received ideas about sentimental art Countering its association with trite and saccharine Victorian kitsch she argues that major American artists from John Trumbull and Charles Willson Peale in the eighteenth century and Asher Durand and Winslow Homer in the nineteenth to Henry Ossawa Tanner and Frank Lloyd Wright in the early twentieth produced what was understood in their time as sentimental art art intended to develop empathetic bonds and to express or elicit social affections including sympathy compassion nostalgia and patriotism Cultivating Transformative Reconciliation Line Merethe

Skum,John Klaasen,Bernd Krukpa,Raymond C. Aldred,2024-10-29 Are Truth and Reconciliation Commission processes enough to achieve reconciliation This volume discusses issues that arise once the task of reconciliation emanates from the limited scope of a specific Truth and Reconciliation Commission and into the larger society and political system that originated it Scholars spanning several research fields from law to history to theology discuss how transformative reconciliation can be cultivated in a society using decolonization and other perspectives along three lines by specifying transformative issues and processes in law and politics by criticizing historical perspectives on the past and its concepts as deliberations of the status quo and by instilling the inherent dynamics of truth and reconciliation processes as permanent features within broader society The volume embarks on an investigation of the Norwegianization policy a historical framework that brought injustices upon minority groups such as the S mi and Kvens Norwegian Finns in Norway and parallel groups in Sweden and Finland It extends its exploration to analogous unjust policies in South Africa Canada and various other contexts Within the complex web of cultural social political and economic struggles stemming from colonial policies the roles of religion politics research institutions and civil society are critically examined *Advances in Experimental Social Psychology*,2015-01-08 *Advances in Experimental Social Psychology* continues to be one of the most sought after and most

The Politics of Ephemeral Digital Media Sara Pesce, Paolo Noto, 2016-05-26 In the age of complex Tv of social networking and massive consumption of transmedia narratives a myriad short lived phenomena surround films and TV programs raising questions about the endurance of a fictional world and other mediatized discourse over a long arc of time The life of media products can change direction depending on the variability of paratextual materials and activities such as online commentaries and forums promos and trailers disposable merchandise and gadgets grassroots video production archives and gaming This book examines the tension between permanence and obsolescence in the production and experience of media byproducts analysing the affections and meanings they convey and uncovering the machineries of their persistence or disposal Paratexts which have long been considered only ancillary to a central text interfere instead with textual politics by influencing the viewers fidelity or infidelity to a product and affecting a fictional world's life expectancy Scholars in the fields of film studies media studies memory and cultural studies are here called to observe these byproducts temporalities their short form and or long temporal extension their nostalgic politics or future projections and assess their increasing influence on our use of the past and present on our temporal experience and consequently on our social and political self positioning through the media

The Nature of Church Camp Christopher W. Anderson,2023-12-18 The Nature of Church Camp An Environmental History of Outdoor Ministry 1945 1980 by Christopher W Anderson explores the mid twentieth century history of religious camps and retreat centers to provide new insights into the history of environmentalism in the United States Ecumenical Protestantism and the ecology movement both changed the calculus of American morality after World War II Through archival material case study visits and oral histories Anderson finds that these institutions often reacted to ecological critiques with temperate but gradual reforms However camps and outdoor ministries by virtue of their natural settings and sizable acreage soon provided a new way to explore the history of spirituality and ecology moving away from the conference campus and using nostalgia for the frontier instead to make arguments about the meaning of the American nation and the value of democracy This new way of thinking was reflected throughout the camps and enthusiastically endorsed decentralized small group

camping By examining the conduct of church camps and conferences before during and after the ecological era Anderson shows how environmental stewardship became the dominant paradigm for Protestant environmentalism why that is a flawed and fractious model and why it has stalled

