Economic Structure And Development:

New Structural Economics Justin Yifu Lin, 2012-01-06 Economic development is a process of continuous technological innovation and structural transformation Development thinking is inherently tied to the quest for sustainable growth strategies This book provides a neoclassical approach for studying the determinants of economic structure and its transformation and draws new insights for development policy The market is the basic mechanism for effective resource allocation at each level of development However economic development as a dynamic process entails structural changes including industrial upgrading and diversification and corresponding improvements in hard and soft infrastructure Such upgrading and improvements require coordination and go hand in hand with large externalities to firms transaction costs and returns to capital investment Thus in addition to an effective market mechanism the government should play an active role in facilitating structural changes The book provides empirical evidence in support of this framework as well as concrete advice to development practitioners

Economic Structure and Performance Hollis B. Chenery, 2014-05-10 Economic Structure and Performance Essays in Honor of Hollis B Chenery briefly reviews the work of Hollis Chenery in the field of economics This book discusses the underlying themes in Chenery's work including structure strategy adjustment and models Organized into four parts encompassing 26 chapters this book begins with an overview of the patterns of structural change and their relation to growth This text then examines the objectives measures and implementation of policy as well as administrative capabilities and cultural characteristics Other chapters compare Chenery's econometric analysis of development patterns with the historical analyses and suggest that the two approaches complement each other This book discusses as well the persistence of disequilibrium in segments of the economy The final chapter deals with simple criteria for detecting critical interdependencies and a formula for measuring their welfare consequences This book is a valuable resource for economists industrialists foreign capitalists and social scientists

Understanding and Interpreting Economic Structure Geoffrey Hewings, 1999-07-27 This book explores new approaches to the measurement and interpretation of the linkages between economic activity flows and income flows in urban and regional economies and new ways to explore the importance of regional economic structure in development The book combines theoretical contributions chapters that focus on the construction and interpretation of new social accounting systems and a variety of empirical applications These applications encompass community level income distribution impacts assessments of income distribution problems in Brazil interregional impacts of unexpected events in Japan welfare reform in the US and structural change in Chinese metropolitan economies One of the special features of the book is the use and application of a wide variety of models demo economic social accounting interregional computable general equilibrium employed at a variety of spatial scales

Cohen,2009-04-30 The book brings together economic systems and development economics offering theoretical foundations and empirical evidence It examines competition technology governance public goods income transfers transition performance convergence and displacement in a range of countries worldwide *The Development of the Soviet Economic System* Alexander Baykov,1947 Study of the development of the collective economy system in the USSR with particular reference to economic planning experience during the period from 1917 to 1939 covers economic policy economic development extensive industrialization rural cooperative and state farms labour force problems the marketing of consumer goods reconstruction of the trade network changes in the economic structure national budgeting etc Bibliography pp 480 to 495 and statistical tables Underdevelopment and Development in Brazil: Volume I Nathaniel H. Leff,2010-11-26 First published in 1982 this work builds on the detailed economic history of Brazil in its companion volume *Economic Structure and Change 1822 1947* assessing and challenging the established interpretations The book covers in depth the causes of the Northeast s poor economic experience and the emergence of

significant regional inequality in Brazil's development. In his analysis of the role of Government in Brazil's economic development, the author offers a fresh perspective on the importance of public finance constraints.

Changing Value Patterns and Their Impact on Economic Structure Yoshihiro Kogane, 1982

Chinese Ethnic Demography Yueping Yan, Zhaohe Lv, 2020-06-29

This book focuses on the status quo and current trends concerning ethnic issues in China and seeks to promote the equitable and harmonious development of Chinese and other nationalities around the world. Drawing on representative empirical studies and case studies, it describes the spatial structure and evolution of China's populace and analyzes the distribution of and legislation on its spatial development, which has been conducive to the scientific formulation of national population policies. After assessing the development of China's populace, the book analyzes the future prospects with regard to achieving the goal of a prosperous society and balancing the population in a comprehensive way. It puts forward some constructive suggestions on the modernization of the populace and constructs a new knowledge system for national development with Chinese characteristics. The book combines qualitative and quantitative analysis and employs empirical, speculative, comparative, and comprehensive methods to make full use of modern science and technology so as to promote ethnological research into a broader development path. Its goal is to objectively evaluate the development of the Chinese populace and provide objective facts and data to support those readers who are interested in its nature and evolution.

Complexity and Self-Organization in Social and Economic Systems Fukang Wang, Michele Sanglier, 2012-12-06

The Instituts Internationaux de Physique et de Chimie fondés par E. Solvay and the Institute of Nonequilibrium Systems of Beijing Normal University jointly sponsored a conference on The Complexity and Self-organization in Socio-economic Systems on October 17-20, 1994, at Beijing, China. The purpose of the conference was to explore the complexity and evolutionary laws of socio-economic systems through nonlinear dynamic systems and self-organization theory. The conference was chaired by Professor M. Sanglier and Professor Fang Fukang and was introduced by the Nobel prize winner Professor I. Prigogine and the vice director of the Chinese National System Reform Committee Mr. Wu Jie. The conference was held at an important time. On the one hand, the research in the natural sciences about the evolution of complex systems has made great progress; modern scientific theories such as nonlinear dynamic system theory and self-organization theory are becoming more and more mature, and a series of methods dealing with these complex systems are being developed, which enable us to understand and study non-equilibrium uncertainty and instability. On the other hand, human societies around the world witness a general increase of connectedness, interactivity, and an increase of reaction speeds to decisions. In this context, the deterministic linear way of thinking becomes more and more inadequate, and this stimulates the development of non-linear science.
