simultaneously as traders in the artificial market In this book first the details of U Mart are explained enabling readers to install and run the simulator on their computers for research and educational purposes The simulator thus can be used for gaming simulation of the artificial market and even for users as agents to implement their own trading strategies for agent based simulation ABS The book also presents selected research cases using the U Mart simulator Here topics include automated acquisition of trading strategy using artificial intelligence techniques evaluation of a market maker system to treat thin markets such as those for small and regional businesses systemic risk analysis of the financial market considering institutional design of the market and analysis of how humans behave and learn in gaming simulation New perspectives on artificial market research are provided and the power potential and challenge of ABS are discussed As explained in this important work ABS is considered to be an effective tool as the third approach of social science an alternative to traditional literary and mathematical approaches EAI International Conference on Technology, Innovation, Entrepreneurship and Education Angelica Reyes-Munoz, Ping Zheng, David Crawford, Victor Callaghan, 2019-03-15 This book presents the proceedings of the 1st EAI International Conference on Technology Innovation Entrepreneurship and Education TIE 2017 which took place at Canterbury Christ Church University on September 11 12 2017 The central theme of the conference is creativity and innovation especially in relation to technology business education social and political needs that make modern society flourish The proceedings feature papers from a cross disciplinary audience that explore the process of creativity and innovation The goal is that the various disciplines can learn from each other and see how they might benefit from the cross fertilization of practices The Sociology and Professionalization of Economics A. Emerging Black Middle Class and Democracy in South Africa* Tobias Erbert, 2014-03-27 Where does South Africa go Since the dawn of democracy in 1994 the country has been ruled by the former liberation movement the African National Congress

ANC Formerly a beacon of hope for most South Africans the perception of the party has changed Striking miners corruption scandals alleged restrictions on the freedom of the media and cadre employment pose challenges to the rainbow nation and its democracy But there is also a lot of hope around the Cape the liberation of South Africa from apartheid gave way to a new generation of young South Africans the emerging black middle class Well educated and highly motivated to work and achieve this group of people benefits from the lifted restrictions and new opportunities in post apartheid South Africa But will it also contribute to the consolidation and further development of democracy in the country Research in western nations suggests that the middle class is fostering the development of democracy But does this relation also hold for the emerging black middle class in South Africa This study tries to shed some light on this extremely relevant and though neglected issue It draws a picture of the emerging black middle class attitudes towards democracy and assesses how this group relates to democracy
