Ecomanagement The Elmwood Guide To Ecological Auditing And Sustainable Busineb:

EcoManagement Ernest Callenbach,1993 A guide for ecologically responsible businesses from one of the world s leading ecology think tanks the Elmwood Institute This book tells how to do a thorough review of a company s operations from the perspective of deep ecology as opposed to superficial environmentalism ECOMANAGEMENT provides a clear action plan for making a company more ecologically sound *Corporate Environmental Management 1* Richard Welford,2016-09-17 This volume presents a comprehensive analysis of the role of business in safeguarding the environment It introduces general issues and context and then gives a detailed critical examination of all the key tools of corporate environmental management systems and standards environmental policies guidelines and charters environmental auditing life cycle assessment the measurement of environmental performance and environmental reporting The book emphasizes systems based environmental management and also considers how such an approach might be integrated within local authorities and small and medium sized companies It then extends the systems approach to cover continuous environmental improvement building a corporate environmental profile and moving towards sustainability Written in a clear and informative style with checklists explanatory notes and references for further reading the book draws on the existing environmental strategies of a number of leading firms Each chapter is written by contributors involved in ongoing research and consultancy in their specialist area The book s focus makes it useful reading not only for students and researchers but also for managers faced with the challenge of introducing environmental management strategies into their own organizations **New Horizons in Research on Sustainable Organisations** Mark Starik, Sanjay Sharma, Carolyn Egri, Rick Bunch, 2017-10-24 Environmental sustainability practice and research have advanced over the past decade from novelty to near mainstream status today During this environmentally critical time period sustainability practitioner techniques such as environmental energy and social auditing other sustainability information and related systems and a wide variety of environmental sustainability approaches have been developed improved and institutionalised advancing both the practice and research of environmental sustainability management and policy However academics and practitioners in the sustainability field still have widely differing perspectives on what a sustainable organisation is or might be but seldom take the opportunity to share these respective sustainability visions let alone the multiple ways to achieve them New Horizons in Research on Sustainable Organisations is intended to bridge this gap between academics and practitioners with cutting edge research from both groups on progress towards sustainability After working on sustainability related projects involving other academics both research and practitioner oriented graduate students consultants managers and activists the lead co editors of this volume saw the need to encourage information exchanges among differing networks of sustainability stakeholders to create a pathway for researchers and practitioners in the general area of organisations and the natural environment to address issues of common interest There are many networks in the general subject area but the cross pollination of ideas between

academics and practitioners remains sketchy New Horizons in Research on Sustainable Organisations is intended to present and encourage such cross pollination The chapters in this volume are presented in three subsets generally proceeding from the most macro to the most micro in terms of perspective and applicability However this arbitrary division belies the integration from macro through meso or mid range to micro levels that is apparent in these studies Macro approaches typically include wider geographic scopes greater numbers of stakeholders and more complex explanatory factors than micro approaches Each chapter adopts one or more particular sustainability world view and then grounds these and the other chapter elements within actual organisations Therefore the reader is advised to envision not a one dimensional continuum but rather a circle in which the macro view both feeds back and feeds forward to the micro view This volume addresses a number of intriguing and important sustainable organisation phenomena such as multiple sustainable development perspectives changing environmental politics environmental management systems variations voluntary environmental programme performance complex adaptive systems and environmental technology development Additionally several models are suggested such as cultivation capabilities and business ecology frameworks

Implementing Ecological Integrity Philippe Crabbé, Alan J. Holland, Lech Ryszkowski, L. Westra, 2012-12-06 This book contains some of the papers which were presented at the NATO Science Environmental Security Advanced Research Workshop on Implementing Ecological Integrity Restoring Regional and Global Environmental and Human Health held in Budapest from June 26 to July 1 1999 All papers presented are summarized in the Introduction and in some cases shorter versions are published A multidisciplinary core of American and Western European participants had met over the preceding years to discuss the concept of ecological integrity The term ecological integrity is found in environmental policy documents but generally is not defined It competes with other recent terms or environmental narratives such as ecosystem health and sustainable development and also with older ones such as

conservation Therefore it is deemed important not only to sort out the definitions of these concepts but also to find out whether their practical implications differ Moreover it was interesting to find out whether participants from Central and Eastern European Countries CEEC and more generally from NATO partner countries would be first responsive to this concept and second would hold different views of it This explains the broad albeit not always consistent range of topics which are covered in this book The core group learned that CEEC and other NATO partners participants were responsive to the concept but that they were less exclusive of human influence
