

**“In the eighties and nineties, the innovation agenda was exclusively focused on enterprises. There was a time in which economic and social issues were seen as separate. Economy was producing wealth, society was spending. In the 21st century economy, this is not true anymore. Sectors like health, social services and education have a tendency to grow, in GDP percentage as well as in creating employment, whereas other industries are decreasing. In the long term, an innovation in social services or education will be as important as an innovation in the pharmaceutical or aerospace industry.”**
