**Rock on Film** Fred Goodman, 2022-07-26  
 For rock music and film buffs alike, this is the ultimate guide exploring the electrifying, entertaining, and often daring marriage of rock roll and cinema. When the use of Bill Haley's *Rock Around the Clock* turned 1955's *Blackboard Jungle* into a teen sensation and a box office smash, it proved the opening shot in a cinematic and cultural revolution. Starting with Elvis Presley and the teenploitation films of the 50s and 60s, in *Rock on Film*, award-winning author and former *Rolling Stone* editor Fred Goodman takes readers on a wide-ranging journey through film and pop history. Along the way, he measures the transformative impact of the mid-60s landmarks *A Hard Day's Night* and *Dont Look Back* and how they seeded an almost unbelievably broad genre of films made by increasingly ambitious musicians and filmmakers across the past seven decades. From the carefree to the complex, the mindless to the mind-bending, rock films have staked out their own turf by simultaneously celebrating innocence and challenging artistic and social conventions. With an insightful round-up of fifty must-see rock films spanning crowd-pleasers, art-house favorites, underground gems, and undisputed classics, *Rock on Film* surveys the nearly seventy-year canon of a genre like no other. A series of original interviews with Cameron Crowe, Jim Jarmusch, Penelope Spheeris, Taylor Hackford, and John Waters illuminates how rock has influenced the work of some of the most divergent and thoughtful directors in movie history. Illustrated throughout by more than 150 full-color and black-and-white images, *Rock on Film* brings the history of music in the movies to vivid life.

**Understanding Radio** Andrew Crisell, 2006-05-23

Professor Laurie Taylor, on the first edition of *Understanding Radio*. *Understanding Radio* is a fully revised edition of a key radio textbook. The book also introduces students to the broadcasting landscape in a time of great change for national and local radio provision. *Understanding Radio* will be essential reading both to students of media and to those with a practical involvement in programme production. Rob Sullivan, 2016-04-22

Geography Speaks is an investigation of how geography is informed by speech act theory and performativity Starting with a critical analysis of how J L Austin s speech act theory probed the permeability between fact and fiction it then assesses oppositional interpretations by John Searle and Jacques Derrida and in doing so it explores the fictional aspects within scientific knowledge The book then focuses on five key aspects of the geographical discipline and analyses them using the theories of speech acts and performance the performative aspects of the creation of place speech act performances and geopolitics acts of cartographical construction as variations of speech act performance the performative aspects of the creation of public and private space and finally the history of the discipline as a sequence of performative acts that attempt to establish geography as being constitutive of this or that type of disciplinary method or scientific viewpoint Geography Speaks is an interdisciplinary text with a distinct and clear focus on cultural geography while also synthesizing into geography ideas germane to historiography the philosophy of language the history of science and comparative literature
