Future Nothingness Already:

Being and Nothingness Jean-Paul Sartre, 1992 Sartre explains the theory of existential psychoanalysis in this treatise on human reality *Nothingness* Jytte Bang, 2017-07-05 This book addresses nothingness as not only the intangible presence of an emotional cultural social or even political void that is felt on an existential level but has some solid foundations in reality The death of a loved one the social isolation of an individual or the culture shock one may experience in another country are examples of situations in which an external sense of absence mirrors an internal psychological and philosophical sense of nothingness Not much has been explicitly written on nothingness in the history of psychology On the other hand nothingness seems to be implicitly embedded in many scholars work This duality of explicitly and implicitly expressed ideas about nothingness reveals how psychology finds inspiration in philosophy and vice versa The book aims to illustrate how the concept of the presence of absence nothingness fills a void in contemporary psychological theorizing **The**

Existentialist's Guide to Death, the Universe and Nothingness Gary Cox, 2011-11-17 *The Existentialist's Guide to Death the Universe and Nothingness* is an entertaining philosophical guide to life love hate freedom sex anxiety God and death a guide to everything and nothing Gary Cox bestselling author of *How to Be an Existentialist* and *How to Be a Philosopher* takes us on an exciting journey through the central themes of existentialism a philosophy of the human condition *The Existentialist's Guide* fascinates informs provokes and inspires as it explores existentialism's uncompromising view of human reality It leaves the reader with no illusions about how hard it is to live honestly and achieve authenticity It has however a redeeming humour that sets the wisdom of the great existentialist philosophers alongside the wit of great musicians and comedians A realistic self help book for anyone interested in personal empowerment *The Existentialist's Guide* offers a wealth of profound philosophical insight into life the universe and everything **The Meaning of Mourning** Mikolaj

Slawkowski-Rode, 2023-01-09 Grief is a universal human response to death and loss Mourning is an equally universally observable practice that enables the bereaved to express their grief and come to terms with the reality of loss Yet despite their prevalence there is no unified understanding of the nature and meaning of grief and mourning *The Meaning of Mourning Perspectives on Death Loss and Grief* brings together fifteen essays from diverse disciplines addressing the topics of death grief and mourning The collection moves from general questions concerning the putative badness of death and the meaning of loss through the phenomenology and psychology of grief to personal and cultural aspects of mourning Contributors examine topics such as theodicy and grief reproductive loss mourning as a form of recognition of value the roots of grief in early childhood grief in COVID times hope phenomenology of loss public commemoration and mourning rituals mourning for a devastated culture the Necropolis of Glasgow and the art of outliving Edited by Mikolaj Slawkowski Rode the volume provides a survey of the rich topography of methodologies problems approaches and disciplines that are involved in the study of issues surrounding loss and our responses to it and guides the reader through a spectrum of perspectives

highlighting the connections and discontinuities between them *If Auschwitz is Nothing* Donatella Di Cesare, 2023-03-03 Ever since the end of World War II when the sheer enormity of the Nazi crime against the Jews became apparent there have been repeated attempts to deny that the Holocaust really happened The existence of gas chambers was questioned and the testimony of survivors was thrown into doubt the more witnesses spoke out the more they were intimidated and attacked by a denialism that sought to present itself as a search for historical truth The accusation of trickery and deception so central to the centuries old anti Jewish hatred continues to thrive in the present Today denialism takes a new and more insidious form Jews are accused of exploiting the cult of the Holocaust to justify the state of Israel and to take the reins of political power Holocaust denial has merged with conspiracy theories alleging the existence of a Jewish controlled New World Order Concisely and authoritatively acclaimed philosopher Donatella Di Cesare reconstructs the evolution of denialism and sheds new light on one of the most troubling phenomena of our time **Philosophy as Metanoetics** Hajime Tanabe, 1986 Tanabe's agenda was not religious but philosophical in that he tried to integrate Eastern and Western insights in order to acquire a cross cultural philosophical vision for the post war world community This book shows his superior philosophical originality It is high time that Tanabe's thought should be introduced to the West Joseph Kitagawa University of Chicago The Metaphysics of Terror Rasmus Ugilt, 2014-03-13 This groundbreaking study aims to provide a philosophical analysis of the phenomenon of terror in particular the political reactions to it such as public anxiety and pre-emptive wars and to re-articulate the understanding of metaphysics through a consideration of its political implications The book reveals that the key feature of terror is potentiality that is terror is always about what could happen as opposed to what is likely to happen This notion helps broaden the scope of the investigation as the argument spans the ontology political psychology political cosmology and political theology of terror Each chapter begins with an empirical discussion examining such topics as the political practices in reaction to terror the politics of fear warfare sovereignty and the debates about the state of exception in relations to anti terrorism laws This unique examination of our political reality uncovers the axiom of terrorism namely its potentiality Going beyond the scope of terrorism studies it explains the philosophical underpinnings of terror without compromising on the empirical facts drawn from policymaking jurisprudence and related fields **Oppression and the Human Condition** Thomas Martin, 2002 *Oppression and the Human Condition* is both a valuable teaching tool and an insightful addition to scholarship on the philosophy of Jean Paul Sartre Students and teachers will find it an excellent and accessible introduction to Sartre's existentialism ideal for courses in existentialist and 20th century philosophy Equally Sartre scholars will find that the book especially the sections on oppression and bad faith gives them much to think about Author Thomas Martin applies Sartre's philosophy to contemporary issues and concerns and draws on two case studies to make his point The cases examine modern day oppressors in one case an anti-semite in the other a sexist who objectifies women in the context of Sartre's bad faith The case studies also reinforce Martin's argument that Sartre's early philosophy

