**Enlargement of the European Union** Allan F. Tatham, 2009-01-01 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author's conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty's determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States

**Research, Quality, Competitiveness** Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the crueler aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powers like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage
