Economic Choice Under Uncertainty A Perspective Theory Approach:

Economic Choice Under Uncertainty J. L. Ford,1987 Time, Ignorance, and Uncertainty in Economic Models
Donald W. Katzner,1998 Formal economic analysis using Shackle s ideas of historical time and nonprobabilistic uncertainty
Pioneers of Modern Economics in Britain David Greenaway,John R. Presley,1989-06-18 This volume contains a series of biographical essays on seven of the most influential economists in Britain since World War II Each essay gives background details and a critical assessment of the economist s work examining his or her impact on the development of modern economics Unknowledge and Choice in Economics Stephen F. Frowen,1990-06-18 A collection of papers dicussing unknowledge and choice in economics The topics focus especially on G L S Shackle s theories and his place in subjectivist thought but also include time choice and dynamics in economics and interest rates and investment decisions Economics as an Art of Thought Peter Earl,S FROWEN,2013-04-15 This volume unites scholars from all over the world and with very different theoretical perspectives Their chapters probe into typical Shacklean themes of time and money uncertainty and expectation and into the roots of G L S Shackle s philosophical and methodological stance *Guidebook for Risk Perception and Communication in Water Resources Planning* ,1993 **Business Cycles and Financial Crises** A. W. Mullineux,1990
Behavioural Foundations of Economics J. Baxter,2016-07-27 In recent years work on what may broadly be described as behavioural economics has expanded rapidly and is now attracting the attention of leading figures in economics such as Kenneth Arrow Much of the work however has concentrated on particular aspects of individual and aggregate behaviour The book attempts to construct a unified framework showing both how behavioural variables form the basis of economic activity and how behavioural and economic variables interact to determine individual and aggregate behaviour **International Trade, Capital Flows and Economic Development in East Asia** Anthony Bende-Nabende,2017-03-02 The book provides an understanding of how international trade and capital flows have engineered the development process in East Asia and examines the real and potential challenges that the region is expect to encounter in the twenty first century It integrates four topics i e capital flows East Asia globalization and economic development that are at the centre of the social political and economic debate The text highlights the region s growing strategic importance in the twenty first century globalizing world where transnational corporations are playing an increasingly decisive role in the global distribution of production and trade It blends generalised regional analyses with country specific case studies in the world s most dynamic region It is so well designed that each of the seventeen countries that comprise the region gets some space for discussion Thus the text is a valuable contribution to the social science and business literature with a special focus on the now strategic region of East Asia *The Elgar Companion to Consumer Research and Economic Psychology* Peter E. Earl,Simon Kemp,2002-01-01 Presents over 100 specially commissioned entries on important topics in consumer research and economic psychology from behaviourism and brand loyalty to trust and the psychology of tourism Leading scholars in the fields provide stimulating

insights into the area as well as summarising existing knowledge Uncertainty, Production, Choice, and Agency Robert G. Chambers, John Quiggin, 2000-09-18 This book presents a justification of the state contingent approach to the economics of uncertainty Evolutionary and Neo-Schumpeterian Approaches to Economics Lars Magnusson, 2007-11-23 not gentle to the capitalists Schumpeter 1991 Thus by instead portraying the conflict between entrepreneurial activity and the sociology of the modern state he came quite close to the analysis carried out by Thorstein Veblen some decades earlier who emphasized the conflict between progressive technology and the institutions of a contemporary predatory dynastic State of early modern times superficially altered by a suffusion of democratic and parliamentary institutions Veblen 1964 p 398 Modern neo Schumpeterian approaches have continued to build on this groundwork provided by their master During recent years there has been a great upsurge of discussion on technology innovations technological regimes etc from the dynamic perspective provided by Schumpeter Dosi 1984 Rosegger 1985 Dosi et al 1988 Thus the search process for temporal extra profits has been stressed and has been used for modelling attempts The wider institutional framework for technological change and innovation activity has also been strongly developed more recently Hence emphasis has grown in the study of technological and industrial regimes path dependency and the network approach developed recently that social relationships structure the opportunities and constraints that face firms and agents that for example carry out innovations Snihota 1990 *Utility Theories: Measurements and Applications* Ward Edwards, 2013-12-01 The Conference on Utility Theories Measurements and Applications met at the Inn at Pasatiempo in Santa Cruz California from June 11 to 15 1989 The all star cast of attendees are listed as authors in the Table of Contents of this book see p V except for Soo Hong Chew and Amos Tversky The purpose of the conference and of National Science Foundation Grant No SES 8823012 that supported it was to confront proponents of new generalized theories of utility with leading decision analysts committed to the implementation in practice of the more traditional theory that these new theories reject That traditional model is variously identified in this book as expected utility or subjectively expected utility maximization EU or SEU for short and variously attributed to von Neumann and Morgenstern or Savage I had feared that the conference might consist of an acrimonious debate between Olympian normative theorists uninterested in what people actually do and behavioral modelers obsessed with the cognitive illusions and uninterested in helping people to make wise decisions I was entirely wrong The conferees in two dramatic straw votes at the opening session unanimously endorsed traditional SEU as the appropriate normative model and unanimously agreed that people don't act as that model requires These votes had a profound impact on my thinking detail about them and about that impact is located in Chapter 10 **Routledge Handbook of Behavioral Economics** Roger Frantz, Shu-Heng Chen, Kurt Dopfer, Floris Heukelom, Shabnam Mousavi, 2016-08-05 There is no doubt that behavioral economics is becoming a dominant lens through which we think about economics Behavioral economics is not a single school of thought but representative of a range of approaches and uniquely this volume presents an overview of them The wide spectrum of international contributors

each provides an exploration of a central approach aspect or topic in behavioral economics Taken together the whole volume provides a comprehensive overview of the subject which considers both key developments and future possibilities Part One presents several different approaches to behavioural economics including George Katona Ken Boulding Harvey Leibenstein Vernon Smith Herbert Simon Gerd Gigerenzer Daniel Kahneman and Richard Thaler This section looks at the origins and development of behavioral economics and compares and contrasts the work of these scholars who have been so influential in making this area so prominent Part Two presents applications of behavioural economics including nudging heuristics emotions and morality behavioural political economy education and economic innovation The Routledge Handbook of Behavioral Economics is ideal for advanced economics students and faculty who are looking for a complete state of the art overview of this dynamic field
