What is Religious Education.

Religious education is the practice of teaching children about and learning from religious beliefs and principles. It can be found in public and private schools around the world. The purpose of religious education is to teach children about their own religion, as well as those of other religions, through lessons on history, morality, and the Bible.

The benefits of religious education are evident in every sphere of life. When students learn about their own religion and the beliefs of others, they will be better equipped to navigate today's society. They will also be more likely to hold positive opinions about religious groups and individuals when compared to those who do not have a religious background.

What are the Benefits of Religious Education?

There are several benefits that attend to when someone learns about their religion through educational means. Some key benefits include:

- understanding one's own faith – This ability to better understand one's own faith can lead to a stronger connection with God or other spiritual entities.

Religious Education in a Plural, Secularised Society. A Paradigm Shift Leni Franken, Patrick Loobuyck, 2011 Many European societies are characterised by increasing forms of secularisation and religious diversity This results in a paradigm shift with regard to religious education For a long time the main aim of religious education was clearly to educate children in their own religious tradition Today the aims of religious education are much broader contributing to pupils general education Allgemeinbildung and preparing them for participation as a citizen in the future multicultural society As a result the following question arises in many countries how can teaching into religion be transformed into or complemented by learning about and learning from the study of religions This book brings several distinguished authors in the field of religious education together to reflect on this paradigm shift The book is divided into two parts The first part is rather descriptive and gives an informative and up to date overview of the different discussions about religious education in several European countries The second part is a normative reflection on the question of how religious education should be organised in plural secularised societies This book is very important for the discussion about religious education Its comparative approach combined with the interdisciplinary dialogue between the different schools in the field of religious education make this book highly recommendable for everyone who is interested in the state of the art and the future of religious education in Europe Didier Pollefeyt full professor in theology and religious education at the Catholic University of Leuven

Religious Education in a Pluralist Society John Edwards, Peter R. Hobson, 2019-07-12 Religious education in liberal pluralist societies such as the UK the USA and Australian underwent radical change in the 1980s and 1990s with a major shift towards multi faith educationally oriented programmes This has meant significant modifications to both the content and the methodology of religious education courses and to the way they are conceived of and taught in schools and universities One important implication of this change for the teaching and study of religion today is the need for a philosophical dimension

that deals with issues such as the truth status of religious statements and the moral acceptability of religious claims This dimension is often insufficiently developed this lack is made more critical by the multiple competing truth claims of various religions giving rise to such contentious problems as the growth of fundamentalism increasing religious intolerance and conflict and differences of opinion on central moral problems such as birth control abortion and euthanasia This text attempts to provide the philosophical underpinning that the study and teaching of religion in modern societies requires

Philip Barnes, 2014-02-05 In this thoughtful and provocative book Philip Barnes challenges religious educators to re think their field and proposes a new post liberal model of religious education to help them do so His model both confronts prejudice and intolerance and also allows the voices of different religions to be heard and critically explored While Education Religion and Diversity is directed to a British audience the issues it raises and the alternative it proposes are important for those educators in the United States who believe that the public schools have an important role in teaching students about religion Walter Feinberg Professor Emeritus of Education Policy Organization and Leadership at the University of Illinois Urbana Champaign Philip Barnes offers a penetrating and lucid analysis of the strengths and weaknesses of modern religious education in Britain He considers a range of epistemological and methodological issues and identifies two contrasting models of religious education that have been influential what he calls a liberal and a postmodern model After a detailed review and criticism of both he outlines his own new post liberal model of religious education one that is compatible with both confessional and non confessional forms of religious education yet takes religious diversity and religious truth claims seriously Essential reading for all religious educators and those concerned with the role of religion in schools Bernd Schr der Professor of Practical Theology and Religious Education University of G ttingen What place if any does religious education have in the schools of an increasingly diverse society This lucid and authoritative book makes an incisive contribution to this crucial debate Roger Trigg is Emeritus Professor of Philosophy University of Warwick and Senior Research Fellow Ian Ramsey Centre Oxford The challenge of diversity is central to education in modern liberal democratic states and religious education is often the point where these differences become both most acute and where it is believed of all curriculum subjects resolutions are most likely to be found Education Religion and Diversity identifies and explores the commitments and convictions that have guided post confessional religious education and concludes controversially that the subject as currently theorised and practised is incapable of challenging religious intolerance and of developing respectful relationships between people from different communities and groups within society It is argued that despite the rhetoric of success which religious education is obliged

to rehearse in order to perpetuate its status in the curriculum and to ensure political support a fundamentally new model of religious education is required to meet the challenge of diversity to education and to society A new framework for religious education is developed which offers the potential for the subject to make a genuine contribution to the creation of a responsible respectful society Education Religion and Diversity is a wide ranging provocative exploration of religious education in modern liberal democracies It is essential reading for those concerned with the role of religion in education and for religious and theological educators who want to think critically about the aims and character of religious education **A**
