Economic Structures Of Antiquity:

Economic Structures of the Ancient Near East Morris Silver, 2024-08-28 *Economic Structures of the Ancient Near East* 1985 is a political economy of antiquity which applies the universal conclusions of theoretical economics to the interpretation of economic life The first part of the book shows that the analysis of transaction costs that is the resources used up in exchanging ownership rights including costs of communication and of designing and enforcing contracts provides numerous insights into the structure of the ancient economy The role of temples as centres of commerce inculcation of professional standards by gods elevation of technology to the status of divine gift religious syncretism and fetishism and many more seemingly exotic practices are comprehended as elements in a strategy to cope with high transaction costs by increasing the stock of what might be called trust capital It is shown that similar considerations lie behind the ubiquity of diversified multinational family firms the prominent entrepreneurial role of high born women the prominence within the contractual process of publicly performed conventional gestures and recitations and the intrusion of gifts friendship and other manifestations of personal economics into exchange relationships The book goes on to examine carefully and then reject the view of economic historian Karl Polanyi and others that the ancient Near East lacked true markets for consumer goods and productive factors The direct evidence of market exchange local and long distance occupational specialisation supply demand determined prices investment in material and human capital production for the market and other modern traits is uneven with respect to place and time but nevertheless abundant The requisite market functions demanded by Polanyi including a market for labour slave and free and elaborate credit and investment markets can be seen plainly from very early times Finally the book deals with the impact on the ancient Near Eastern economy of changes in economic incentives and of changes in economic policy It becomes evident that ancient economies were capable of making profound alterations in order to take advantage of new economic opportunities It is also shown that the ancient Near East was not static as is usually asserted periods of pervasive economic regulation by the state are interspersed with lengthy periods of relatively unfettered market activity and growth

Economic Structures of Antiquity Morris Silver, 1995-02-14 The economy of the ancient Middle East and Greece is reinterpreted by Morris Silver in this provocative new synthesis Silver finds that the ancient economy emerges as a class of economies with its own laws of motion shaped by transaction costs the resources used up in exchanging ownership rights The analysis of transaction costs provides insights into many characteristics of the ancient economy such as the important role of the sacred and symbolic gestures in making contracts magical technology the entrepreneurial role of high born women the elevation of familial ties and other departures from impersonal economics reliance on slavery and adoption and the insatiable drive to accumulate trust capital The peculiar behavior patterns and mindsets of ancient economic man are shown to be facilitators of economic growth In recent years our view of the economy of the ancient world has been shaped by the theories of Karl Polanyi Silver confronts Polanyi's empirical propositions with

the available evidence and demonstrates that antiquity knew active and sophisticated markets In the course of providing an alternative analytical framework for studying the ancient economy Silver gives critical attention to the economic views of the Assyriologists I M Diakonoff W F Leemans Mario Liverani and J N Postgate of the Egyptologists Jacob J Janssen and Wolfgang Helck and of the numerous followers of Moses Finley Silver convincingly demonstrates that the ancient world was not static periods of pervasive economic regulation by the state are interspersed with lengthy periods of relatively unfettered market activity and the economies of Sumer Babylonia and archaic Greece were capable of transforming themselves in order to take advantage of new opportunities This new synthesis is essential reading for economic historians and researchers of the ancient Near East and Greece
