Economic Assessment Of Election Programmes Does It Make Sense:

Economic Assessment of Election Programmes Johan J. Graafland, Arie P. Ros, 2012-12-06 In the Netherlands the election programmes of the political parties are assessed for their economic impact by an independent economic bureau The result of this analysis is published just before the elections take place In this way the voter will be protected against political parties that try to win the elections by making popular but unfounded financial promises Economic Assessment of Election Programmes contains contributions of several distinguished economists and philosophers who consider the gains of this procedure to society Does the analysis by the Netherlands Bureau for Economic Policy Analysis CPB raise the democratic quality of the elections Can we really be confident in the tools of economics The last section of this volume states the opinion of representatives of the political parties This part also clarifies why political parties voluntarily participate in this process and how they perceive the role division between the political party and CPB *International and Interdisciplinary Insights into Evidence and Policy* Linda Hantrais, Ashley Lenihan, Susanne Macgregor, 2018-02-05 Contributors to this highly original book address the many questions raised by researchers and policymakers about the complex and often uneasy relationship between evidence and policy from an international and interdisciplinary perspective They explore both the institutions acting as evidence brokers and the different methods used to collect assess and use evidence in a variety of national and international settings by drawing on their experience of working in international contexts and in different disciplinary and policy environments and in some cases analysing their own involvement in the evidence based policy process The policy areas covered range from national and state level economic and social policies more generally to specific areas of intervention such as EU bio fuels targets the Active Ageing Index mental health and media the construction of second language learning policies microfinance and alcohol policy The authors highlight the strengths and weaknesses the use and abuse or successes and failures of different institutional and methodological approaches to evidence based policy They consider what elements of the lessons learned might be transferable across national and cultural boundaries and if so under what conditions This book was originally published as a special issue of Contemporary Social Science **Economics, Ethics and the Market** Johan J. institutional design of advisory organisations Using examples from a wide range of international case studies including think tanks governmental research institutes agencies and academies the authors provide a systematic guide to the major problems and pitfalls encountered in scientific advice and the means by which organisations around the world have solved these problems **The Practice of Forward-looking Transport Policy Assessment Studies** Jan Anne Annema,2008

Berinsky,2009-10-15 From World War II to the war in Iraq periods of international conflict seem like unique moments in U S political history but when it comes to public opinion they are not To make this groundbreaking revelation In Time of War explodes conventional wisdom about American reactions to World War II as well as the more recent conflicts in Korea Vietnam the Gulf Afghanistan and Iraq Adam Berinsky argues that public response to these crises has been shaped less by their defining characteristics such as what they cost in lives and resources than by the same political interests and group affiliations that influence our ideas about domestic issues With the help of World War II era survey data that had gone virtually untouched for the past sixty years Berinsky begins by disproving the myth of the good war that Americans all fell in line to support after the Japanese bombed Pearl Harbor The attack he reveals did not significantly alter public opinion but merely punctuated interventionist sentiment that had already risen in response to the ways that political leaders at home had framed the fighting abroad Weaving his findings into the first general theory of the factors that shape American wartime opinion Berinsky also sheds new light on our reactions to other crises He shows for example that our attitudes toward restricted civil liberties during Vietnam and after 9 11 stemmed from the same kinds of judgments we make during times of peace With Iraq and Afghanistan now competing for attention with urgent issues within the United States In Time of War offers a timely reminder of the full extent to which foreign and domestic politics profoundly influence and ultimately illuminate each other **Handover of Power - Planned Economy** Andreas Seidl,2022-09-13 Planned Economy rethought Do you also sometimes worry that you or many others could be unemployed And do you also wish you were not left to fend for yourself in an emergency What can a caring welfare state look like without exploding costs This book tells us how the unemployed can work for each other in a Planned Economy to support themselves and start companies with like minded people how democratic and digital voting on consumption and working time can protect residents from deprivation and maximise leisure time how disposed goods are recycled and redundant workers are retrained to be able to switch back to the other economic forms After 20 years of work on this book series Andreas Seidl thus ventures a step towards founding a party In doing so he entertains his readers both intellectually and visionarily If this work can give you hope inspire you or move you to action it has fulfilled its purpose Available in German and English

Institutional Analysis and Economic Policy Marc R. Tool, Paul Dale Bush, 2012-12-06 The purpose of this volume is to demonstrate how contemporary institutional economic analysis can be applied to the resolution of economic problems All of the essays in this book challenge the conventional wisdom in the problem areas addressed They advocate policy positions that often run contrary to views widely held by academic economists and policy makers alike The general literature of institutional economics is unorthodox beginning with its methodological foundations and continuing through the kind of policy analysis found in these pages The orthodox tradition in economics is commonly characterized as neoclassical economics Neoclassical economics fosters the myth that only the market can efficiently allocate a society's economic resources and equitably distribute its income It provides the intellectual defense for in which free markets are championed over democratic capitalist ideology policy formation which it contends is neither efficient nor equitable For both professional economists and policy makers of a conservative political persuasion neoclassical economics writes the script for a morality play in which the market is the good guy and the government is the bad guy As such it undermines the belief that free societies can enhance economic welfare through the use of democratic processes in the formulation of economic policies

The Discourse of Financial Crisis and Austerity Darren Kelsey, Frank Mueller, Andrea Whittle, Majid KhosraviNik, 2018-12-07 This book demonstrates the importance of understanding how political rhetoric financial reporting and media coverage of austerity in transnational contexts is significant to the communicative social and economic environments in which we live It considers how aspects of moral storytelling language representation and ideology operate through societies in financial crisis and through governments that impose austerity programmes on public spending Whilst many of the debates covered here are concerned with UK economic policy and British social contexts the contributions also consider examples from other countries that reflect similar concerns on the ideological operations of austerity and financial discourse The multiple discursive contexts of austerity demonstrate the breadth of social concerns and conflicts that have developed in societies and institutions following the global economic crisis of 2008 Through its interdisciplinary focus on this topic this book provides an important contribution across multiple subject areas with shared interests in critical and analytical approaches to discourse power and language in social contexts reflecting the healthy collaborative scope of critical discourse studies as a field of research This book was originally published as a special issue of Critical Discourse Studies
