China's Challenges to Human Security Guoguang Wu, 2012-11-27 This book looks at human security in China's foreign relations. It discusses the concept and theory of human security and their implications for China. The book goes on to analyse environmental security issues including climate change and water resources as well as looking at issues from an energy consumption perspective. Significant human security issues are then focussed on including food safety, pandemic disease control, migration and the human rights implications of China's overseas investment.

Globalization and Economic Nationalism in Asia Anthony P. D'Costa, 2012-06-14 This volume documents the ways in which Asian governments have been pursuing economic nationalism. It challenges the view that globalization renders the state redundant and demonstrates how they shape trade investment and financial outcomes. Countries covered include India, China, South Korea, Singapore, Japan and the East Asian region.

Handbook of Economic Nationalism Pickel, Andreas, 2022-10-13 This cutting edge Handbook puts economic nationalism in its historical context from early industrialization to globalization. It explores how economic nationalism has emerged to new prominence in the post globalization era as states are trying to protect their economies, societies and cultures from unwanted external influences.

Constructing the International Economy Rawi Abdelal, Mark Blyth, Craig Parsons, 2011-03-15 Focusing empirically on how political and economic forces are always mediated and interpreted by agents both in individual countries and in the international sphere, *Constructing the International Economy* sets out what such constructions and what various forms of constructivism mean both as ways of understanding the world and as sets of varying methods for achieving that understanding. It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider as a plausible hypothesis that economies might vary substantially for nonmaterial reasons that affect both institutions and agents' interests. *Constructing the International Economy* portrays the diversity of models and approaches that exist among constructivists writing on the international political economy. The authors outline and relate several different arguments for why scholars might attend to social construction, inviting the widest possible array of scholars to engage with such approaches. They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism. This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm.

Nationalism in a Global World Sam Pryke, 2017-09-16 What can globalization studies tell us about national identity?

This text looks at historical and contemporary debates to assess the key issues of nationalism and national identity from economic nationalism to cultural homogenisation. Setting issues in a global context and packed with examples, this is an important and engaging student text. **Economic Nationalism and Globalization** Henryk Szlajfer, 2012-09-03. In *Economic Nationalism and Globalization*, Henryk Szlajfer offers, against the background of developments in Latin America and Central Europe in times of globalization from the late 19th century until the late 1930s, a reinterpretation of economic nationalism both as an analytical category and historical experience. **The Nationalist Dilemma** Marvin Suesse, 2023-05-11. Analyses economic nationalism as a set of ideas and policies that have shaped the modern world economy over the past 250 years.

Capitalisms and Capitalism in the Twenty-First Century Glenn Morgan, Richard Whitley, 2012-04-26. This interdisciplinary book examines comparative business systems, institutions and practices by looking at current developments between firms, nations and markets in an increasingly globalized world and in the context of the recent financial crises.

Routledge Handbook of the Contemporary Philippines Mark Thompson, Eric Vincent Batalla, 2018-02-19. The Philippines is a fascinating example of a poor country democracy where issues of economic development and poverty, political participation and stability as well as ethnicity and migration are crucial. The *Routledge Handbook of the Contemporary Philippines* provides a comprehensive overview of the current political, economic, social and cultural issues of the country. The Handbook is divided into the following four sections, concentrating on a different aspect of the Philippines: domestic politics, foreign relations, economics and social policy, cultures and movements. In terms of domestic politics, chapters discuss clientelism, bossism, dynasties, pork barrel and corruption as well as institutions: the presidency, congress, the judiciary, the civil service, political parties and civilian-military relations. The Philippines is confronted with many overseas challenges with the foreign relations section focused on the country's relationship with China, Japan and the USA as well as assessing the impact of the Filipino diaspora community around the world. Regarding economics and social policy, authors examine industrial policy, capital flight, microfinance, technocracy, economic nationalism, poverty, social welfare programs and livelihoods. The final section on Philippine cultures and movements highlights issues of customs, gender, religion and nationalism while also examining various social and political forces: the peasantry, the middle class, indigenous peoples, NGOs, the left, trade unionism, the women's movement and major insurgencies. Written by leading experts in the field, the Handbook provides students, scholars and policymakers of Southeast Asia with an interdisciplinary resource on the evolving politics, society and economics of the Philippines. **International Business, Multi-Nationals, and the Nationality of the Company** Boris Gehlen, Christian Marx, Alfred Reckendrees, 2023-12-11. This book discusses challenges that arise for multinational companies from not having a single nationality and being exposed to a variety of simultaneous country-specific legal and culturally constructed nationalities at home and abroad. Brexit, America's First campaigns, Russia's war against Ukraine or the ever-tenser relationship between China and the US have led to raising concerns about foreign direct investments. Multinational

companies are pressured to withdraw from countries and reorganise global value chains The long held confidence that nationality does not matter for multinational companies in the globalised economy has dwindled Today companies doing business abroad are exposed to implications of their nationality because governments and customers react upon the nationality of a firm or a product as they did in the 20th century The chapters in this book address many international business domains covering political risk liability of foreignness cultural distance headquarters change and tax planning They use different methodological approaches to analyse European and US based MNEs in Europe Africa and South East Asia from 1900 to 1980 The book argues that nationality is not a ghost from the past in international business it is a topic that requires substantial consideration The chapters in this book were originally published in the journal Business History

How European Citizens Understand the Economy Dorian Alt, 2023-06-02 This book argues that the European public sphere functions to help citizens understand complex economic issues and discuss them meaningfully across borders Through original research conducted on citizens perceptions of European economic issues it explores a mechanism that allows people to make sense of such complex issues national anchoring and shows that the way issues are politicized today in a national public sphere will shape citizens understandings of novel issues tomorrow The book demonstrates that debates in the European public sphere spread knowledge to the population just as national debates do thus allowing transnational deliberation to function in the EU and potentially advance a European identity The book thus draws optimistic conclusions with regard to EU legitimacy with the European public sphere functioning rather well and problems of complexity and compatibility seeming less pronounced than often expected in public opinion research and European studies This book will be of key interest to scholars and students of public opinion European studies political attitudes austerity politics and more broadly to political science sociology and social psychology
