Education In The 80s Curricular Challenges:

Education in the 80's--curricular Challenges Lois V. Edinger,1981 **Resources in education** ,1988-02 **Reframing the Early Childhood Curriculum** Jane Page,2002-01-04 Pre school children have fundamentally different attitudes towards the future and attendant notions of time and space For this reason early childhood professionals are optimally placed to lay important foundations for young children s long term development Children s flexibility of thought their positive and constructive outlook on life their sense of the continuity of time their creativity and imagination and their sense of personal connection with time and the future are all qualities that should be recognized and addressed in early childhood educational programmes as a means of counteracting the difficulty youths experience in knowing what to expect in their future lives and coming to understand their roles in shaping them Reframing the Early Childhood Curriculum offers fresh insight into examining futurists and early childhood theorists thinking of the relevance of planning for children s long term needs in early childhood identifying the skills attitudes and outlooks required to assist young children attending early childhood programmes in their long term growth and development exploring the means through which these skills attitudes and outlooks can be achieved in curriculum frameworks through specific goals and learning experiences against the background of youth and young children s views of the future A Coherent Curriculum for Every Student Edmund C. Short,2019-10-11 This book exhibits a collection of proposals for how school curriculum may be conceived designed and realized These proposals are drawn from writers both past and present who have presented some particular vision of what curriculum could be like for Pre K 12 schools and have sought to convince others to adopt their proposal for use in some actual school situation The proposals differ from one another in a variety of ways including in their purposes their contents and their perspectives and thus pose a wealth of options for consideration by those who are planning to change their school curriculum to something new and more suitable for their particular clientele Readers will need to weigh the appeal of various proposals presented here against criteria they have for locating an optimum model for their particular situation The proposals selected for inclusion in this book address the whole of the curriculum all levels all subjects all age groups they deal with entire program change rather than with incidental changes in content program arrangements teaching approaches or other limited alterations This book is intended to be a useful resource for those responsible for making decisions in a particular school or school district or at a broader policy making level about what the entire curriculum should be and should include It draws attention to the work of many thoughtful persons who have dealt with the issue of what a coherent curriculum might be like and who in some instances have set up actual programs based on their ideas **Reframing the Early Childhood Curriculum** Jane M. Page,2000 Argues that pre school children have a less apprehensive view of the future than adolescents and that an effective programme in the early years can counteract the difficulties youths experience **National Union Catalog, 1982** ,1983 American Education ,1984 **Curriculum Challenges and Opportunities in a Changing**
