Economics Of Intangible Investment:

Feminism and Anti-feminism in Early Economic Thought The late Michèle A. Pujol, 1999-05-26 I had the privilege and pleasure of supervising the Ph D dissertation from which the present book originated Its author Beth Webster was independent critical in a positive way and original She acquired a most thorough knowledge and mastery of the relevant literature She recognized early on the growing importance both qualitatively and quantitatively of investment in intangible assets in modern economic processes She set about developing an appropriate framework drawing on Kalecki s insights in particular within which to analyse the issues involved The outcome is the present book which is original relevant comprehensive and a pleasure to read G C Harcourt University of New South Wales Australia

Capitalism without Capital Jonathan Haskel, Stian Westlake, 2018-10-16 Early in the twenty first century a quiet revolution occurred For the first time the major developed economies began to invest more in intangible assets like design branding and software than in tangible assets like machinery buildings and computers For all sorts of businesses the ability to deploy assets that one can neither see nor touch is increasingly the main source of long term success But this is not just a familiar story of the so called new economy Capitalism without Capital shows that the growing importance of intangible assets has also played a role in some of the larger economic changes of the past decade including the growth in economic inequality and the stagnation of productivity Jonathan Haskel and Stian Westlake explore the unusual economic characteristics of intangible investment and discuss how an economy rich in intangibles is fundamentally different from one based on tangibles Capitalism without Capital concludes by outlining how managers investors and policymakers can exploit the characteristics of an intangible age to grow their businesses portfolios and economies

Restarting the Future Jonathan Haskel, Stian Westlake, 2022-04-05

Restarting the Future argues that the big economic challenges facing the world are the result of our failure to deal with the implications of an economy dependent on knowledge ideas and relationships It examines why making this transition is so hard and looks at ways forward in the fields of public policy business and finance The troubling state of rich world economies low productivity growth high inequality populist instability climate crisis is significantly the result of the troubled and incomplete shift to a new type of economy specifically the move from an economy dependent on tangible capital to one dependent on intangible capital At the heart of the problem is a significant slowdown in the pace of intangible investment since the financial crisis There were some early signs of this at the time the authors were writing their previous book Capitalism without Capital but new data now makes the severity and persistence of this slowdown clear This slowdown has happened because we lack the right institutions and strategies to encourage intangible investment and channel it effectively What is more there are significant groups with an interest in stopping these new institutions emerging Contrary to the dominant narrative that focuses on the tension between a successful future facing elite and a mass of low status left behinds the authors argue that many of the people and organisations with an interest in holding back the future are affluent and high

status including affluent retirees established financial institutions and graduate knowledge workers Haskel Westlake survey attempts to fix these institutional problems explaining how they work in the context of the intangible economy and what the upside to solving them might be They describe interesting and topical policy experiments and business strategies such as Preston's Local Economic Strategy or topical new business models like WeWork and CloudKitchens and set them in a novel economic context Specifically these sections look at city policy business finance and investment public investment competition policy monetary policy mitigating climate change and business strategies for tangible based firms The authors close the book with a political programme for how to get over the teething troubles of the new economy
