liberation in post Ferguson America across activism Black radical theory communicative situations cinema and street art Across each arena of American culture his orientation toward the liminal unsettles the supposed cyclical nature of icons iconoclasm by demonstrating that theories and practices of Black radical disruption always reflect both Black radical excess and the iconographic residues of Western Man Those residues do not preclude those theories practices from teaching us important lessons they are how those lessons are learned to evolve our theories and practices of Black radical disruption Institutional capture is neither simply inevitable just as no movement person or idea will be totally immune to Western Man s racial icons Thus Black iconoclasm eschews purity politics and the pursuit of epistemological closure in favor of a critical orientation toward ritual transgression and Black radical discernment Reframing iconoclasm in this way Athanasopoulos opens avenues for new approaches to the relationship between Black resistance and the co option of that resistance