especially his concept of bad faith provides a framework for discussions of oppressions such as racism and sexism **A New Reading of Jacques Ellul** Jacob Marques Rollison, 2020-09-10 This book presents an original and dynamic reading of the twentieth century French sociologist and theological ethicist Jacques Ellul Adopting Ellul's use of presence as a hermeneutical key to understanding his work it examines the origins of Ellul's approach to presence in his readings of Kierkegaard and the biblical book of Ecclesiastes highlights the central structural role of presence in Ellul's theological ethics and elucidates a crucial turning point in Ellul's theology following a personal crisis in Ellul's faith and life Drawing from numerous unpublished and untranslated texts Jacob Marques Rollison argues that this crisis involves confrontation with a critique of presence manifest in Ellul's reading of and engagement with Michel Foucault Marques Rollison distills Ellul's sociological critiques and theological responses to this crisis presenting Ellul's evolving theology against the background of major shifts in French intellectual life In doing so the author simultaneously calls for renewed engagement with Ellul's prophetic thought critically appraises Ellul's dialectical theology and Marxist inheritances and develops a robustly Protestant approach to theological communication ethics for our time *The Spirits' Book* Allan Kardec, **Nothingness, Metanarrative, and Possibility** William E. Marsh, 2009-08-14 What is the solution to human angst and nothingness the gnawing emptiness and frustration with the limits and fragility of this present existence After reviewing the work of Søren Kierkegaard Friedrich Nietzsche Martin Heidegger and Jean Paul Sartre on this question this work argues that the proper response must be metaphysical metanarrative a transcendent metaphysical metanarrative that is the ground of all that is yet a metaphysical metanarrative that makes the fullness of meaning available and apprehensible in physical experience This metanarrative this work asserts is the logos the ultimate referent principle of the ancient Greeks and according to Christianity the God-man Jesus Christ the eternal become present in present experience Because the logos constitutes transcendence in human form it recognizes the beauty of existential experience even as it underscores the necessity of transcendence for temporal meaning The logos as metaphysical metanarrative brings the worlds of time and eternity together linking earth and the beyond in a seamless whole It is the ultimate existential experience In the Throes of Wonder Jerome A. Miller, 1992-01-01 This book is a meditation on the experiences of wonder horror and awe and an exploration of their ontological import It argues that these experiences are not as our culture often presumes merely subjective emotive responses to events that happen in the world Rather they are transformative experiences that fracture our ordinary lives and in so doing provide us access to realities of which we would otherwise be oblivious Wonder horror and awe like the experiences of love and death to which they are so intimately related are not events that happen in our world but events that happen to it and thus alter our life as a whole Miller explores the impact of that transformation its deconstructive effect on our ordinary sense of our selves and the breakthrough to a new understanding of being which it makes possible **From Insanity to Ecstasy** Thomas McNeight, 2011-06-01 Description In this book I have shown how it is possible to

move from insanity even into ecstasy I've described what insanity was for me and how I have even had ecstatic times I've questioned what it is and tried to describe what insanity is and shown that it is possible to move into mental wellbeing I have looked into my beliefs on God and the cosmos I've questioned the very foundations of my beliefs And I have posed the question what do we really know about these things I have posited what do we really know about mental illness in this stage of our journey as a race and how to treat it I hope if nothing else to make people think about these things the fundamental notions of nothingness Godliness and our capacity to heal About the Author Tom McNeight lives in Wanganui New Zealand In spite of his diagnosis as a paranoid schizophrenic with the discrimination he has often experienced and the many manual occupations he has had to work at he has lived an interesting and exciting life This includes such adventures as mountaineering parachuting bungy jumping tramping and working in the bush and fishing He has completed many philosophy papers at university and has developed a skill in both writing and painting He continues to enjoy these activities frequently holding painting exhibitions and writing new books His other continuing hobby is fishing