Collective Memory Narratives in Contemporary Culture Antonella Pocecco,Estrella Gualda,Emiliana Mangone,2023-11-27 Starting from the central importance of memory in contemporary societies this book encourages a transdisciplinary reflection on how the presentification of the past is never a simple reenactment but corresponds to the interaction between memory and cultural sensitiveness present beliefs and needs expectations and forecasts for the future It studies cultural re construction through collective stories including academic debates media narratives collective mobilizations state narratives of history architectural reconstructions and artistic expressions It looks at how technological innovations have profoundly changed the practices of conservation and dissemination of collective memory with particular reference to cultural digitization Finally it shows that the relevance and selection of events the organization of connections and cross references between past present and future as well as the importance of diversified collective imaginaries are the keys to narrative constructions of memory that prove to be sensitive and decisive for its continuity and its intergenerational transmission This interdisciplinary collection is for students and scholars of the social sciences cultural studies and the humanities interested in memory studies

Nostalgic Design William C. Kurlinkus,2019-01-09 Nostalgic Design presents a rhetorical analysis of twenty first century nostalgia and a method for designers to create more inclusive technologies Nostalgia is a form of resistant commemoration that can tell designers what users value about past designs why they might feel excluded from the present and what they wish to recover in the future By examining the nostalgic hacks of several contemporary technical cultures from female software programmers who knit on the job to anti vaccination parents Kurlinkus argues that innovation without tradition will always lead to technical alienation whereas carefully examining and layering conflicting nostalgic traditions can lead to technological revolution

The Juggler of Notre Dame and the Medievalizing of Modernity. Jan M. Ziolkowski,2018-07-24 This ambitious and vivid study in six volumes explores the journey of a single electrifying story from its first incarnation in a medieval French poem through its prolific rebirth in the nineteenth and twentieth centuries The Juggler of Notre Dame tells how an entertainer abandons the world to join a monastery but is suspected of blasphemy after dancing his devotion before a

statue of the Madonna in the crypt he is saved when the statue delighted by his skill miraculously comes to life Jan Ziolkowski tracks the poem from its medieval roots to its rediscovery in late nineteenth century Paris before its translation into English in Britain and the United States The visual influence of the tale on Gothic revivalism and vice versa in America is carefully documented with lavish and inventive illustrations and Ziolkowski concludes with an examination of the explosion of interest in The Juggler of Notre Dame in the twentieth century and its place in mass culture today Volume 2 Medieval Meets Medievalism deals with the influence of the tale in nineteenth and early twentieth century Europe and America and the development of literary medievalism at this time The Juggler of Notre Dame and the Medievalizing of Modernity is a rich case study for the reception of the Middle Ages in modernity Spanning centuries and continents the medieval period is understood through the lens of its post modern reception in Europe and America Profound connections between the verbal and the visual are illustrated by a rich trove of images including book illustrations stained glass postage stamps architecture and Christmas cards Presented with great clarity and simplicity Ziolkowski s work is accessible to the general reader while its many new discoveries will be valuable to academics in such fields and disciplines as medieval studies medievalism philology literary history art history folklore performance studies and reception studies

Rhetoric and Ethics in the Cybernetic Age Jeff Pruchnic, 2013-08-15 It has become increasingly difficult to ignore the ways that the centrality of new media and technologies from the global networking of information systems and social media to new possibilities for altering human genetics seem to make obsolete our traditional ways of thinking about ethics and persuasive communication inherited from earlier humanist paradigms This book argues that rather than devoting our critical energies towards critiquing humanist touchstones we should instead examine the ways in which media and technologies have always worked as crucial cultural forces in shaping ethics and rhetoric Pruchnic combines this historical itinerary with critical interrogations of diverse cultural and technological sites the logic of video games and artificial intelligence the ethics of life extension in contemporary medicine the transition to computer automated trading in world stock markets the state of critical theory in the contemporary humanities along with innovative analyses of the works of such figures as the Greek Sophists Kenneth Burke Martin Heidegger Michel Foucault Friedrich Nietzsche and Gilles Deleuze This book argues that our best strategies for crafting persuasive communication and producing ethical relations between individuals will be those that creatively replicate and appropriate rather than resist the logics of dominant forms of media and technology
