International Institutions in Trade and Finance A. I. MacBean,P. N. Snowden,2021-11-21 Originally published in 1981 this book provided an up to date and critical review of the recent history and current status of the main economic institutions affecting international trade and relations at the time The authors emphasise the economic effectiveness or otherwise of such bodies as GATT IMF EEC UNCTAD and the World Bank but take account of the political factors present in both the initial design and in the way that the institutions have developed In particular the book analyses the changed degree of dominance which the USA had been able to exert on the international community **Economic Development Through Regional Trade** K. Kimbugwe,N. Perkidis,M. Yeung,W. Kerr,2012-02-14 Post colonial Africa is littered with regional trade agreements that amounted to little more than a photo opportunity for the leaders that signed them This book explores conventional explanations for past failures and posits a new theory rooted in the symbiotic relationship between authoritarian politics and crony capitalism **International Economics: A Heterodox Approach** Hendrik Van den Berg,2014-12-18 Now in its third edition this textbook covers all of the standard topics taught in undergraduate International Economics courses However the book is unique in that it presents the key orthodox neoclassical models of international trade and investment whilst supplementing them with a variety of heterodox approaches This pluralist approach is intended to give economics students a more realistic understanding of the international economy than standard textbooks can provide
