Future Aspects In Contraception Pt Ii Female Contraception:

Female Contraception Benno Runnebaum, Thomas Rabe, Ludwig Kiesel, 2012-12-06 Contraceptives have always provided ground for controversy This book describes and discusses latest findings concerning the advantages as well as hazard and risk factors of contraception The clinical impact of oral contraceptives on metabolism is particularly highlighted In addition behavioral methods intrauterine devices implants and modern approaches in animal and clinical research in the field of immunization against pregnancy are considered Last but not least the book summarizes the complex ethical religious and political aspects of family planning and contraception

Ethical Approaches to Family Planning in Africa Fred T. Sai, K. Newman, 1989 *LHRH and Its Analogs* B.H. Vickery, J.J. Nestor, 2012-12-06 Since the discovery of LHRH in 1971 research into the physiology and therapeutics of this compound can be divided into three distinctly different phases In the first phase attention was paid chiefly to the natural sequence hormone efforts were channeled to explore its diagnostic use and nearly all the clinical investigations were coordinated by a single pharmaceutical company The successes in this area were quite limited and the interest in the promise of this agent as a diagnostic test has long since waned This phase of research consumed roughly the first seven years of clinical testing after the isolation and characterization of the compound by the two groups involved in the Nobel effort With the appearance of long acting LHRH agonists the second phase of research on LHRH began in the late 70 s LHRH agonists were the only compounds available during this period of research and paradoxical desensitization was the predominant therapeutic basis for the discoveries An ever widening number of therapeutic applications using this approach were unearthed A second theme which emerged during this second 5 7 year period was that the pulsatile administration of the natural sequence LHRH could be used to treat LHRH deficiency in men and women

Cwiak,2014-09-03 Women with chronic medical problems are at higher risk for complications during pregnancy and therefore they are especially in need of appropriate preconception and contraception care Furthermore many women with chronic medical problems do not obtain adequate preconception and contraception care Despite published guidelines by the Centers for Disease Control and Prevention there is a substantial gap in medical practice regarding the use of contraception in women with co existing medical problems Contraception for the Medically Challenging Patient fills the gap that currently

exists in the knowledge of correct contraceptive prescribing practice and shows that inappropriate contraindications can easily become a barrier to effective contraception use among women Chapters highlight obsolete views about appropriate candidates for contraception and address the complex contraceptive needs of today's medically challenging patients with HIV AIDS uterine fibroids or cardiac neurologic or thyroid disease The book gives attention to recommendations on the use of contraception in women with medical problems such as diabetes obesity epilepsy and lupus among others and provides comprehensive information regarding the effects that certain drugs may have on contraceptive hormone levels While national guidelines do exist for contraceptive eligibility this book discusses in more detail the evidence behind the guideline recommendations and the nuances that clinicians confront in daily practice Population Sciences ,1977 **Cumulated Index Medicus** ,1975 *Coerced Contraception?* Ellen H. Moskowitz,Bruce Jennings,1996-09-13 Long acting and reversible contraceptives such as Norplant and Depo Provera have been praised as highly effective moderately priced and generally safe Yet as this book argues the very qualities that make these contraceptives an important alternative for individual choice in family planning also make them a potential tool of coercive social policy For example policymakers have linked their use to welfare benefits and judges to probation agreements In this book authors from the fields of medicine ethics law and the social sciences probe the unique and vexing ethical and policy issues raised by long acting contraception The book offers comprehensive ethical guidelines for health care professionals and policymakers as well as an ethical framework for analyzing policies and practices concerning long acting contraceptives The authors consider cultural social and ethical issues pertaining to contraception and they provide historical and scientific background on today's controversies They explore alternative conceptual and theoretical frameworks including analyses of autonomy coercion and responsibility in reproductive decisions This volume also notes the special concerns that arise when policies promoting long term birth control target low income women and women of color and when these contraceptives are used in developing countries

Bibliography of Medical Reviews ,1976 **Contraception** Paula Briggs,Gabor Kovacs,2013-07-11 Planned parenthood and its associated reproductive and sexual healthcare issues has massive socioeconomic and demographic consequences worldwide Modern contraception played a major role in the emancipation of women and has huge potential for a sustainable future world population Yet it is a medical topic which always raises controversy with serious ethical religious and cultural overtones This is an authoritative guide for all those working in reproductive healthcare Highly practical evidence based with enough detail to inform effective clinical practice the book is structured on a lifestage approach mirroring everyday experience of practitioners All forms of contraceptives are covered in detail with guidance on prescribing the advantages and disadvantages of various techniques and possible complications The wider field of reproductive healthcare including subfertility and sexual assault are also covered An ideal guide to contraception for trainees in obstetrics and gynaecology primary care physicians and nurse practitioners **People** ,1987 Directory of Published Proceedings
