**The Ecology and Social Behavior of the Coati, *Nasua Narica*, of Barro Colorado Island, Panama** John H. Kaufmann, 1961 Carnivore Behavior, Ecology, and Evolution John L. Gittleman, 2019-05-15 Because carnivores are at the top of the food chain their status is an important indicator of the health of the world ecosystem They are intensely interesting to zoologists and uniquely intriguing to the general public Devoted primarily to terrestrial carnivores this volume focuses on such themes as carnivore reintroduction programs and the ethics of studying carnivores drawing examples from a variety of species The need to evaluate new conceptual ideas and empirical data inspired this volume of Carnivore Behavior Ecology and Evolution a complement to the original book In the eight years since publication of the first volume conservation has emerged as a thematic imperative The study of carnivores has become even more important in raising and resolving crucial biological problems Differential rates of mortality in the giant panda and other endangered carnivores are now known to influence dispersal and life history patterns basic to these species survival Reintroduction efforts of the black footed ferret and the red wolf are establishing essential guidelines for preservation and management of endangered species Studies of the African lion and the dwarf mongoose illustrate the power of new genetic techniques of DNA fingerprinting for understanding the evolution of social behavior **Social Behavior of Female Vertebrates** Samuel Wasser, 2012-12-02 Social Behavior of Female Vertebrates focuses on the evolution of reproductive behavior in female vertebrates ranging from fish to birds and humans including issues of mate choice and other factors underlying female attitudes toward males It also looks at the evolution of mating systems the co evolution of the sexes sex role reversal reproductive competition between females maternal behavior and how females enhance the investment received by their offspring from others It also considers other social behaviors that influence the nature of affiliative associations between females Organized into three parts encompassing 13 chapters this volume begins with an overview of behavioral biology and sources of variation in female

reproductive success It then discusses the establishment and maintenance of sex biases sex differences mediated by sexual selection constraints on female choice in the mottled sculpin mate choice by females in sexual selection of bird song and female manipulation of male avoidance of cuckoldry behavior in the ring dove The reader is also introduced to the evolution of polyandry in shorebirds reproductive strategies in human females social and health seeking behaviors of Taiwanese women female roles in cooperatively breeding acorn woodpeckers altruism in coati bands cooperation and reproductive competition among female African elephants mate choice in matrilineal macaque groups and reproductive competition and cooperation among female yellow baboons This book is a valuable resource for scientists and behavioral biologists as well as lay people whose interests span a variety of fields      *A Comparison of the Ecology and Behavior of Monkeys and Apes* ,

*Flora of Barro Colorado Island* Thomas B. Croat,1978 Florenwerke Panama      **Ecology and Behaviour of North American Black Bears** Roger A. Powell,John Wayne Zimmerman,David Erran Seaman,1997 What main factors affect mammalian home range size and dynamics To what extent do constraints on home range characteristics vary between the sexes This book aims to address these issues by concentrating the authors expertise and experience in studies of home ranges in general and focusing on their studies of black bears of the Pisgah Forest North Carolina in particular The authors provide an overview of the black bears and methods for their study before discussing concepts of home range developing predictive habitat quality models addressing influences of food production on social organization and exploring the mating behaviour of male bears      **Social Behavior and Communication** P. Marler,2013-03-09 Other books in this series focus on behavior at the individual level approached from the viewpoints of biochemistry anatomy physiology and psychology In this volume we show how the functioning nervous systems of interacting individuals are coordinated with the ultimate creation of complex social structures The intricacies of an individual's nervous system have been subject to intense inquiry and research at the chemical cellular and organ levels has made remarkable progress Work at the social level has been conducted somewhat independently by way of behavioral phenomena and communicative interactions With the emergence of a large body of information from neurobiology the beginnings of an integrated approach are possible New data on social functions are presented in the chapters to follow and the forward looking reader may wish to reflect on how they clarify understanding of interactions between two or more independent nervous systems The outcome is harmonious social structure and improvement in the inclusive fitness of group living individuals We believe that there is in prospect a new way of looking at social function that will ultimately increase our understanding of the highest and most complex levels of neurobiology The modern approach to the study of social behavior involves more than the recording of interactions between animals Each individual brings to the process of social interaction the implications of its prior genetic and experiential history      ,

**Carnivore Ecology and Conservation** Luigi Boitani,Roger A. Powell,2012-01-12 Provides concise yet authoritative descriptions of the most common techniques used to study wild carnivores and to conserve and manage their populations
