that sheds much light on each of these disciplines and which relates them in an evolutionary perspective Many of the conflicts oppositions paradoxes and contradictions that pitted various approaches within each field

and between these fields are now explained and integrated Thus allopathy psychosomatic integrative and spiritual medicine can now be reconciled as can religion spirituality rationalism materialism and the New Age The key is the level of consciousness and being of the involved person It is only at the 5th level of consciousness and being that one can reconcile these and bring one in addition to the others rather than having to choose between one or the other *Will Our Children Have Faith?* John H. Westerhoff, 2012-08 Originally written in 1976 revised in 200 and translated in six languages this classic critique of Christian education is newly revised and expanded and includes Westerhoff s overview and perspective on the state Christian education over the past forty years plus his role in that history According to Westerhoff instead of guiding faith formation within the family the church and the school we relegate religious education to Sunday morning classes There children learn the facts about religion but how will they learn or experience faith How can we nourish and nurture the faith of children instead of only teaching the facts
