Economics Of International Business:

Economics of International Business Mark Casson, 2000-01-01 This is an interesting book on an important topic Mikael Linden Scandinavian Economic History Review This book is indispensable reading for all researchers and practitioners in the international business field as well as economists and academics alike Giustificativo Pubblicato sul Bollettino del CIRT Economics of International Business sets out a new agenda for international business research Mark Casson asserts that it is time to move the subject on from sterile debates about transaction cost economies and resource based theories of the firm Instead of focusing on the individual firm the new agenda focuses on the global systems view of international business A static view of the firm's environment is replaced by a dynamic view which highlights the volatility of the international business environment Coping with volatility requires entrepreneurial skills flexibility and the need to synthesize information on a global basis To coordinate the global system properly entrepreneurs must cooperate through social networks of trust as well as competing Constructing a network of joint ventures it is argued is simply not enough Building on his previous book The Organization of International Business Mark Casson shows that with suitable modifications the methods of economics can be used to analyse all of these issues in a rigorous way The tools of business strategy are too clumsy to address the more subtle issues whilst descriptive approaches fail to bring key issues into sharp relief This book is indispensable reading for all researchers and practitioners in the international business field as well as economists and academics alike

Firms in the International Economy Sjoerd Beugelsdijk, Steven Brakman, Hans Van Ees, Harry Garretsen, 2013-12-13 Essays by leading scholars suggest that insights from international business could enrich firm heterogeneity research in international economics Despite their common roots international economics IE and international business IB have developed into two distinct fields of study Economists have directed their efforts at formalizing the workings of international trade and investment at the macroeconomic level business scholars have relied more on data driven conceptual narratives than mathematical tools But the recent focus of IE literature on firm heterogeneity suggests that IE would benefit from IB analyses of the behavior and organization of the internationalizing firm The contributions to this volume investigate ways that insights from IB can enrich IE research in firm heterogeneity The contributors discuss firm specific advantages in international trade and investment considering the firm as the unit of analysis and managerial inputs as a variable in market entry decisions analyze interactions between a firm and its external environment including local corporate philanthropy and institutional settings examine the boundaries of the firm and organizational choices such as the make or buy decision and investigate technology transfer and innovation offshoring discussing the role of subsidiaries inventor employment and other related topics Although IE and IB look at international firms from different perspectives these contributions make it clear that there is a potential for a productive exchange of insights and information between the two disciplines Contributors Laura Abramovsky Carlo Altomonte Sjoerd Beugelsdijk Bruce Blonigen Pamela Bombarda Steven Brakman Julia Darby Rodolphe Desbordes Filippo Di Mauro Mar a Garc a Vega Harry Garretsen Elena Huergo Florian Mayneris Quyen T K Nguyen Verena Nowak Cheyney O Fallon Gianmarco Ottaviano Michael Pfl ger Filomena Pietrovito Sandra Poncet Alberto Franco Pozzolo Alan M Rugman Armando Rungi Stephan Russek Davide Sala Luca Salvatici Christian Schwarz Roger Smeets Jens Suedekum Hans van Ees Vincent Vicard Ian Wooton Erdal Yalcin
