The Emergence of Holocaust Education in American Schools T.

Fallace,2008-03-31 Interest by American educators in the Holocaust has increased exponentially during the second half of the twentieth century In 1960 the Holocaust was barely being addressed in American public schools Yet by the 1990s several states had mandated the teaching of the event Drawing upon a variety of sources including unpublished works and interviews this study traces the rise of genocide education in America The author demonstrates how the genesis of this movement can be attributed to a grassroots effort initiated by several teachers who introduced the topic as a way to help their students navigate the moral and ethical ambiguity of the times

Democracy's Angels Kristina R. Llewellyn,2012 A groundbreaking

study of the limits that democratic ideals placed on the work of women teachers

Changing the Course of Failure

Sandra Stotsky,2018-05-18 The basic purpose of this book is to help policy makers at all levels of government understand that 1 widespread adolescent underachievement is not susceptible to solution by educational interventions no matter how much money is allocated to public education and 2 there are unidentified educational and civic costs to focusing on low achievement and to expecting public institutions of education for K 12 and college to solve a growing social problem Many policy makers seem to think that teachers schools are the primary cause of low achievement Educational institutions still cannot solve a non education caused problem and haven t done so for over fifty years despite all the public and private money that has been allocated The book concludes with suggested policies for addressing the damage to public education from gap closing standards and with suggested areas for policy making in order to change the current course of failure for many low achieving students

Shaping the Future Horst Hutter,2006-01-01 Shaping the Future maps out the ascetic

practices of a Nietzschean way of life Hutter argues that Nietzsche s doctrines are attempts and temptations that aim to provoke his free spirited readers into changing themselves by putting philosophy into practice in their lives

The U.S.

Technology Skills Gap Gary J. Beach,2013-07-10 Is a widening skills gap in science and math education threatening America s future That is the seminal question addressed in *The U S Technology Skills Gap* a comprehensive 104 year review of math and science education in America Some claim this skills gap is equivalent to a permanent national recession while others cite how the gap threatens America s future economic workforce employability and national security This much is sure America s math and science skills gap is or should be an issue of concern for every business and information technology executive in the United States and *The U S Technology Skills Gap* is the how to get involved guidebook for those executives laying out in a compelling chronologic format The history of the science and math skills gap in America Explanation of why decades of astute warnings were ignored Inspiring examples of private company efforts to supplement public education A pragmatic 10 step action plan designed to solve the problem And a tantalizing theory of an obscure Japanese physicist that

suggests America's days as the global scientific leader are numbered Engaging and indispensable The U S Technology Skills Gap is essential reading for those eager to see America remain a relevant global power in innovation and invention in the years ahead

The Rebirth of the West Peter Duignan, Lewis H. Gann, 1996 The years following World War II witnessed perhaps the greatest success story in Western history the economic and political recovery of European democracies that had been devastated by the cataclysmic war Peter Duignan and L H Gann convincingly demonstrate that the deep involvement of the United States was a key factor in this success The Rebirth of the West is a broad narrative analysis of every important aspect of Western society during this formative period political economic social cultural and scientific In addition to providing an interpretive synthesis of the vast literature on the subject the authors make an important and original contribution to both the historical record of this period and current debates over the future of Europe Wisconsin Elementary Teacher Education Project University of Wisconsin. The World We Created at Hamilton High Gerald Grant, 1988 In this wonderfully evocative picture of an urban American high school and its successes and setbacks over the past thirty five years Gerald Grant works out a unique perspective on what makes a good school one that asserts moral and intellectual authority without becoming rigidly doctrinaire or losing the precious gains in equality of opportunity that have been won at great cost Grant describes what happened inside Hamilton High a real school although its identity is disguised and how different worlds evolved as the

school's authority system was transformed. After the opening of Hamilton High in the buoyant and self-confident 1950s, the school plunged into a period of violence and radical deconstruction in the late sixties. Grant charts the rise of student power in the seventies followed by new transformations of the school in the last decade occasioned in part by the mainstreaming of disabled students and the arrival of Asian immigrants. Things got very bad before they got better, but they did get better. The school went from white power to black power to genuine racial equality. Its average test scores declined and then improved. Although test score means did not return to their former levels, the gap in achievement between the social classes decreased. Violence was replaced by a sense of relative safety and security. Yet this book is not just a case study. In the second half, the author presents a general analysis of American education. He contrasts the world of Hamilton High with other possible worlds, including those at three schools, one public and two private, that exhibit a strong positive ethos. He looks at the way the moral and intellectual worlds have been sundered in many contemporary public schools and asks whether they can be put back together again. The book is grounded in a creative methodology that includes research by students at Hamilton High, whom Grant trained to analyze life in their school. Later, he shared this research with teachers as a means of opening a dialogue about what changes they wanted to make. Grant's analysis leads to recommendations for two essential reforms, and in an epilogue, the teachers who read this book also tell us what they make of it and offer their own conclusions. Their challenging final words will spur the thinking of educators, policymakers, scholars, parents, and all those who are concerned about our schools today.

Encyclopedia of the Social and Cultural Foundations of Education: A-H ; 2, I-Z ; 3, Biographies, visual history, index Eugene F. Provenzo, John P. Renaud, Asterie Baker Provenzo, 2009. The Encyclopedia provides an introduction to the social and cultural foundations of education. The first two volumes consist of A-Z entries featuring essays representing the major disciplines, including philosophy, history, and sociology, and a third volume is made up of documentary, photographic, and visual resources.

Topics in Education Bernard J. F. Lonergan, 1993-01-01. Bernard Lonergan devoted much of his life's work to developing a generalized method of inquiry, an integrated view which would overcome the fragmentation of knowledge in our time. In *Topics in Education*, Lonergan adapts that concern to the practical needs of educators. Traditionalist and modernist notions of education are both criticized. Lonergan attempts to work out in the context of the human good and the new learning the rudiments of a philosophy of education based on his well-known discovery of norms in the unfolding of intelligent, reasonable, and responsible consciousness. He explores how the scientific revolution has changed ways of understanding reality and examines the implications of this revolution for education. *Topics in Education*, the first publication of his 1959 lectures, follows Lonergan on his early explorations of human development, studies the theories of Jean Piaget and others, and concludes with his own original ideas in the realms of ethics, art, and history. Bernard Lonergan, 1904-1984, a professor of theology, taught at Regis College, Harvard University, and Boston College. An established author known for his *Insight and Method in Theology*, Lonergan received numerous honorary doctorates and was a Companion of the

Order of Canada in 1971 and was named as an original members of the International Theological Commission by Pope Paul VI
