Waterman, 2012-12-06 Normative Social Theory James M Dean and A M C Waterman University of Manitoba 1 Economics and Religion Once Again This book is a sequel to Economics and Religion Are They Distinct Brennan and Waterman 1994 That volume was motivated by a frustration born of many disappointing encounters between economists and theologians in the 1980s Can bishops synods and other voices of organized religion bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to that of the purely secular knowledge economists believe they can supply Can economists bring any interesting and disinterested contribution to the public policy debate If so what is the relation of their contribution to the fundamental values that inform social ethics and that are still guarded to a large extent by religious tradition All too often the two sides talked at cross purposes Well intentioned economists coexisted for a few hours or days with well intentioned theologians whose manner of conceiving social reality was radically incompatible with their own There seemed to be no common ground The first requisite of any genuine conversation is an agreed conceptual framework that is able to accommodate the peculiar social vision both of the economist and of theologian and to display the logical relation between the two

**Discipleship of the Mind** James W. Sire, 1990-04-04 Discussing worldview thinking the foundations of knowledge and the relationship between knowing and doing James W Sire shows Christians how to honor God with their minds *Nazism, Liberalism, and Christianity* Kenneth C. Barnes, 2021-11-21 The Great Depression devastated the economies of both Germany and Great Britain Yet the middle classes in the two countries responded in vastly different ways German Protestants perceiving a choice among a Bolshevik style revolution the chaos and decadence of Weimar liberalism and Nazi authoritarianism voted Hitler into power and then acquiesced in the resulting dictatorship In Britain Labour and Tory politicians moved gingerly together to form a National Government that muddled through the Depression with piecemeal reform In this troubling book about troubled times Kenneth Barnes looks into the question of how theologians and church leaders contributed to a cultural matrix that predisposed Protestants in these two countries to very different political alternatives Holding fast to the liberal social gospel British churchmen diagnosed the problems of the 1920s and the

Depression as solvable and called for genuine reforms many of which foreshadowed the coming welfare state. German leaders in contrast were terrified by the socioeconomic and political problems of the Weimar era and offered no social message or solution. Despairingly they referred the problems to secular politicians and after 1933 beat the drum for obedience to the Nazi state. Based on extensive research in European archives especially the rich papers of the interwar ecumenical movement housed at the World Council of Churches in Geneva, this book examines key intellectual figures such as Karl Barth, Paul Tillich, Dietrich Bonhoeffer, and Archbishop William Temple, as well as many lesser-known church officials and theologians. Barnes brings to life the intellectual struggles and dilemmas of the interwar period to help explain why good people could, for moral and religious reasons, choose opposing courses of political action.