Afterlives: Allegories of Film and Mortality in Early Weimar Germany Steve Choe, 2014-07-31 *Weimar cultural critics and intellectuals have repeatedly linked the dynamic movement of the cinema to discourses of life and animation Correspondingly recent film historians and theorists have taken up these discourses to theorize the moving image both in analog and digital But many important issues are overlooked Combining close readings of individual films with detailed interpretations of philosophical texts all produced in Weimar Germany immediately following the Great War Afterlives Allegories of Film and Mortality in Early Weimar Germany shows how these films teach viewers about living and dying within a modern mass mediated context Choe places relatively underanalyzed films such as F W*

Murnau's *The Haunted Castle* and Arthur Robison's *Warning Shadows* alongside Martin Heidegger's early seminars on phenomenology Sigmund Freud's *Reflections upon War and Death* and Max Scheler's critique of resentment It is the experience of war trauma that underpins these correspondences and Choe foregrounds life and death in the films by highlighting how they allegorize this opposition through the thematics of animation and stasis

A Commentary on Jean-Paul Sartre's *Being and Nothingness* Joseph S. Catalano, 1985-09-15 A Commentary on Jean Paul Sartre's *Being and Nothingness* represents I believe a very important beginning of a deservedly serious effort to make the whole of *Being and Nothingness* more readily understandable and readable In his systematic interpretations of Sartre's book Catalano demonstrates a determination to confront many of the most demanding issues and concepts of *Being and Nothingness* He does not shrink as do so many interpreters of Sartre from such issues as the varied meanings of being the meaning of internal negation and absolute event the idiosyncratic senses of transcendence the meaning of the upsurge in its different contexts what it means to say that we exist our body the connotation of such concepts as quality quantity potentiality and instrumentality in respect to Sartre's world of things or the origin of negation Catalano offers what is doubtless one of the most probing original and illuminating interpretations of Sartre's crucial concept of nothingness to appear in the Sartrean literature Ronald E. Santoni *International Philosophical Quarterly*

Phenomenology in Perspective Smith, 2013-12-11 Phenomenology as one of many ways of philosophizing can be seen from many perspectives And as a body of thought it can be placed in perspective The essays in this book clearly show that there is no one way of doing phenomenology any more than there is any one way to philosophize Phenomenology reveals itself as many faceted and there is work in this field for many talents The fact that there are such varied aspects to the study of phenomenology is what puts it in perspective as a rich source of philosophical thought In the sharing of their various perspectives the authors of these essays discuss the present and future of phenomenology as a philosophical discipline the important subjects of language of interpersonal relations of self awakening of visual and auditory perception and imagination of ethical education The names of Husserl Heidegger and Merleau-Ponty loom large in these essays but Max Scheler's name is also placed in perspective as one of the major phenomenological thinkers thus far not as well known in America as he might be No one claims that the thought of Martin Heidegger is easy to comprehend especially if immediate results are demanded The difficult essays on Heidegger reflect some of the innate complexities of his thought

Dream, Death, and the Self J. J. Valberg, 2018-06-26 Might this be a dream In this book distinguished philosopher J. J. Valberg approaches the familiar question about dream and reality by seeking to identify its subject matter what is it that would be the dream if this were a dream It turns out to be a subject matter that contains the whole of the world space and time but which like consciousness for Sartre is nothing in itself This subject matter the personal horizon lies at the heart of the main topics the first person the self and the self in time explored at length in the book The personal horizon is Valberg contends the subject matter whose center each of us occupies and

which for each of us ceases with death This ceasing to be presents itself solipsistically not just as the end of everything for me but as the end of everything absolutely Yet since it is the same for everyone this cannot be Death thus confronts us with an impossible fact something that cannot be but will be The puzzle about death is one of several extraphilosophical puzzles about the self that Valberg discusses puzzles that can trouble everyday consciousness without any contribution from philosophy Nor can philosophy resolve the puzzles Its task is to get to the bottom of them and in this respect to understand ourselves a task philosophy has always set itself
