## **Economic Development Eec Economi:**

**The Economic Development of the EEC** Richard T. Griffiths, 1997 This authoritative volume traces the creation and development of the EEC as an institution and assesses its impact on the economic development of Europe and the policy areas under its control The book includes a thorough discussion of the background and origins of the European Economic Community In the early years of post war Europe the continuous search for a multilateral commercial agreement resulted in various plans for European commercial cooperation These schemes were proposed less in a desire for European integration and supranational institutions than in response to real economic problems and were the precursors to the formation of the EEC The next section investigates the process of creating the EEC including the road to integration of the major founding members and the attitude of the United States to European integration Finally it discusses the economic development of the EEC since 1957 It explores major themes including the impact of the Community on trade and agriculture and on competition and financial policy as well as the effects of its own enlargement The study ends with the steps towards closer union embodied in the Treaty of Maastricht which signalled the transformation of the European Economic Community into the European Union *Economic Development*, 1967 **Economic Development Prospects in the EEC from 1960 to**

**1970** European Economic Community. Commission, 1962 **Main Economic Policy Areas of the EEC – Towards 1992** P. Coffey, 2013-12-01 At the end of 1992 things will never again be the same inside the European Economic Community EEC because as that year draws to a close the aims of the Single Act of European Union SAEU which became law in July this year will have become effective thus creating a real Common Market This will mean that there will no longer be any obstacles to the free movement of goods between the Member States Equally and for the first time in the EEC s history internal capital movements will be absolutely free there will no longer be any exchange controls and it will be possible to freely establish financial services between EEC countries Likewise as currently being proposed by Lord Cockfield wide variations in the levels of value added tax VAT between Member States will not be allowed Also in the case f the Common Agricultural Policy CAP it will no longer be possible nor even necessary to have the monetary compensatory amounts MCA s All these changes but especially the increased freedom in capital movements will have profound consequences for the different regions of the Community and it will be desirable to have a much more dynamic Regional Policy before 1993 Last but by no means least a greater number of decisions inside the Community will be made by majority voting and the Parliament will be endowed with enhanced powers The Pluralist Character of the European Economic Constitution Clemens Kaupa, 2016-08-25 This monograph intervenes in the long standing and controversial debate on the socio economic orientation of the European Union Arguing that the European economic constitution is pluralist in the sense that it does not favour any specific socio economic paradigm it shows that European law allows the pursuit of very different regulatory projects by the European and the national legislators This pluralist character of the European economic constitution stands in an uncomfortable

relationship with the policies currently pursued by the European Union which are often neoliberal in their orientation The book takes an interdisciplinary approach it analyses the Treaty on the Functioning of the European Union as interpreted and developed in the case law of the Court of Justice its history and its regulatory purpose in the light of conflicting socio economic paradigms By challenging the orthodoxy the book makes a bold proposition that will likely resonate in both European economic law scholarship and European law in general With the ongoing economic crisis triggering a significant interest in economic questions among legal scholars it is particularly timely and topical

**Main Economic Policy Areas of the EEC — Toward 1992** P. Coffey, 2012-12-06 PETER COFFEY Since the appearance of the second edition of this work which was so quickly out of print so much has happened in Europe In the EEC itself 1989 was a watershed year concerning the Community's moves towards the creation of the Single European Market SEM by the end of 1992 Early in the year the appearance of the Delors Report on Economic and Monetary Union in the European Community was followed by an agreement at the European Summit in June to begin the first stage of this union in the Summer of 1990 As a counterpart to this and other agreements seen by trade unions and similar groups as an agreement New composition of the ECU as on 21 st September 1989 Deutsche Mark DEM 30 10% French Franc FRF 19 00% Pound Sterling GBP 13 00% Italian Lira ITL 10 15% Dutch Guilder NLG 9 40% 7 90% Belgian Franc BFR 2 45% Danish Kronor DKK 1 10% Irish Pund IEP 0 80% Greek Drachma GRD 5 30% Spanish Peseta ESP 0 80% Portuguese Escudo PTE IX x between governments and businesses there followed calls for and the adoption by eleven Heads of State of a Social Charter
