Economics Today Lial, Roger LeRoy Miller, Hornsby, Nancy W. Clegg, 1999 *Critical Empathy as Teacher Education Reform* Thomas A. Lucey, Kathleen S. Cooter, 2024-08-01 This book considers teacher training in social studies and finds it lacking a sense of genuine critical empathy a sense of shared humanity Current teacher education generally defines critical thinking as processes which examine topics in greater complexity but does not prepare candidates to study confront and challenge existing social structures Often in response to state mandates teacher education programs rate and interpret candidate quality based on their conformance with standards and defined outcomes There is a lack of tolerance for alternative views that may substantially challenge the often oppressive hierarchical system of authority in our world This volume which includes contributions from social studies educators in the U S Canada and Australia offers the thinking and practice of teacher education scholars who embrace the idea and practices of empathy in the social studies classroom Defined as the ability to understand and share the feelings of another direct emphasis on empathy represents a vehicle for developing a sense of mutual understanding and questioning of economic and social systems Developing teacher candidates who comprehend and experience the feelings of diverse education stakeholders provides opportunities for harmonious teaching and learning environments situated in the lives of learners

Communication and Economic Life Liz Moor, 2021-11-30 When we talk about media and the economy the economy is usually understood as the macro economy or GDP while the media usually refers to television and print news or the digital output of mainstream news providers But communication about money and the economy in everyday life is far more wide ranging than this It is also changing opportunities to discuss economic matters whether public or personal have proliferated online while new payment systems and shopping platforms embed economic behaviour more deeply into communications infrastructures Challenging earlier narrow definitions this ambitious book offers a new framework for thinking about the role

of communication in our economic lives Foregrounding the broader category of communicative practices the book understands economic life not only in terms of the macro economy but more sociologically as a set of processes of providing for material wants and needs How we talk about these wants and needs and our means for meeting them is how we come to understand our economic lives as meaningful The book explores how our economic lives are constructed communicatively in a variety of modes that move through but also exceed mass media from the symbolism of credit cards to the language used by economists and from social media promotion to debates in online forums Communication and Economic Life is a vital resource for students and scholars in media and communications and sociology and for anyone interested in how we talk about economic lives
